## Overview of the NICU Tab

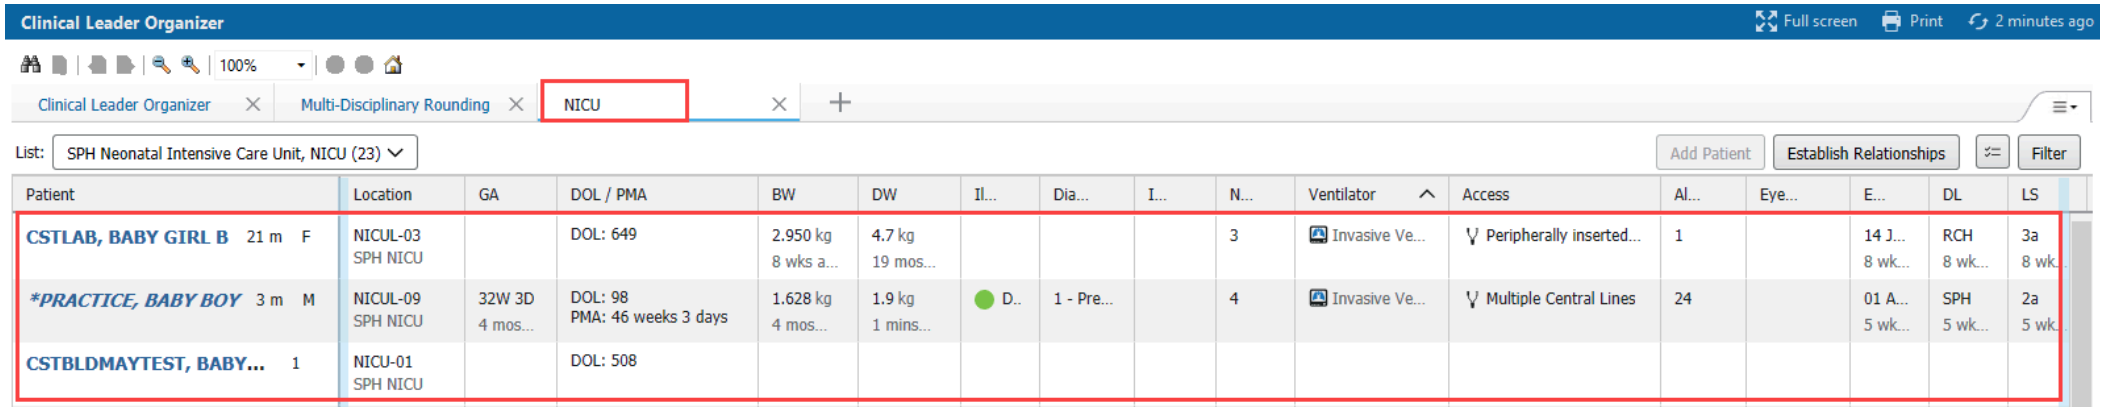
The **NICU** tab is able to populate a list of patients via a **Patient List** or a **Care Team** List

The **NICU** tab pulls in newborn specific information from various parts of the chart, including specific active orders, recent iView documentation, completed PowerForms, and the provider's I-PASS pane (a handoff tool for providers). The information that can be reviewed in the **NICU** tab includes:

- Patient's basic demographic information
- Gestational Age (GA) – from NICU Admission History PowerForm
- Birth Weight (BW) – from NICU Admission History PowerForm
- Illness Severity – pulled from I-PASS
- Patient's current location
- Days of Life (DOL) & Post Menstrual Age (PMA) – from Neonate Overview component
- Dosing Weight (DW) – from iView
- Diagnoses – from Active Issues componen

