Clinical Leader Organizer (CLO) Overview

Clinical Leader Organizer (CLO) is an interactive organizer that supports communication and coordination across the continuum of care. It provides a high-level overview of patient data such as location, visit summary, risks and more - which can be used to help understand and manage patient care goals.

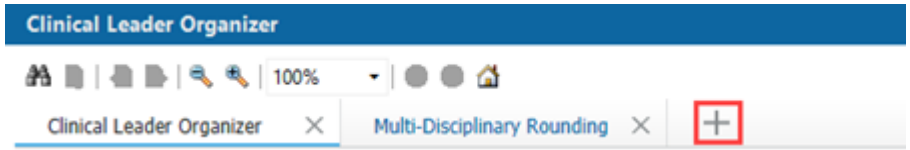
NOTES:

- End Users who are provisioned with Nurse Supervisor positions in CST Cerner land on the **CLO** page when logging into **PowerChart**.
- End Users who access other Nursing, Allied Health, or OB Clerk positions in CST Cerner can navigate to **CLO** by clicking the **Clinical Leader Organizer** Clinical Leader Organizer button on the toolbar.

below.

NOTES:

- Click the **Add** button to add the missing workflow tab in CLO.



- Hover over the column header to see the full title of the column.
- You may customize the indicator columns in each workflow tab of the CLO as needed. Please refer to the help topic - Customize Columns in Clinical Leader Organizer (CLO).
- When you access any workflow tabs in the CLO for the first time, you can only view patient's name, location, and visit information. To review more information, you need to establish relationship. Please refer to the help topic - Navigate to Clinical Leader Organizer (CLO).
- Double click the patient's name to access the chart from any workflow tabs of the CLO.

REMINDERS:

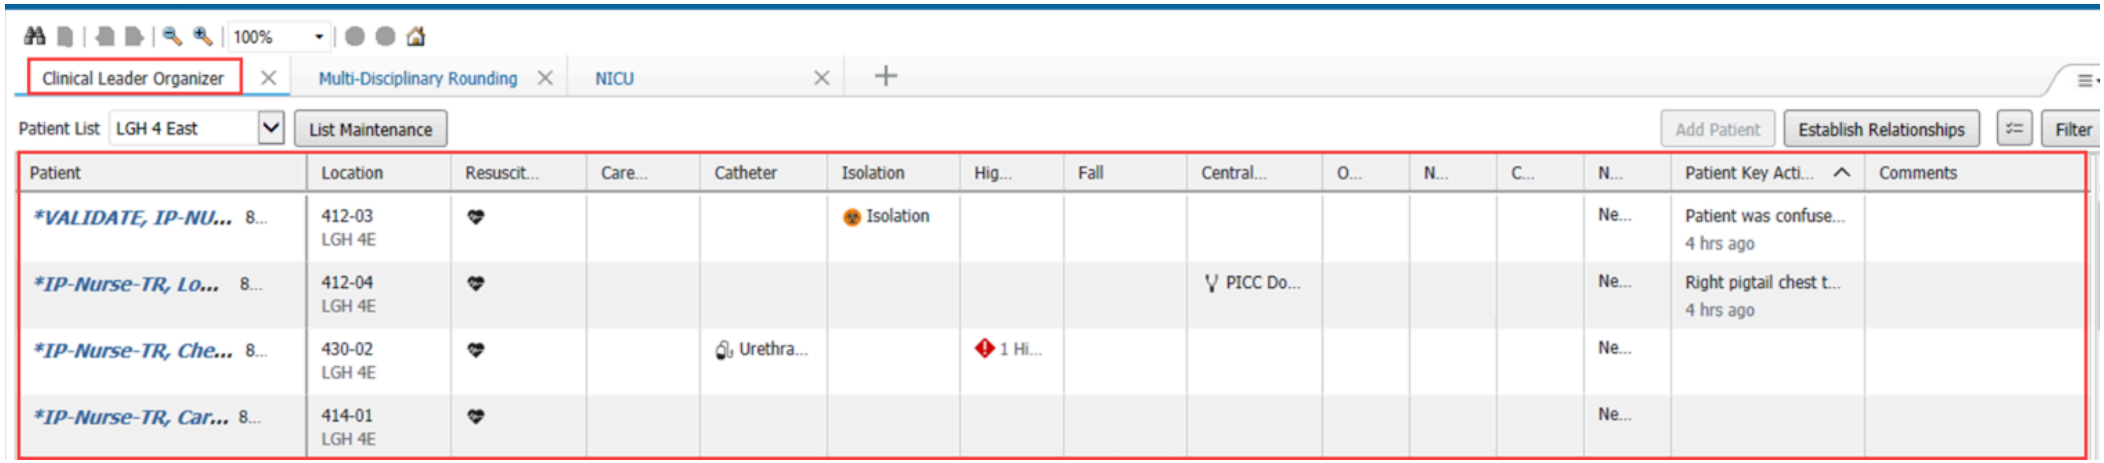
- Set up **Location Patient List**, **Custom Patient List**, or **Care Team List** so that you can select a patient list type or a Care Team in a workflow tab of the CLO to display a list of patients.
- Refresh the screen to review updated information in CLO.

