
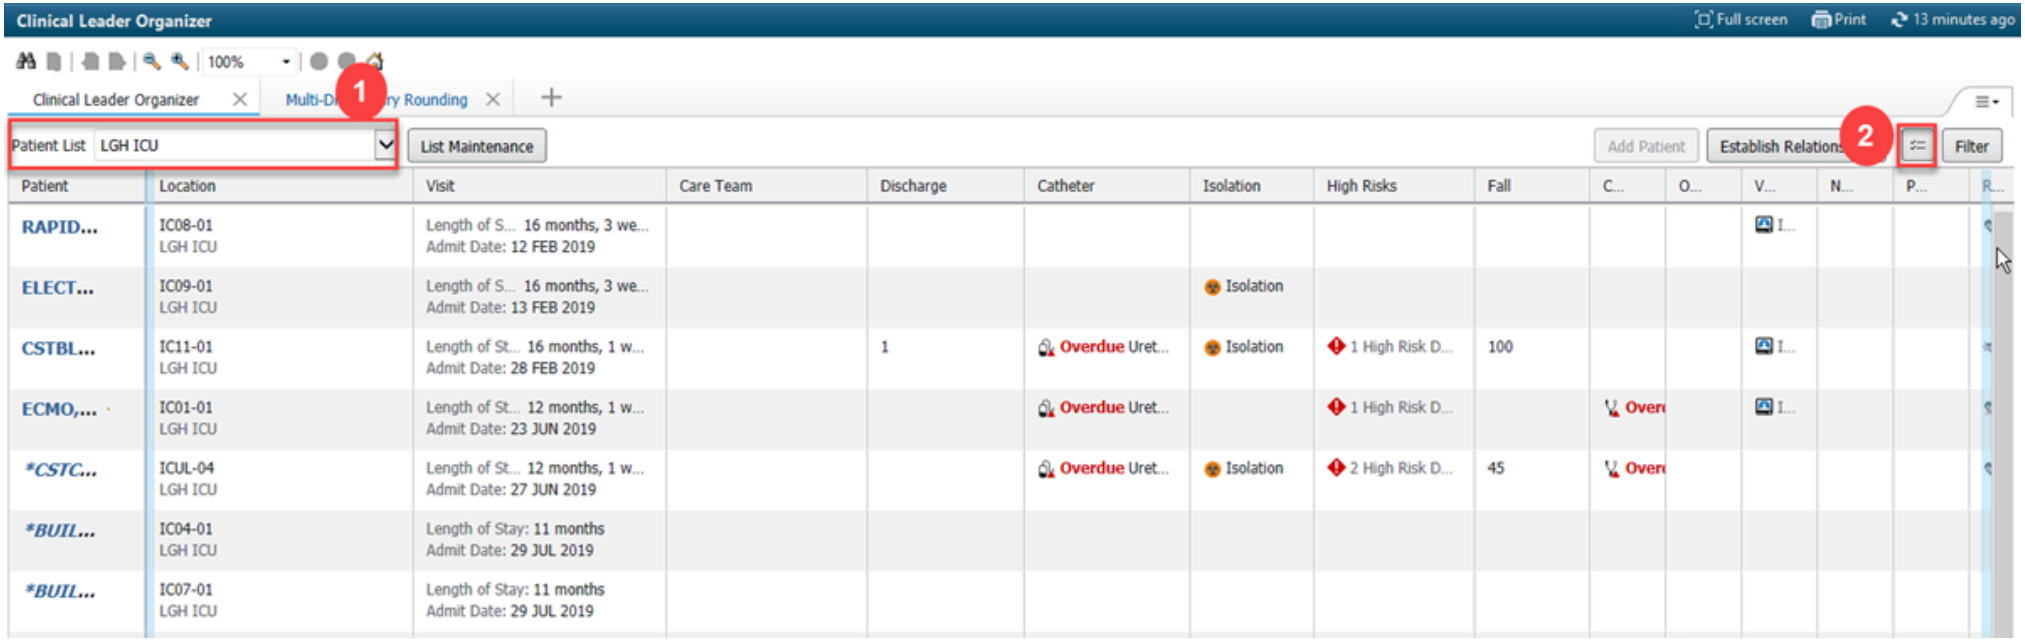
Add Patients to the Custom Patient List in Clinical Leader Organizer

You may manually add a patient from the selected **Location List** to your **Custom Patient List** in **Clinical Leader Organizer (CLO)**.

