Clinical Leader Organizer (CLO) Overview

Clinical Leader Organizer (CLO) is an interactive organizer that supports communication and coordination across the continuum of care. It provides a high-level overview of patient data such as location, visit summary, risks and more - which can be used to help understand and manage patient care goals.

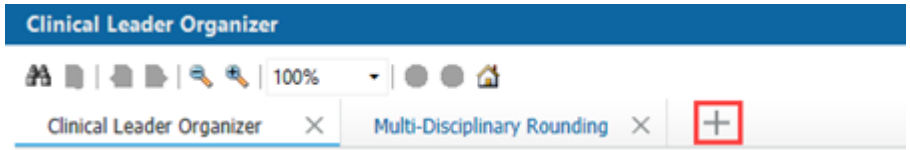
NOTES:

- End Users who are provisioned with Nurse Supervisor positions in CST Cerner land on the **CLO** page when logging into **PowerChart**.
- End Users who access other Nursing, Allied Health, or OB Clerk positions in CST Cerner can navigate to **CLO** by clicking the **Clinical Leader Organizer** Clinical Leader Organizer button on the toolbar.

below.

NOTES:

- Click the **Add** button to add the missing workflow tab in CLO.



- Hover over the column header to see the full title of the column.
- You may customize the indicator columns in each workflow tab of the CLO as needed. Please refer to the help topic - Customize Columns in Clinical Leader Organizer (CLO).
- When you access any workflow tabs in the CLO for the first time, you can only view patient's name, location, and visit information. To review more information, you need to establish relationship. Please refer to the help topic - Navigate to Clinical Leader Organizer (CLO).
- Double click the patient's name to access the chart from any workflow tabs of the CLO.

REMINDERS:

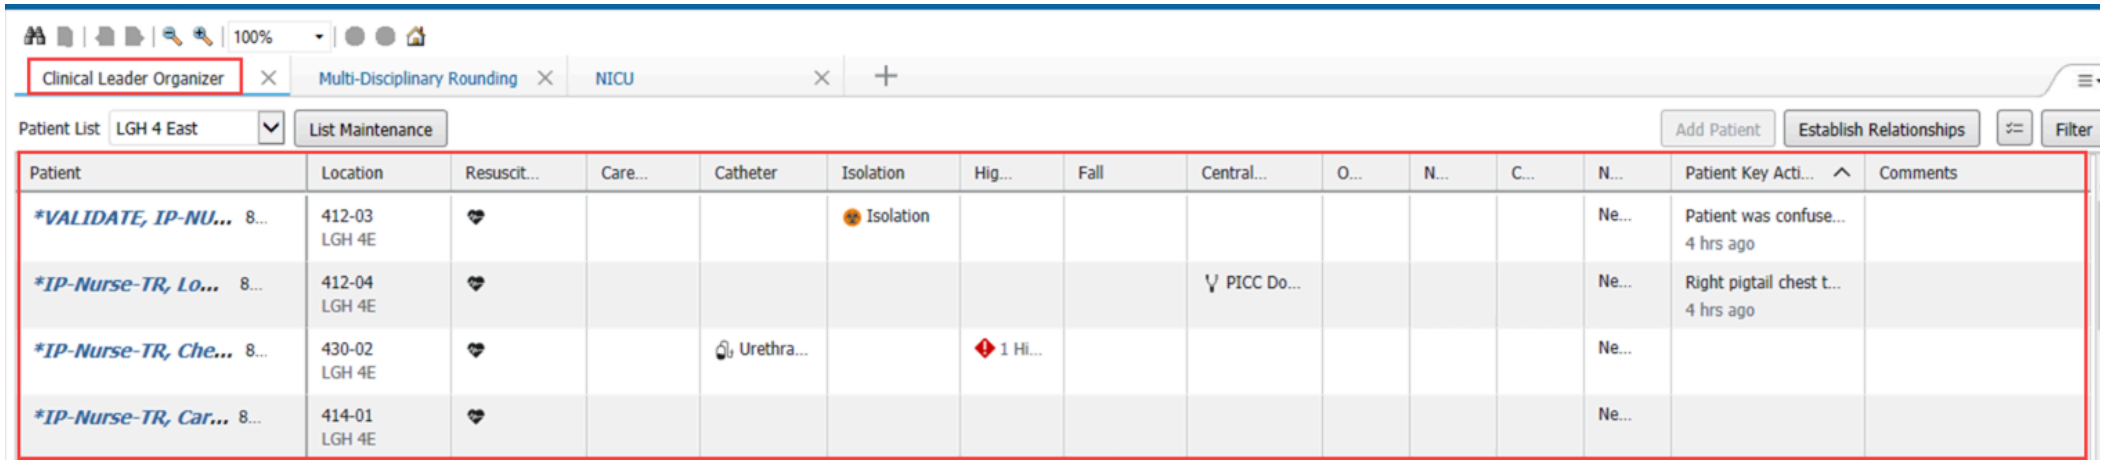
- Set up **Location Patient List**, **Custom Patient List**, or **Care Team List** so that you can select a patient list type or a Care Team in a workflow tab of the CLO to display a list of patients.
- Refresh the screen to review updated information in CLO.