Overview of the Clinical Leader Organizer Tab

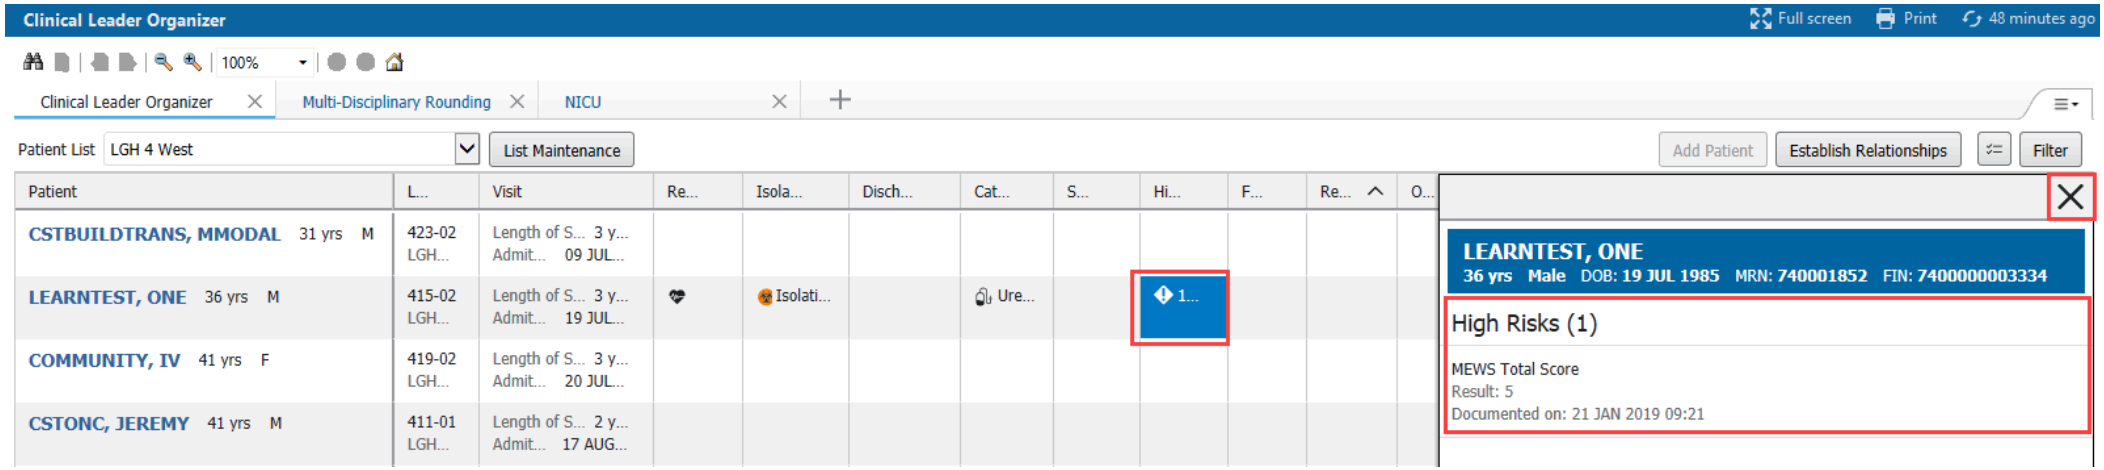
Select the **Clinical Leader Organizer (CLO)** tab to review a snapshot of the patient status and key information that supports care planning. This information can be used at shift handover and during rounds. The data that can be reviewed in the CLO tab includes:

Click here to see this page in full context

- Patient's basic demographic information
- Patient's location
- Discharge – active orders
- High risks alerts – from iView documentation and active orders
- Isolation – active order
- Restraint information – active order and iView documentation
- Resuscitation – active order
- Pending transfer – active Bed Transfer Request order
- Diet – active order
- Falls – Morse Fall Risk Score or Humpy Dumpy Fall Scale Score documented in iView
- Suicide precautions – active Suicide Precautions (suicide risk) order
- New lab and diagnostic results – provides a link to access Results Review
- Patient Contact – facilitates nursing workflow by allowing HaH nursing staff to, at a glance determine the location of each of their patients and plan visits accordingly
- Skin integrity – Braden Scores pulled from iView documentation
- Ventilator – active orders (e.g. Invasive Ventiliation)
- Airway information –pulled from iView documentation
- Telemetry – active order
- Central line – pulled from iView documentation
- Urinary catheter pulled from iView documentation
- Visit information - length of stay and admit date information is pulled from registration whereas anticipated discharge date is pulled from Discharge Assessment and Care Coordination PowerForms
- Care team – from Care Team component
- Non-invasive ventilation – active orders (e.g. CPAP, BIPAP, etc.)
- Oxygen therapy – active order and iView documentation on Oxygen Therapy activity
- COVID – pulled from COVID-19 Screening PowerForm
- Patient Key Activities – pulled from documentation in the Handoff/Shift Report iView section