Click here to see this page in full context

- Isolation – active order(s)
- Ventilator – active orders (e.g. Invasive Ventilation, HFOV, HFJV, etc.)
- Allied Health – active allied health consult and following orders
- Estimated Date of Discharge (EDD) – pulled from Newborn Discharge Information, Discharge Planning Assessment, or Care Coordination PowerForm
- Level of Service (LS) – documented iView field, Neonatal Daily Classification
- TPN – pulled in active TPN and lipid emulsion orders
- Non-invasive ventilation – active orders (e.g. Oxygen Therapy, CPAP, NIPPV, etc.)
- Access – documented Central Line iView information
- Eye Exam - active order(s)
- Discharge Location (DL) – pulled from Newborn Discharge Information, Discharge Planning Assessment, or Care Coordination PowerForm
- Comments



1. Click the icon, the number, or the text in the field of the indicator column to review detailed information within the split window.

## Overview of the Critical Care Clinical Leader Organizer Tab

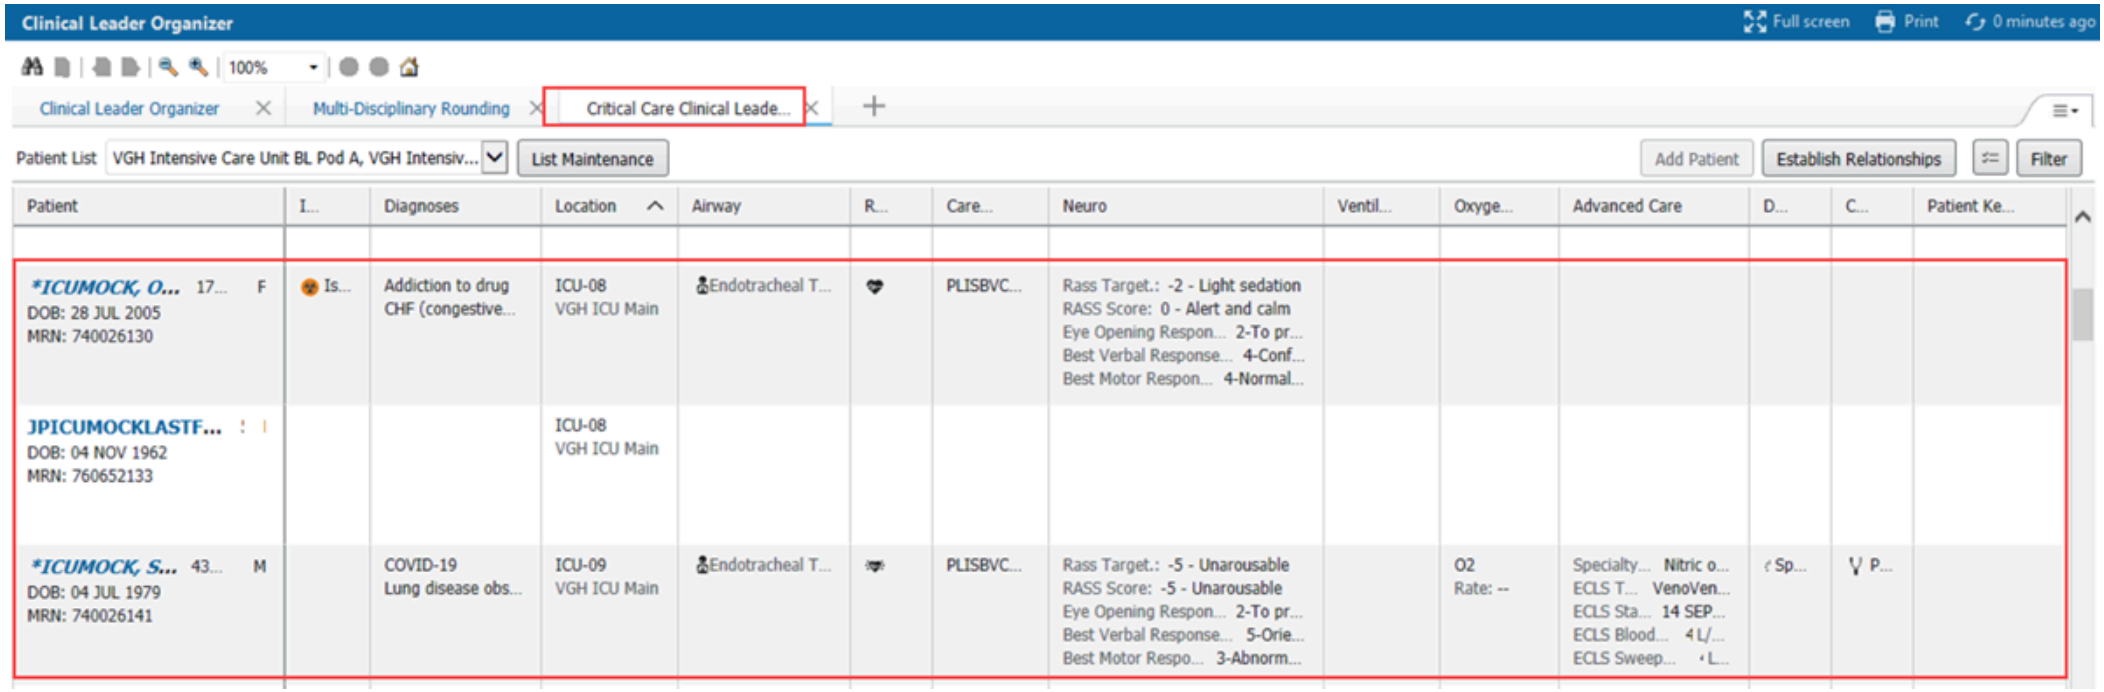
Select the **Critical Care Clinical Leader Organizer** tab to review a snapshot of patient status and key information that supports care planning. This information can be used in rounding and charge nurse handover in the Critical Care/High Acuity settings. The data that can be reviewed in the **Critical Care Clinical Leader Organizer** tab includes:

- Patient basic demographic infomation
- Patient's location
- Illness severity – pulled from I-PASS
- Diet – active order
- Visit information - length of stay and admit date information is pulled from registration whereas anticipated discharge date is pulled from Discharge Assessment and Care Coordination PowerForms
- Catheter – pulls in documented iView information on urinary catheter insertion date. Displayed information will be removed when the discontinuation of urinary catheter is documented.
- Consult Orders – active order
- Central Line – pulled from iView documentation regarding insertion date
- Advanced Care – pulled in iView documentation regarding invasive ventilator mode, set respiratory rate, set tidal volume, positive end expiratory pressure (PEEP), Pressure Support, Pressure Control, SpO2, End Tidal CO2, Set O2% (FiO2), specialty gas settings, ECLS (e.g. type, start date/time), and CRRT (e.g. treatment day number, treatment type and net fluid balance goal)
- Oxygen Therapy – active order and iView documentation on Oxygen Therapy activities
- Airway – pulled from iView documentation
- Ventilator – active orders for invasive ventilation

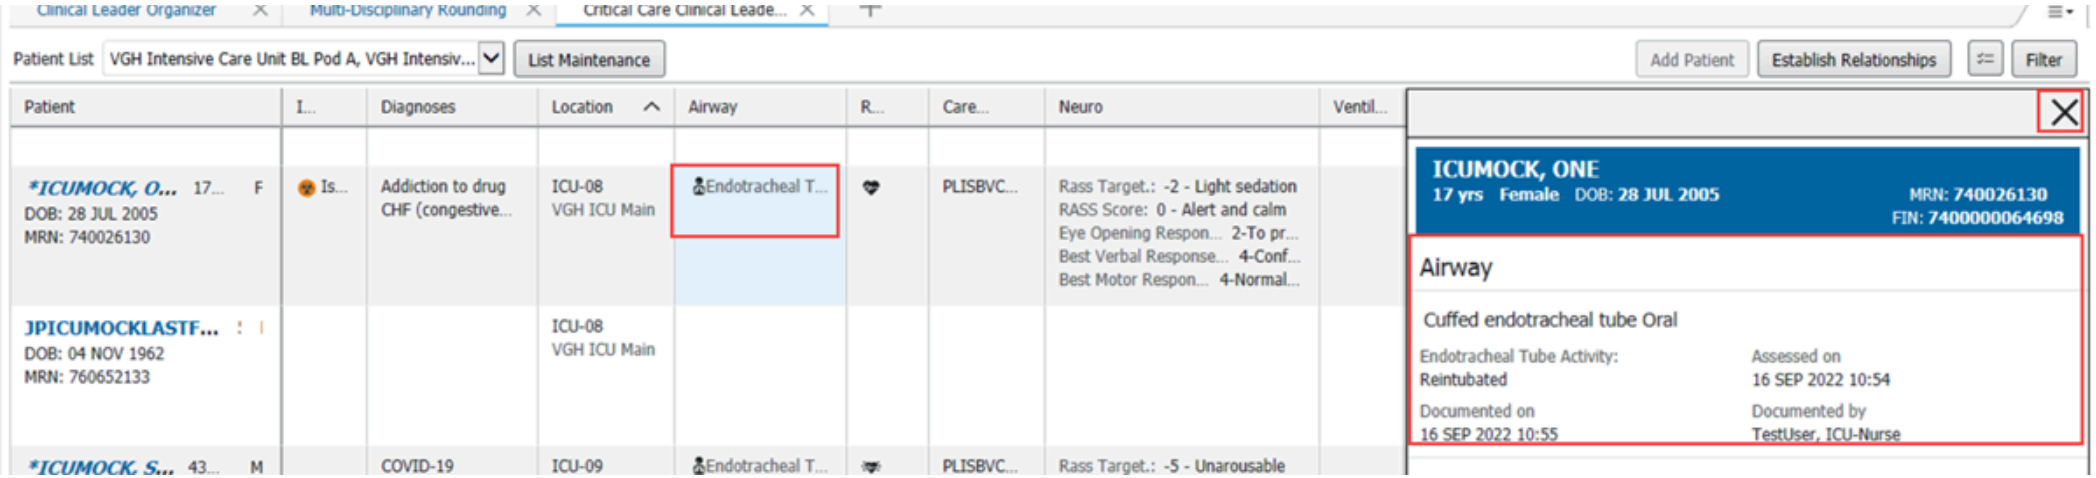
CST Cerner Help

Click here to see this page in full context

- Isolation – active order(s)
- Diagnosis – from Active Issues component
- Neuro – pulled from iView documentation regarding neurological assessment, sedation scales, pain assessment, neuro drain care, and EEG type.
- Care Team – pulled from Care Team component
- Resuscitation – active Code Status order
- Patient Key Activities – pulled from iView documentation in the Handoff/Shift Report section
- Chief Complaint – pulls in chief complaint information documented by the provider
- Microbiology – pulls in negative or positive microbiology result. To view Microbiology full detailed results, click on the **Open Microbiology Cultures** hyperlink to direct you to **Results Review**.
- Comments