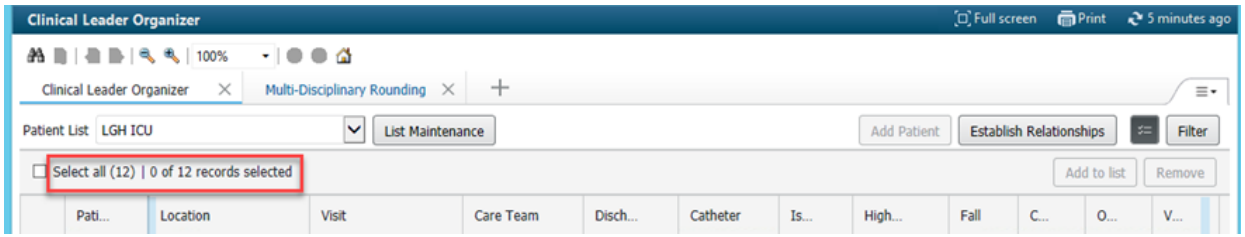
> **NOTE**: If no patient lists have been set up in CLO, click the **List Maintenance** button to create Location List and Custom Patient List

To add a patient from a **Location List** to your **Custom Patient List** in **CLO**:

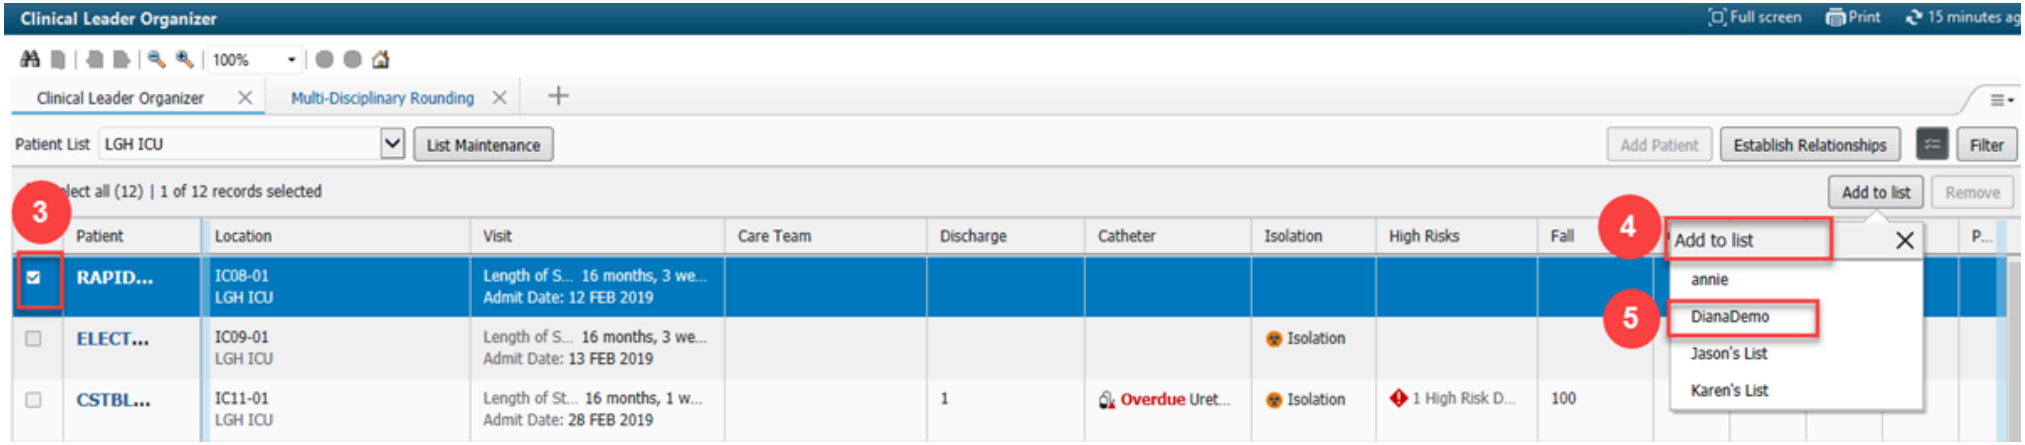
1. Select a **Location List** from the **Patient List** drop-down.
2. Click the **Select Rows** button.



NOTE: Clicking the **Select Rows** button also allows you to view the unit census.