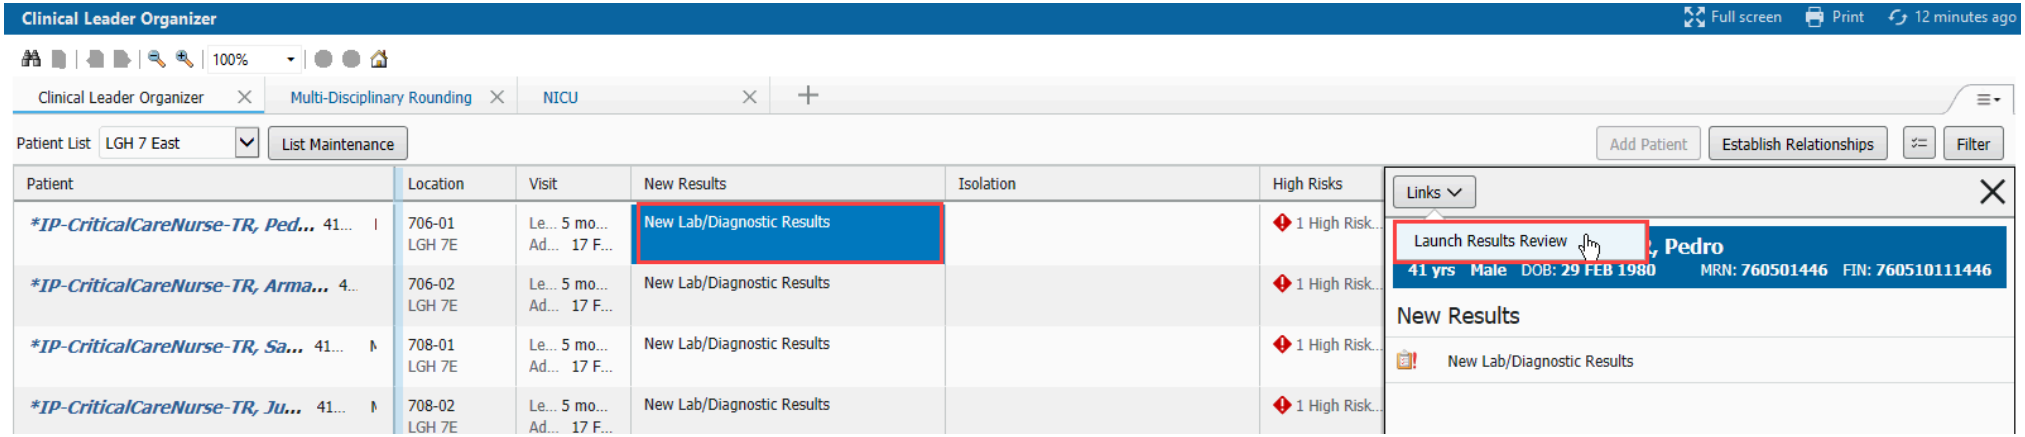


To review detailed information, click the icon, the number, or the text within the field of the indicator column. The detailed information displays in the split window that slides from the right side of the screen. Click **X** to close the split window after review.



Please note that new lab and diagnostic results do not display in the **CLO** tab. To review these results:

1. Click on the text **New Lab/Diagnostic Results** in the **New Results** column to open the split window.
2. Click **Launch Results Review** from the **Link** drop-down. This will forward you to **Results Review** where you can locate the new results.



Overview of the Multi-Disciplinary Rounding Tab

Select the **Multi-Disciplinary Rounding** tab to have a high-level overview of patient data pertaining to interdisciplinary rounding and discharge planning. This tab is similar to the CLO tab. The only difference between them is that the **CLO** tab focuses on the patient's clinical status whereas the **Multi-Disciplinary Rounding** tab focuses on the patient's discharge readiness.

The table below describes the information that can be reviewed in each indicator column under the **Multi-Disciplinary Rounding** tab:

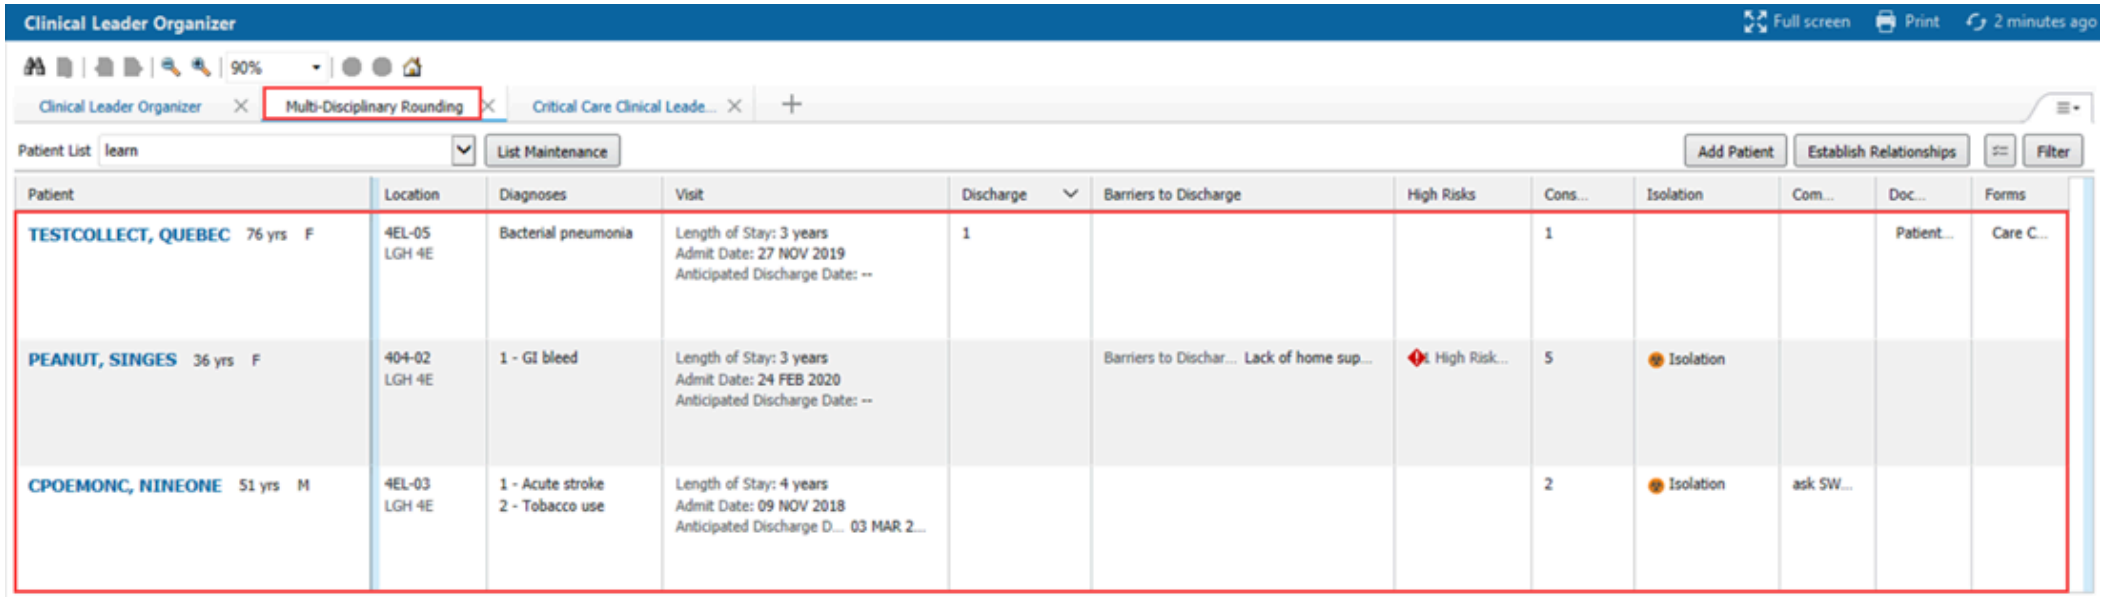
- Patient column – displays patient's basic demographic information including name, age and gender
- Location column – this information is pulled from registration
- Diagnoses column – pulls in diagnoses documented in the **Active Issues** component
- Visit column – pulls in length of stay and admit date information from the registration whereas anticipated discharge date is pulled from **Discharge Assessment** or **Care Coordination** PowerForm
- Discharge column – pulls in active discharge orders
- Barriers to Discharge column – pulls in documented information from **Discharge Assessment** or **Care Coordination** PowerForm
- High Risks column – displays a **High Risk** icon to indicate that iView documentation has
- Consults column – pulls in active consult and following orders