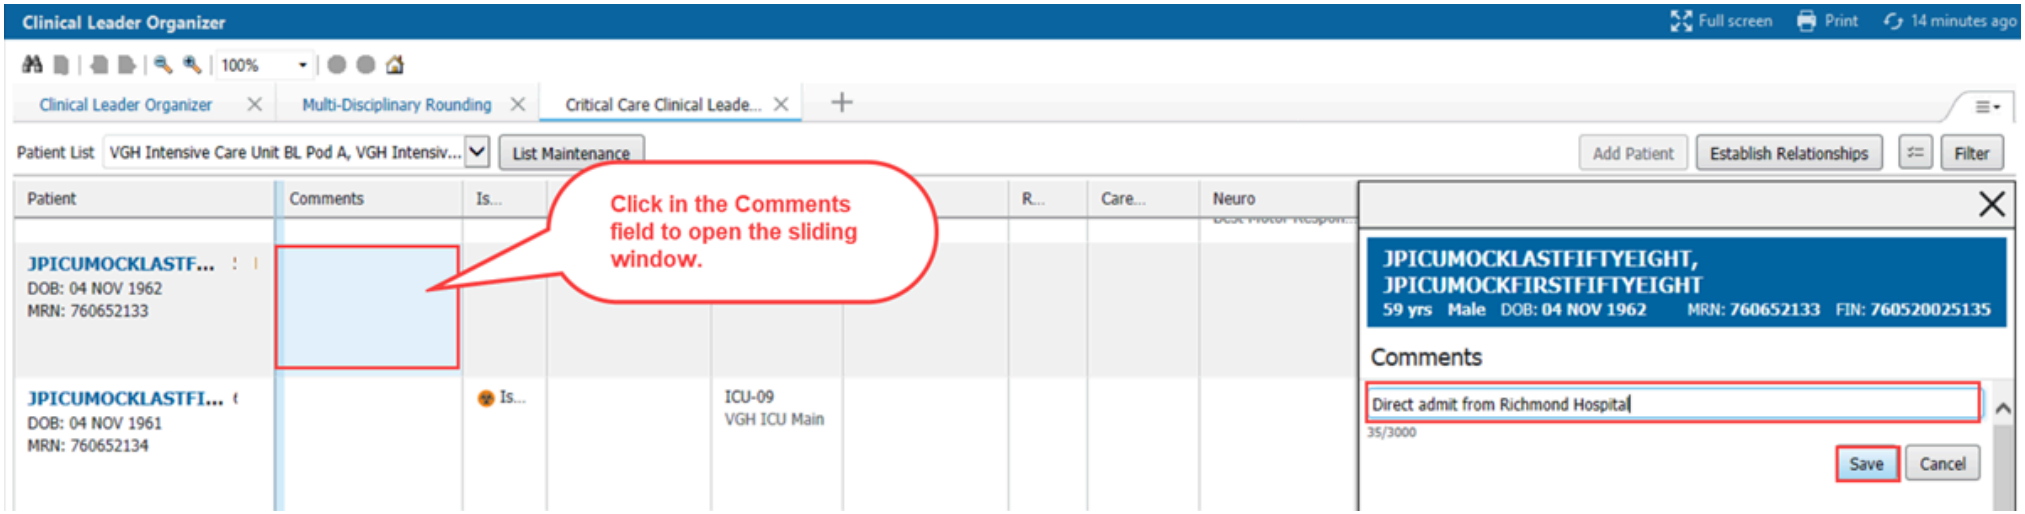


To review detailed information, click the icon, the number, or the text within the field of the indicator column. The detailed information displays in the split window that slides from the right side of the screen. Click **X** to close the split window after review.