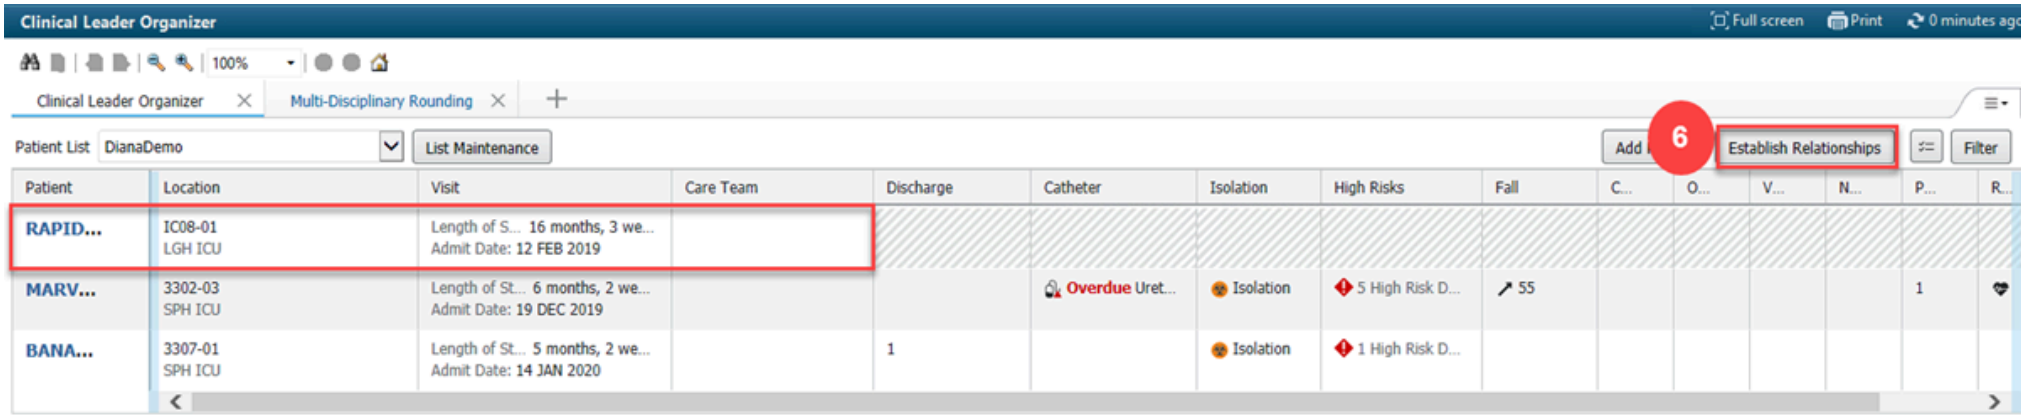


3. Put a checkmark in the tick box beside the selected patient that you want to add to your **Custom Patient List**.
4. Click **Add to list**.
5. Select your **Custom Patient List** from the drop-down.



The new patient is now added in your **Custom Patient List** within the **CLO**.

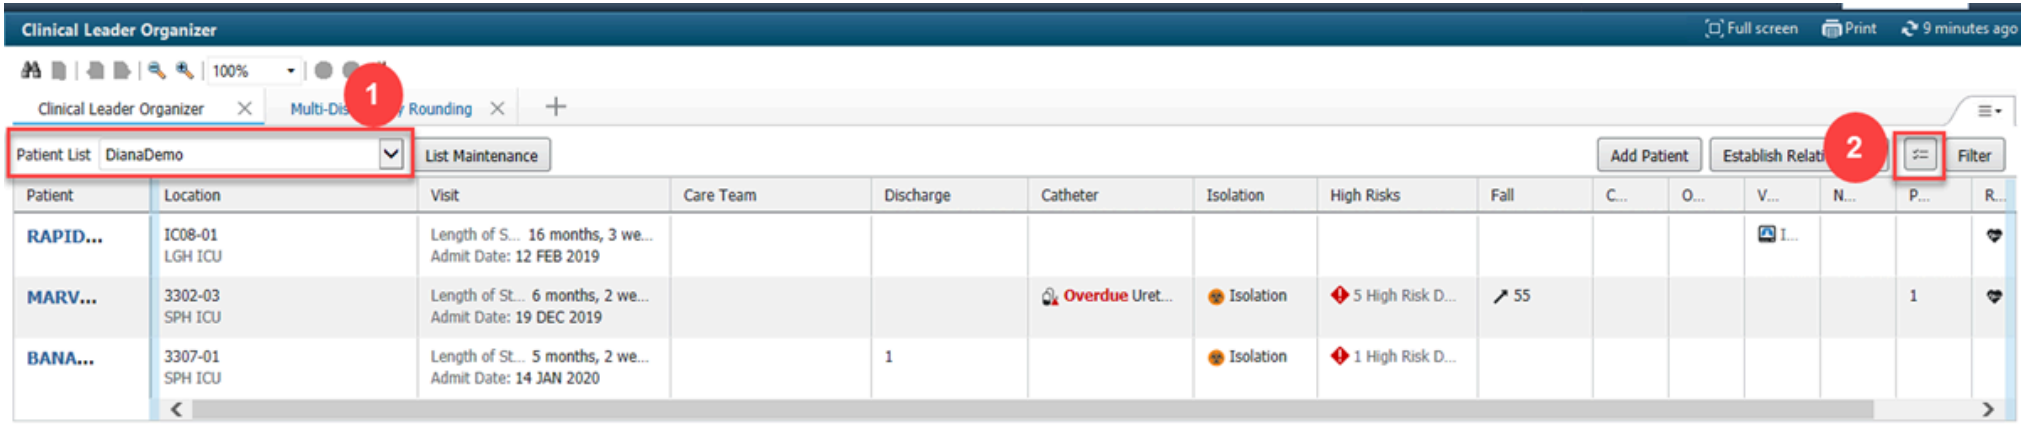
6. Click **Establish Relationships** to assign a relationship in order to review more information about the added patient in **CLO**.