CST Cerner Learn

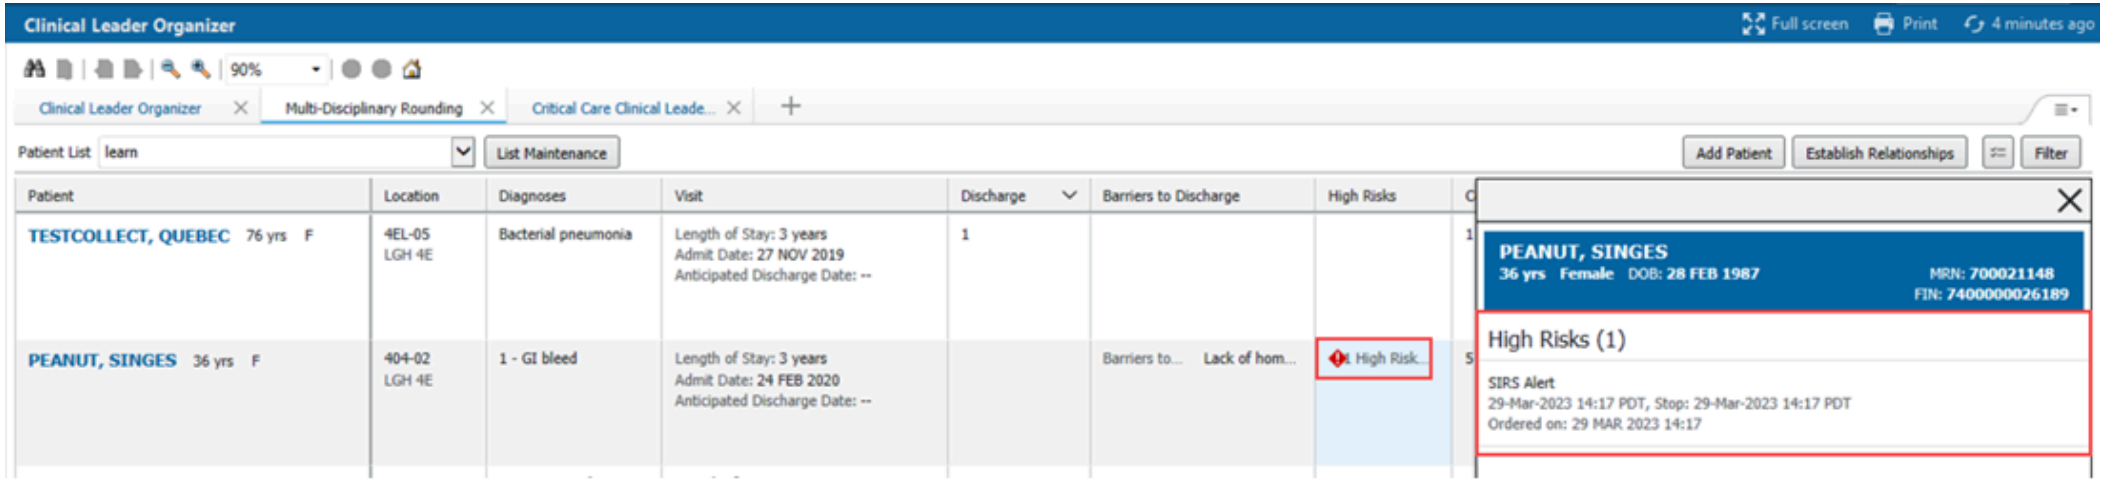
Click here to see this page in full context

met the early warning system alert criteria (e.g. Sepsis alert) or an active order has met the high risk alert criteria (e.g. Restraints order)

- Isolation column – displays the isolation icon to indicate that the active patient isolation order(s) have been placed automatically by the system or manually by the clinicians
- Documentation column
  - Provide access to the completed notes (e.g. **Patient Discharge Handout** and **Interdisciplinary Rounding Summary**) done by the providers and clinicians for review.
  - Provide access to the **Interdisciplinary Rounding Summary Note Type** for documentation from the **Handover** drop-down.
  - Provide direct access to the patient chart by clicking the **Open Chart** hyperlink.
- Comments column – displays comments added by the clinicians
- Forms column
  - Provide access to the **Care Coordination** PowerForm completed by the clinicians for review.
  - Provide access to the new **Care Coordination** PowerForm from the **Create** drop-down.
  - Provide direct access to **Form Browser** by clicking the **Open Form** Browser hyperlink.