Overview of the Clinical Leader Organizer Tab

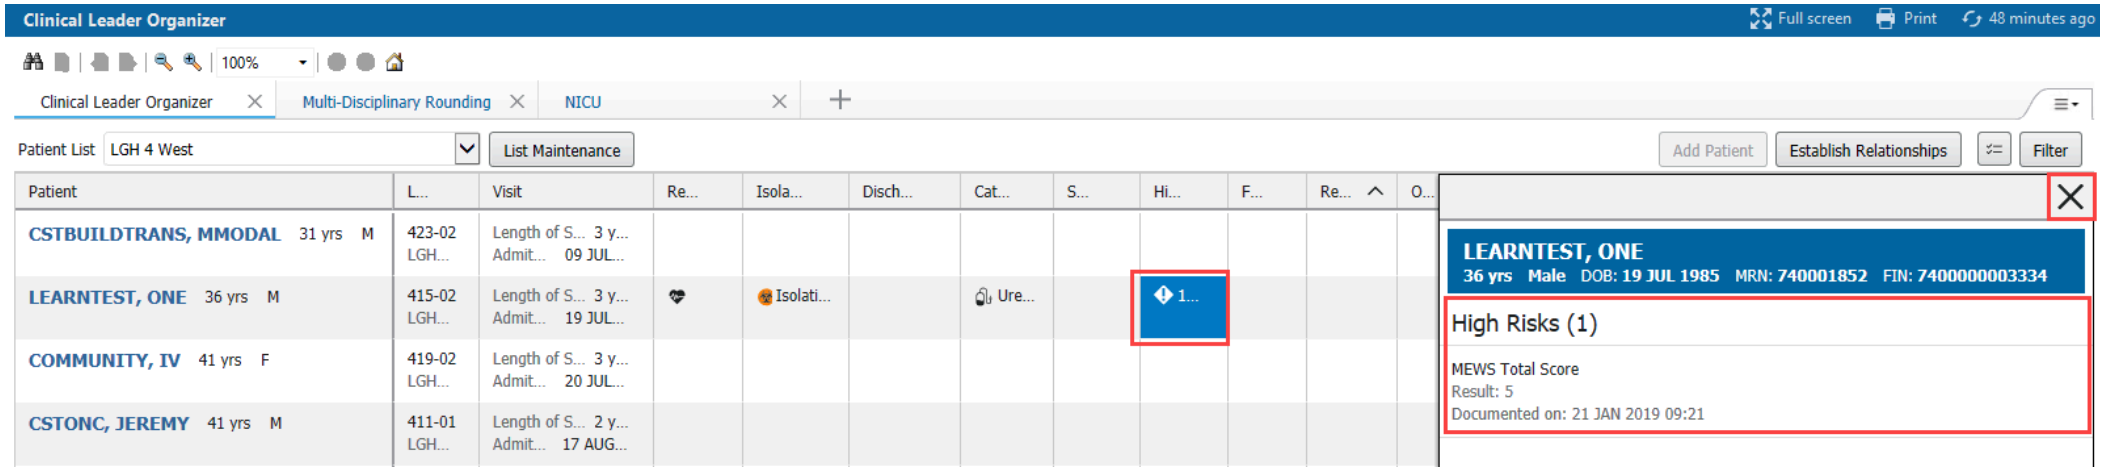
Select the **Clinical Leader Organizer (CLO)** tab to review a snapshot of the patient status and key information that supports care planning. This information can be used at shift handover and during rounds. The data that can be reviewed in the CLO tab includes:

Click here to see this page in full context

- Patient's basic demographic information
- Patient's location
- Discharge – active orders
- High risks alerts – from iView documentation and active orders
- Isolation – active order
- Restraint information – active order and iView documentation
- Resuscitation – active order
- Pending transfer – active Bed Transfer Request order
- Diet – active order
- Falls – Morse Fall Risk Score or Humpy Dumpy Fall Scale Score documented in iView
- Suicide precautions – active Suicide Precautions (suicide risk) order
- New lab and diagnostic results – provides a link to access Results Review
- Patient Contact – facilitates nursing workflow by allowing HaH nursing staff to, at a glance determine the location of each of their patients and plan visits accordingly
- Skin integrity – Braden Scores pulled from iView documentation
- Ventilator – active orders (e.g. Invasive Ventiliation)
- Airway information –pulled from iView documentation
- Telemetry – active order
- Central line – pulled from iView documentation
- Urinary catheter pulled from iView documentation
- Visit information - length of stay and admit date information is pulled from registration whereas anticipated discharge date is pulled from Discharge Assessment and Care Coordination PowerForms
- Care team – from Care Team component
- Non-invasive ventilation – active orders (e.g. CPAP, BIPAP, etc.)
- Oxygen therapy – active order and iView documentation on Oxygen Therapy activity
- COVID – pulled from COVID-19 Screening PowerForm
- Patient Key Activities – pulled from documentation in the Handoff/Shift Report iView section