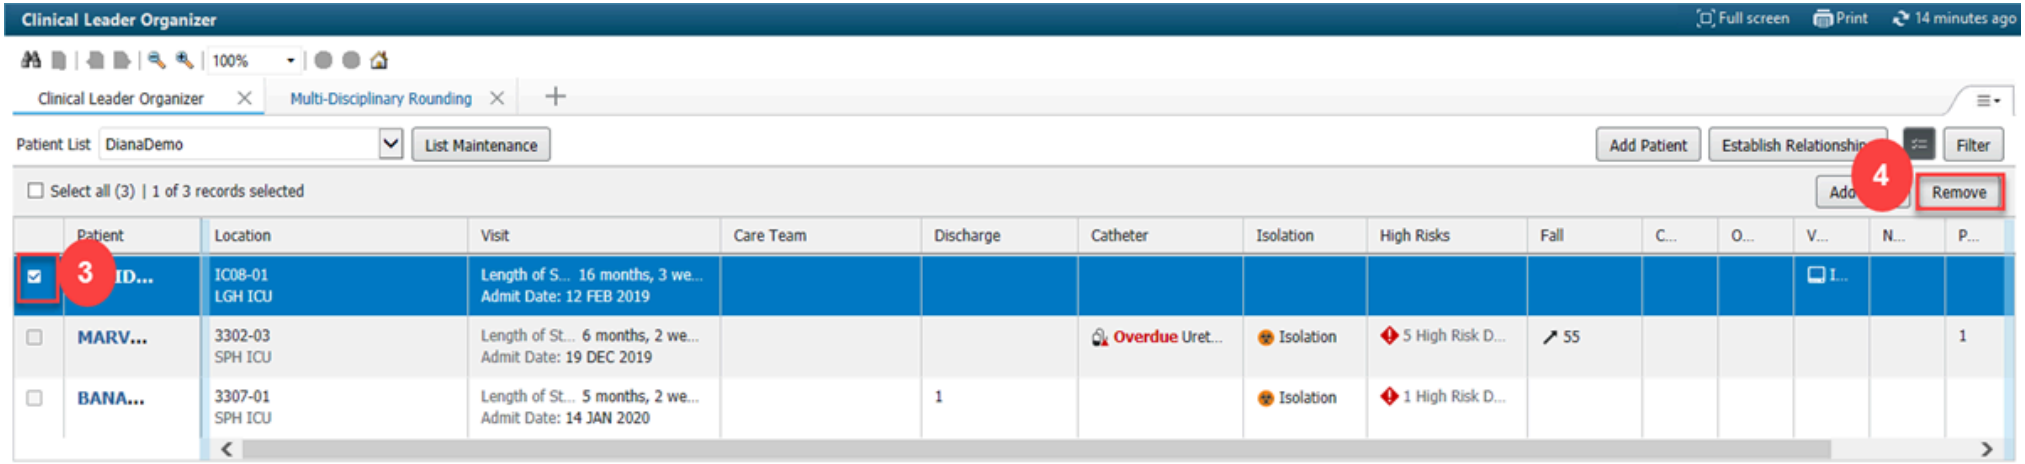
Remove Patient from the Custom Patient List in Clinical Leader Organizer

You may manually remove a patient from your **Custom Patient List** in **CLO**.

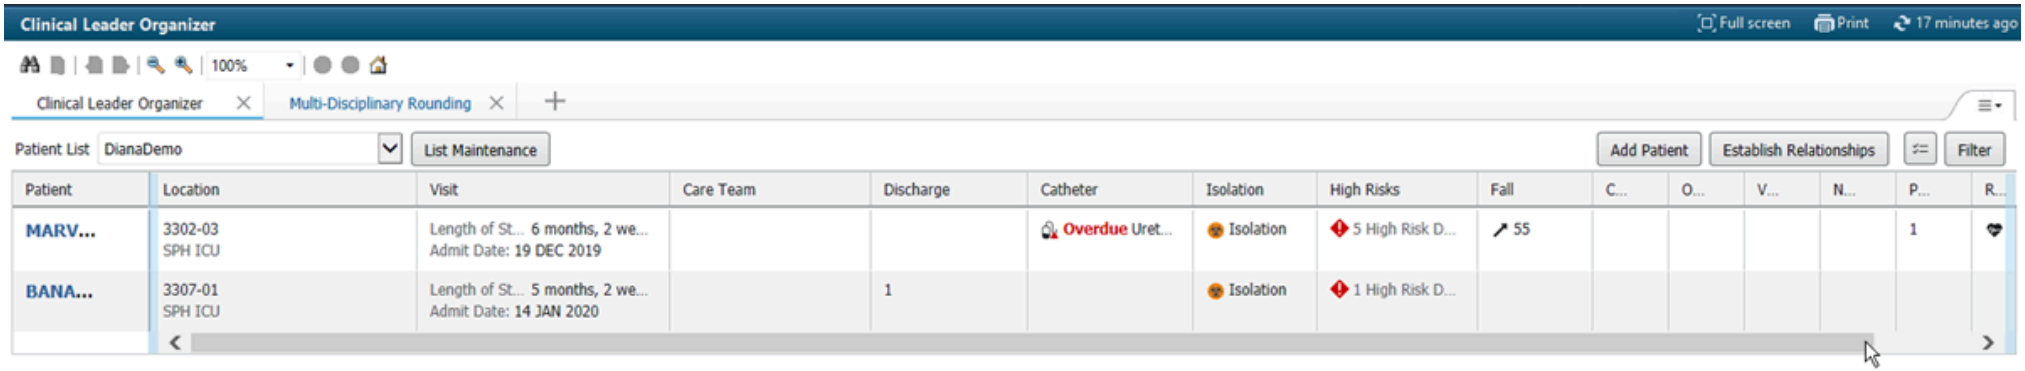
1. Select your **Custom Patient List** from the **Patient List** drop-down.
2. Click the **Select Rows** button.