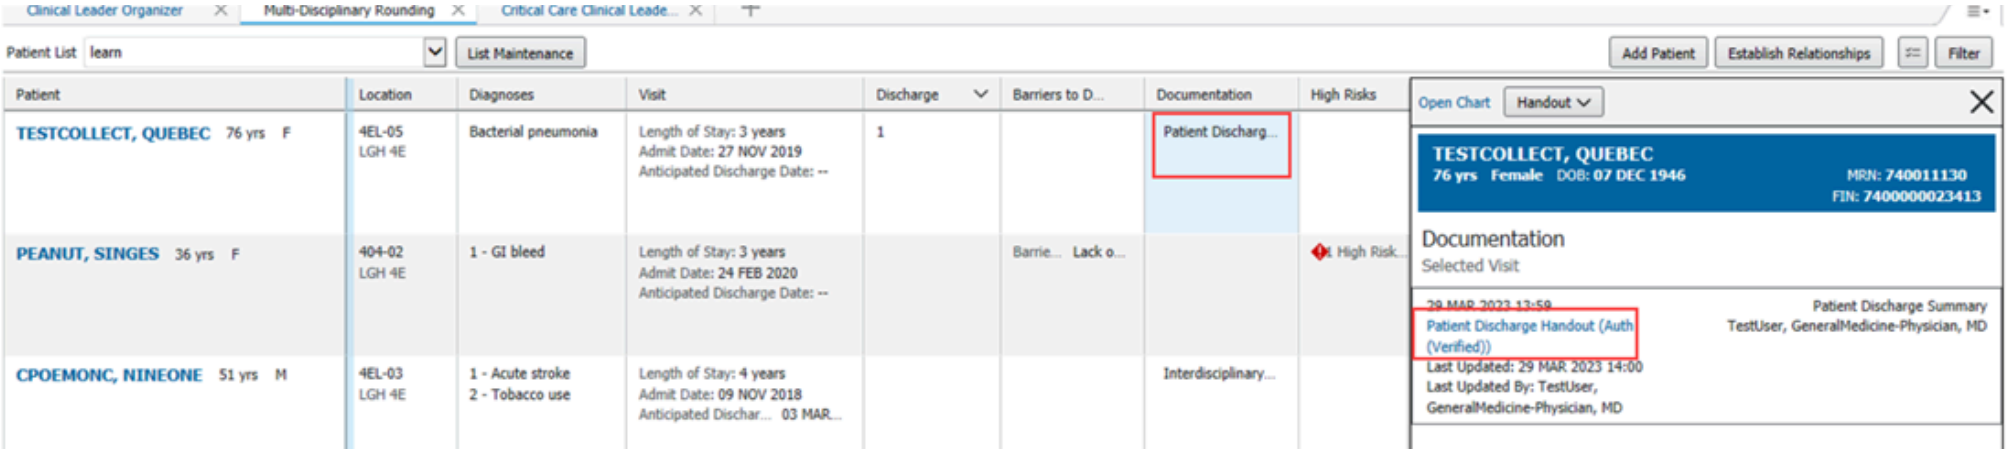


window.