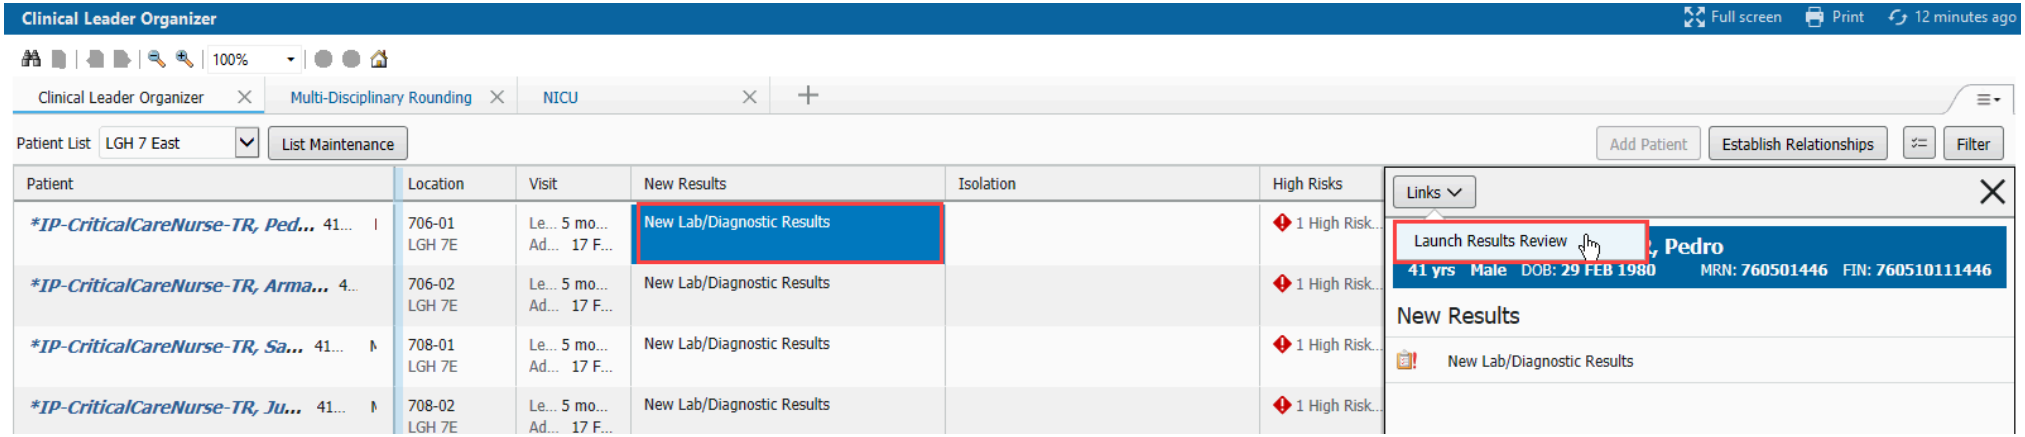


To review detailed information, click the icon, the number, or the text within the field of the indicator column. The detailed information displays in the split window that slides from the right side of the screen. Click **X** to close the split window after review.



Please note that new lab and diagnostic results do not display in the **CLO** tab. To review these results:

1. Click on the text **New Lab/Diagnostic Results** in the **New Results** column to open the split window.
2. Click **Launch Results Review** from the **Link** drop-down. This will forward you to **Results Review** where you can locate the new results.



Overview of the Multi-Disciplinary Rounding Tab

Select the **Multi-Disciplinary Rounding** tab to have a high-level overview of patient data pertaining to interdisciplinary rounding and discharge planning. This tab is similar to the CLO tab. The only difference between them is that the **CLO** tab focuses on the patient's clinical status whereas the **Multi-Disciplinary Rounding** tab focuses on the patient's discharge readiness.

The table below describes the information that can be reviewed in each indicator column under the **Multi-Disciplinary Rounding** tab:

- Patient column – displays patient's basic demographic information including name, age and gender
- Location column – this information is pulled from registration
- Diagnoses column – pulls in diagnoses documented in the **Active Issues** component
- Visit column – pulls in length of stay and admit date information from the registration whereas anticipated discharge date is pulled from **Discharge Assessment** or **Care Coordination** PowerForm
- Discharge column – pulls in active discharge orders
- Barriers to Discharge column – pulls in documented information from **Discharge Assessment** or **Care Coordination** PowerForm
- High Risks column – displays a **High Risk** icon to indicate that iView documentation has
- Consults column – pulls in active consult and following orders