3. Put a checkmark beside the tick box beside the selected patient that you want to remove.
4. Click **Remove**.



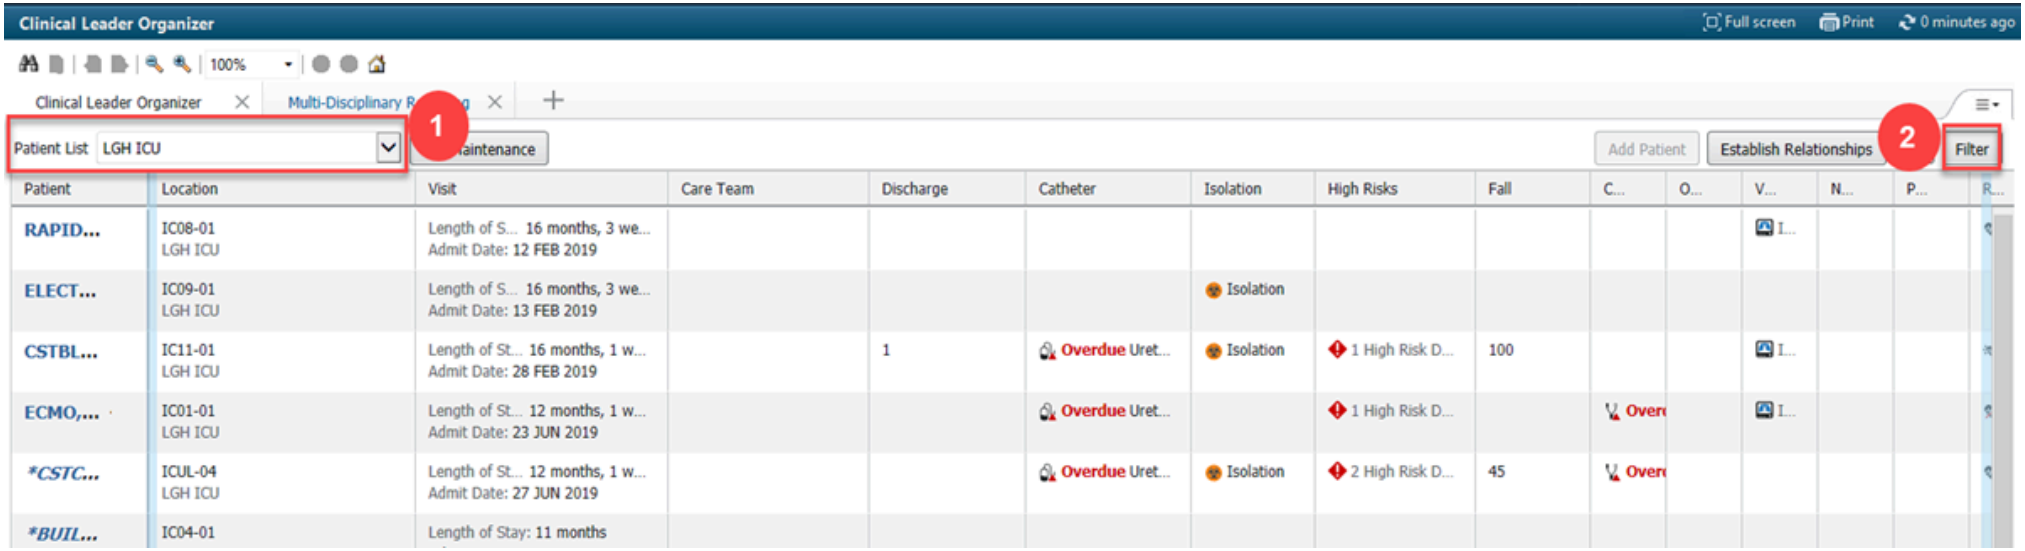
The selected patient is now removed from your **Custom Patient List** in **CLO**.



Filter Through Patients in Clinical Leader Organizer

You may quickly search a patient in a Location List or the Custom Patient List within **CLO** by using the Filter.