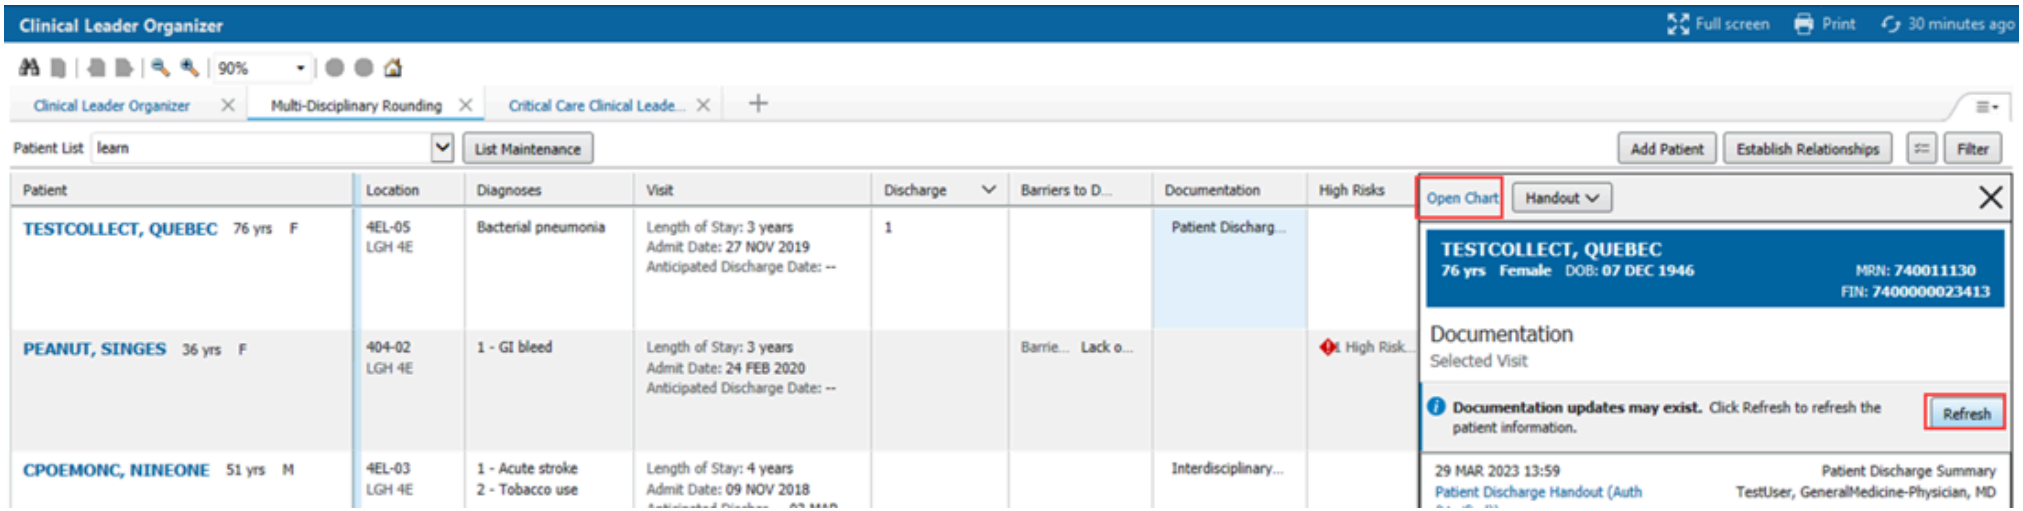


Review completed **Patient Discharge Handout** and **Interdisciplinary Rounding Summary Note** in the **Documentation** column.

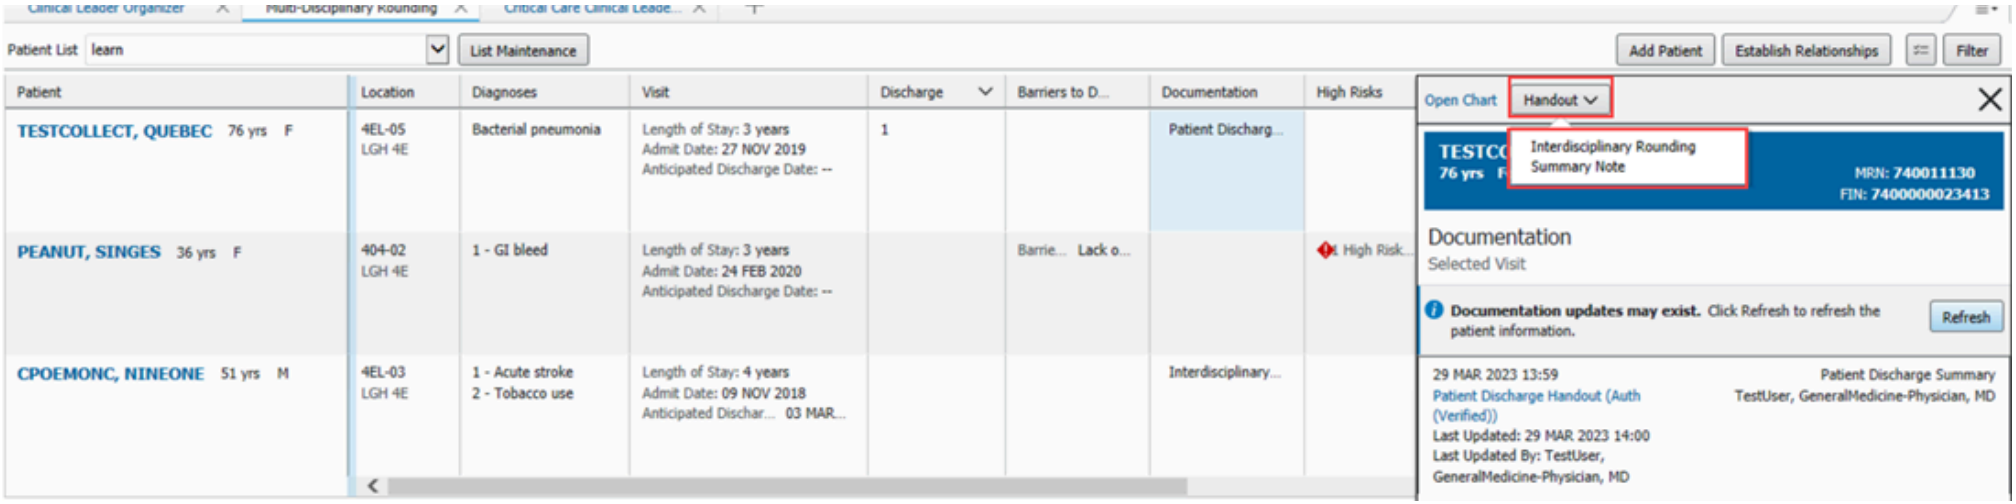
1. Select a patient and click in the field of the **Documentation** column to open the split window.
2. Click the blue hyperlink of the completed **Patient Discharge Handout** or I**nterdisciplinary Rounding Summary** to open the full note for review.