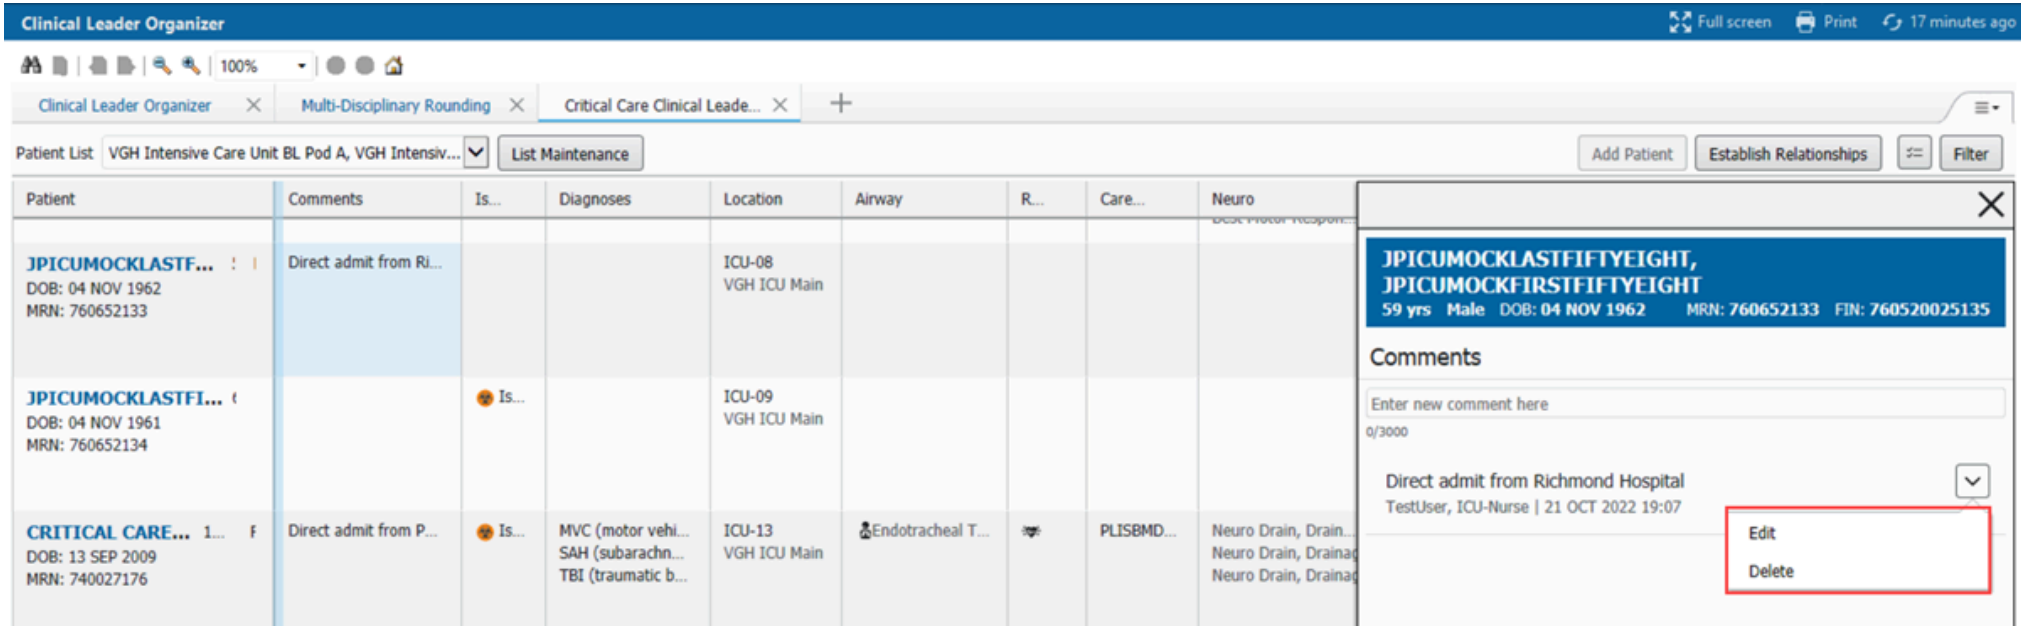


To add a comment in the **Critical Care Clinical Leader Organizer** tab:

1. Select a patient and click in the field of the **Comments** column.
2. Type a comment related to patient care in the free text field and click **Save**.



3. Click the drop-down arrow to select **Edit** or **Delete** if you want to modify the existing comment or remove it from the **Comments** column.



## Add Patients to the Custom Patient List in Clinical Leader Organizer

You may manually add a patient from the selected **Location List** to your **Custom Patient List** in **Clinical Leader Organizer (CLO)**.

> **NOTE**: If no patient lists have been set up in CLO, click the **List Maintenance** button to create Location List and Custom Patient List

To add a patient from a **Location List** to your **Custom Patient List** in **CLO**:

1. Select a **Location List** from the **Patient List** drop-down.
2. Click the **Select Rows** button.