1. Select a patient list (e.g. Location List) from the **Patient List** drop-down.
2. Click **Filter.**

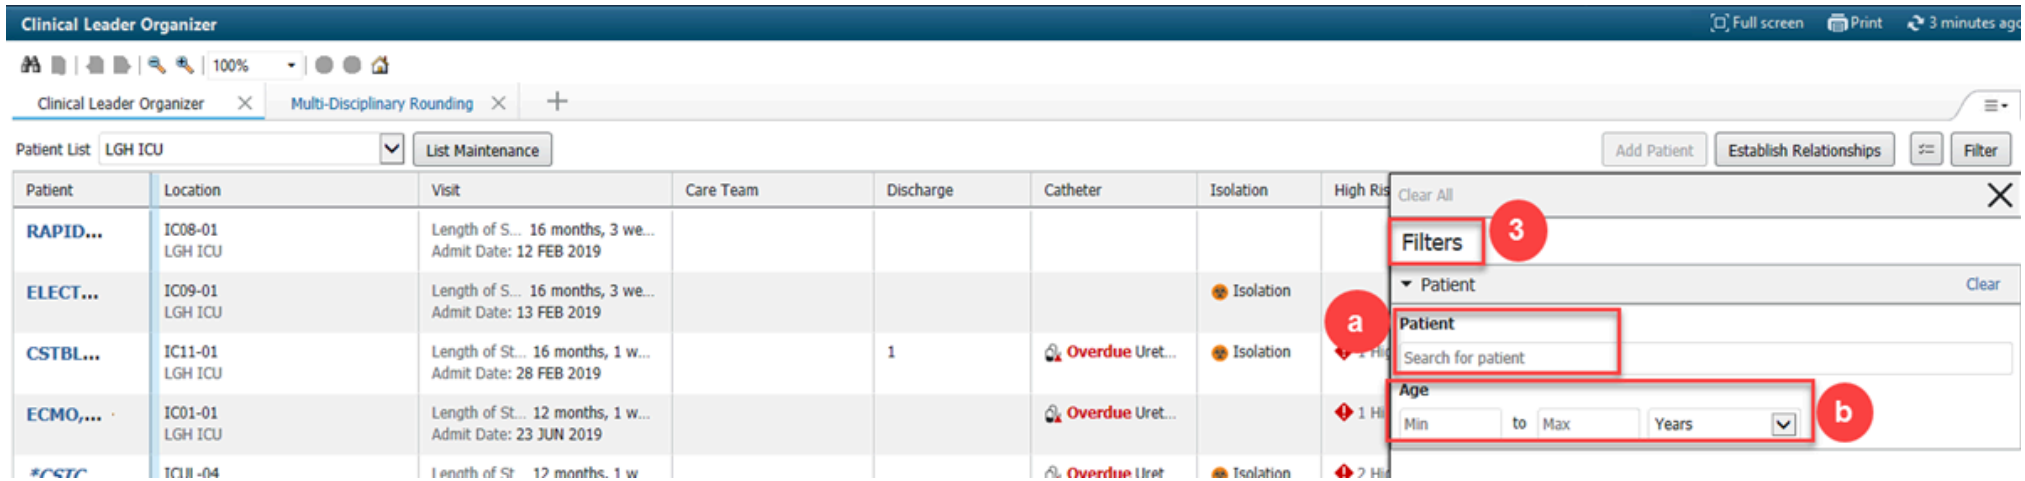


The **Filters** view pane opens from the right side of the **CLO**.

3. Search a patient by using one of the following options:

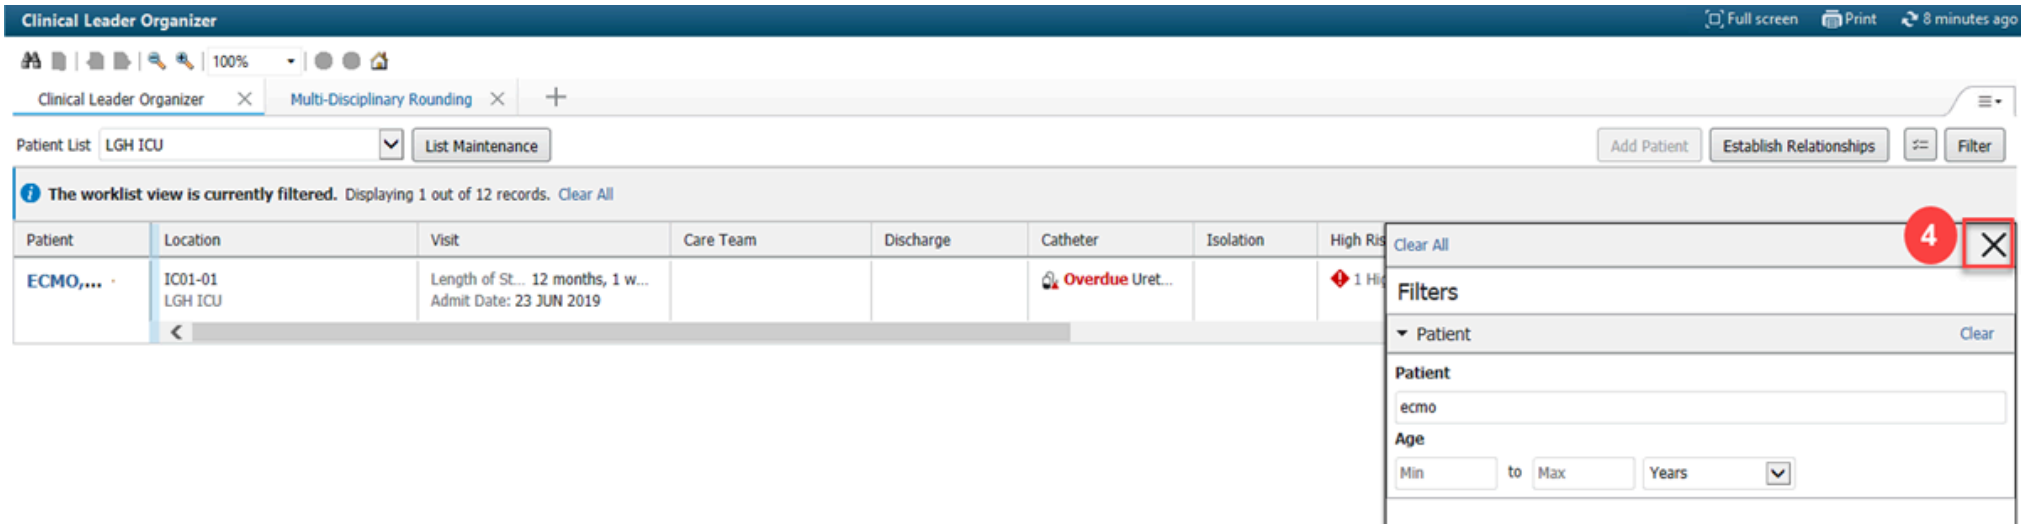
a. Type the key letters of the patient's last name or first name.