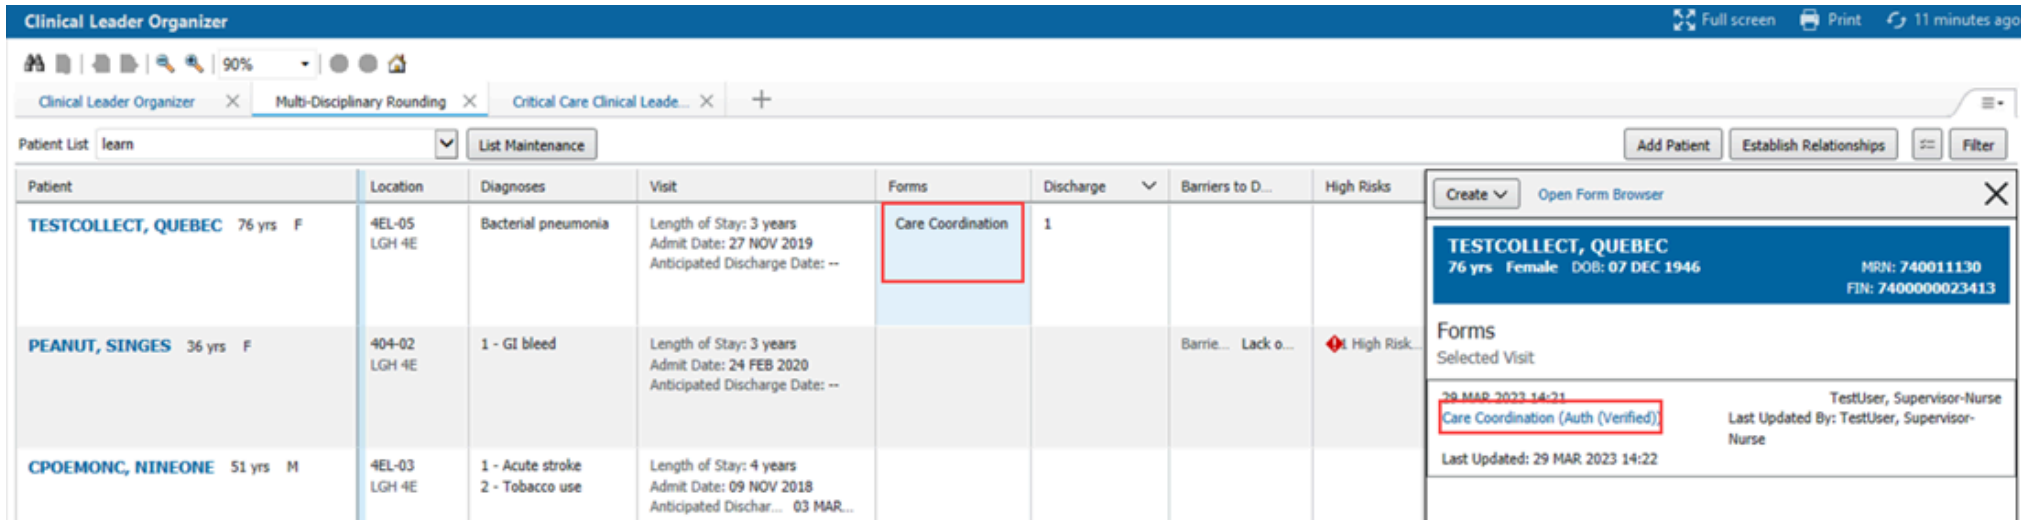
3. Click the **Refresh** button to update the list of documents displayed in the split window.
4. Click the **Open Chart** hyperlink to direct you to the patient chart if needed.

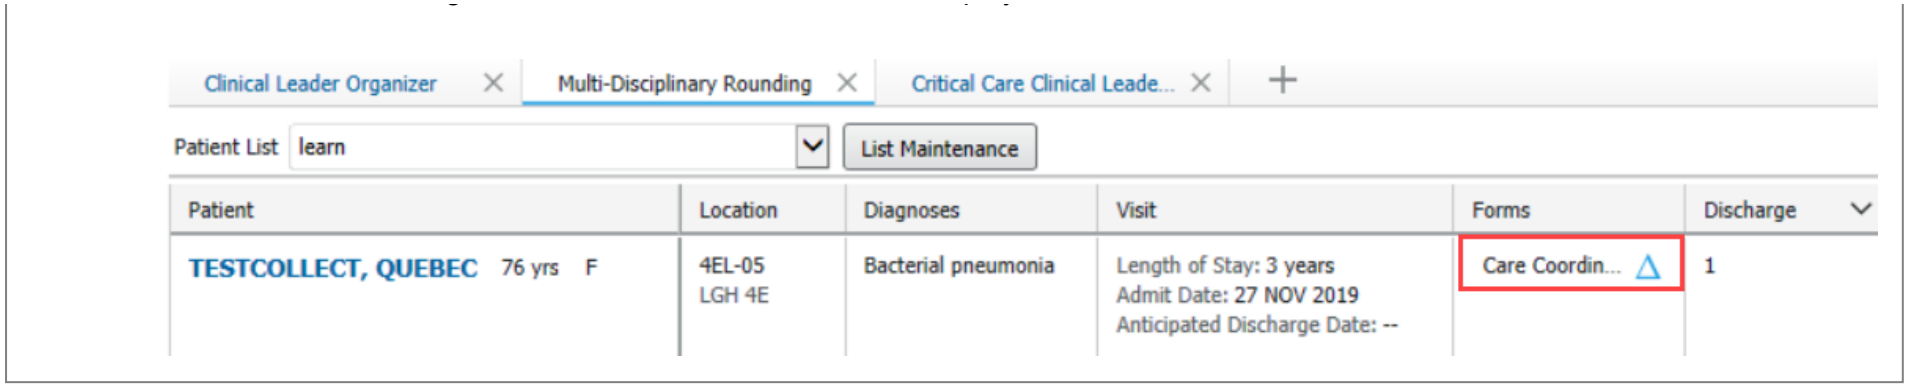


5. If you need to document on a new **Interdisciplinary Rounding Summary** note, select **Interdisciplinary Rounding Summary Note** from the **Handout** drop-down to open the free text note template for documentation.