b. Enter the age range.



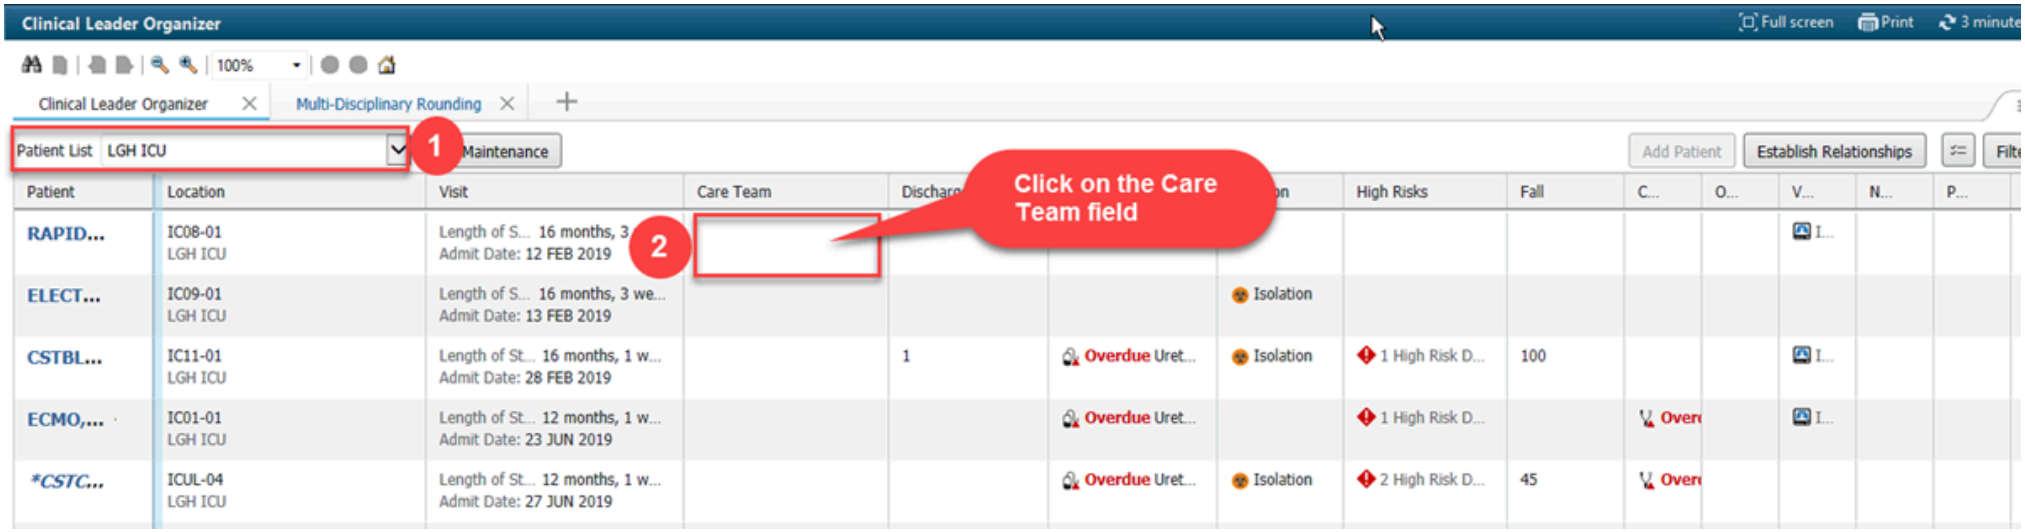
The patient(s) that you want to view displays in **CLO**.

4. Click **X** to close the **Filters** view pane.



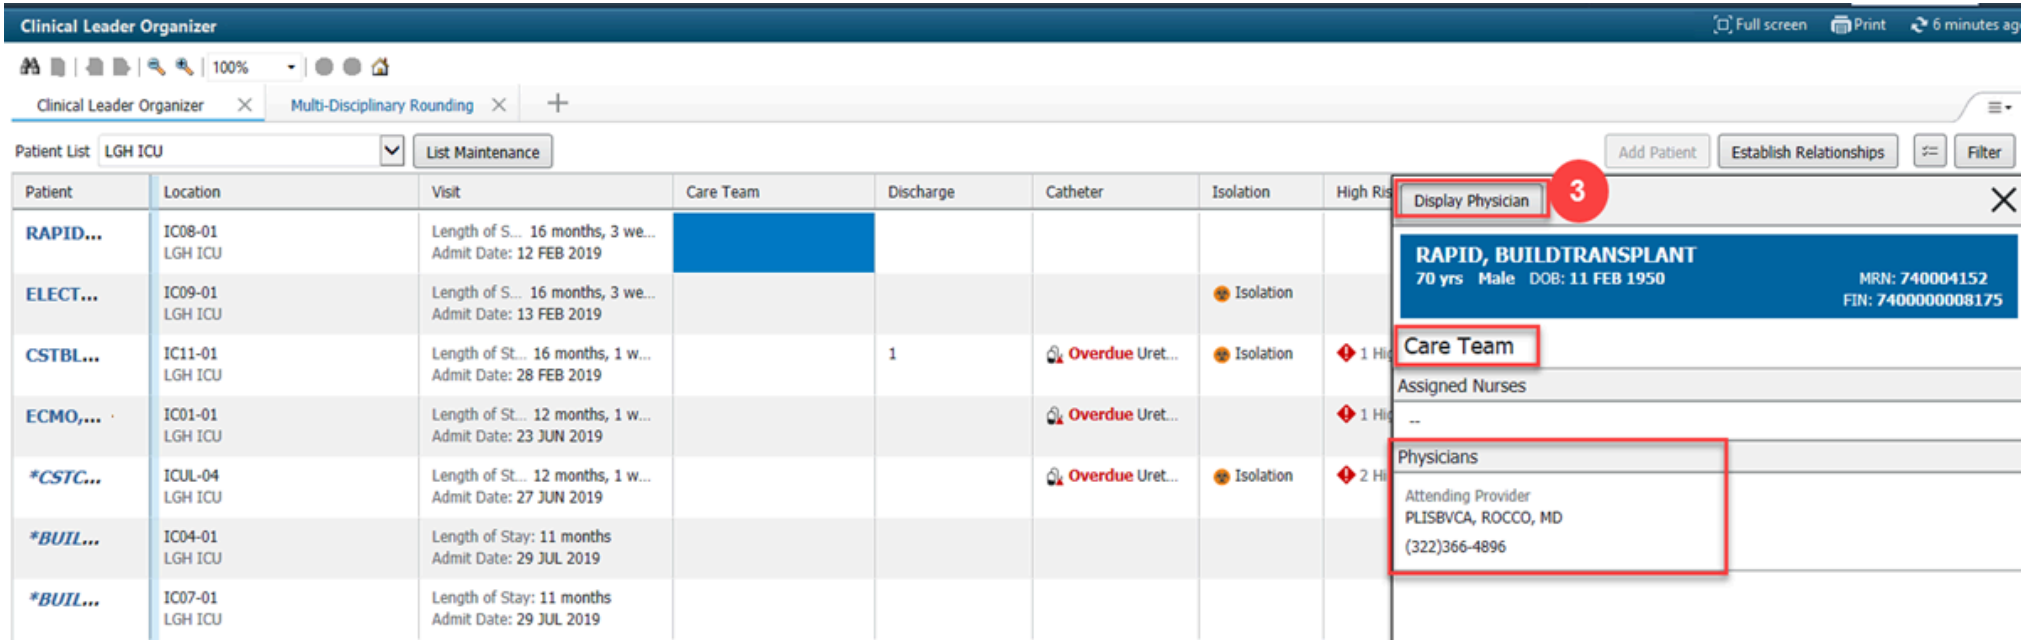
You may view Attending Providers' names and contact information in **CLO**.

1. Select a patient list (e.g. Location List) from the **Patient List** drop-down.
2. Click on the **Care Team** field.



The **Care Team** view pane opens from the right side of the **CLO**. The Attending Provider's name and contact information displays in this view pane.

3. Click **Display Physician**.



All the Attending Providers' names now populate within the **Care Team** column.

4. Click **X** to close the **Care Team** view pane.