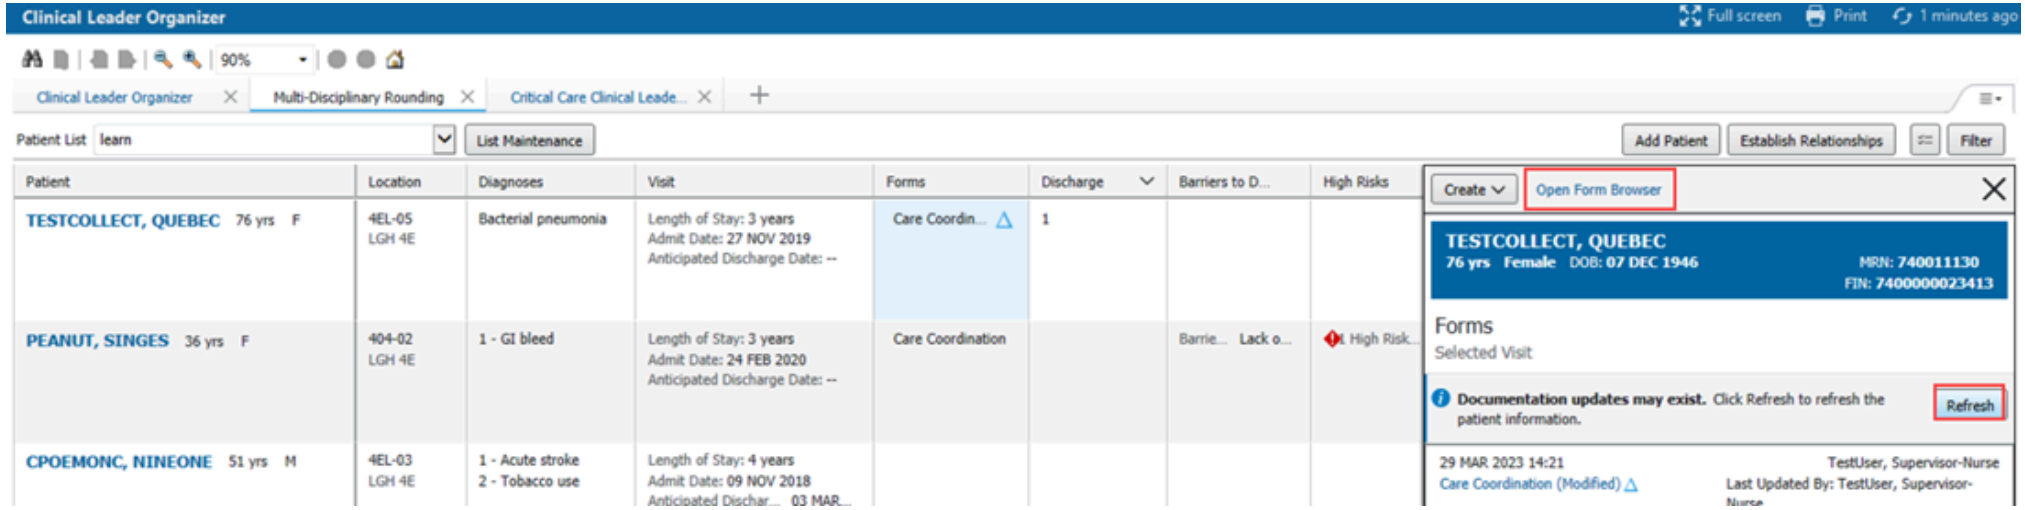


6. Review completed **Care Coordination** PowerForm and access a new PowerForm for documentation in the **Forms** column.
7. Select a patient and click in the field of the **Forms** column to open the split window.
8. Click the blue **Care Coordination** PowerForm hyperlink to open the previously documented PowerForm for review.
   - The previously documented information is pre-populated in the **Care Coordination** PowerForm.

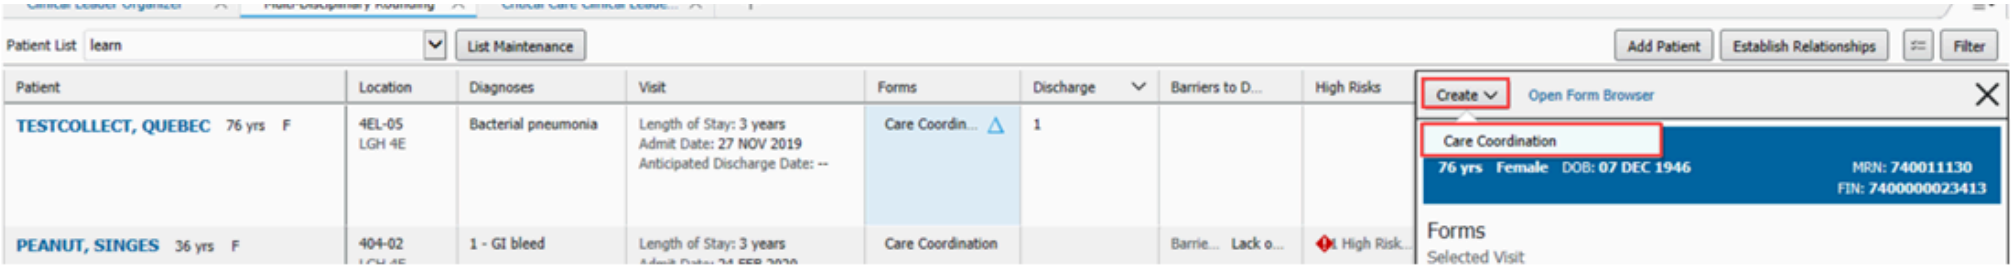




9. Click the **Refresh** button to update the list of completed **Care Coordination** PowerForms displayed in the split window.
10. Click the **Open Form Browser** hyperlink to direct you to **Form Browser** in the patient chart.

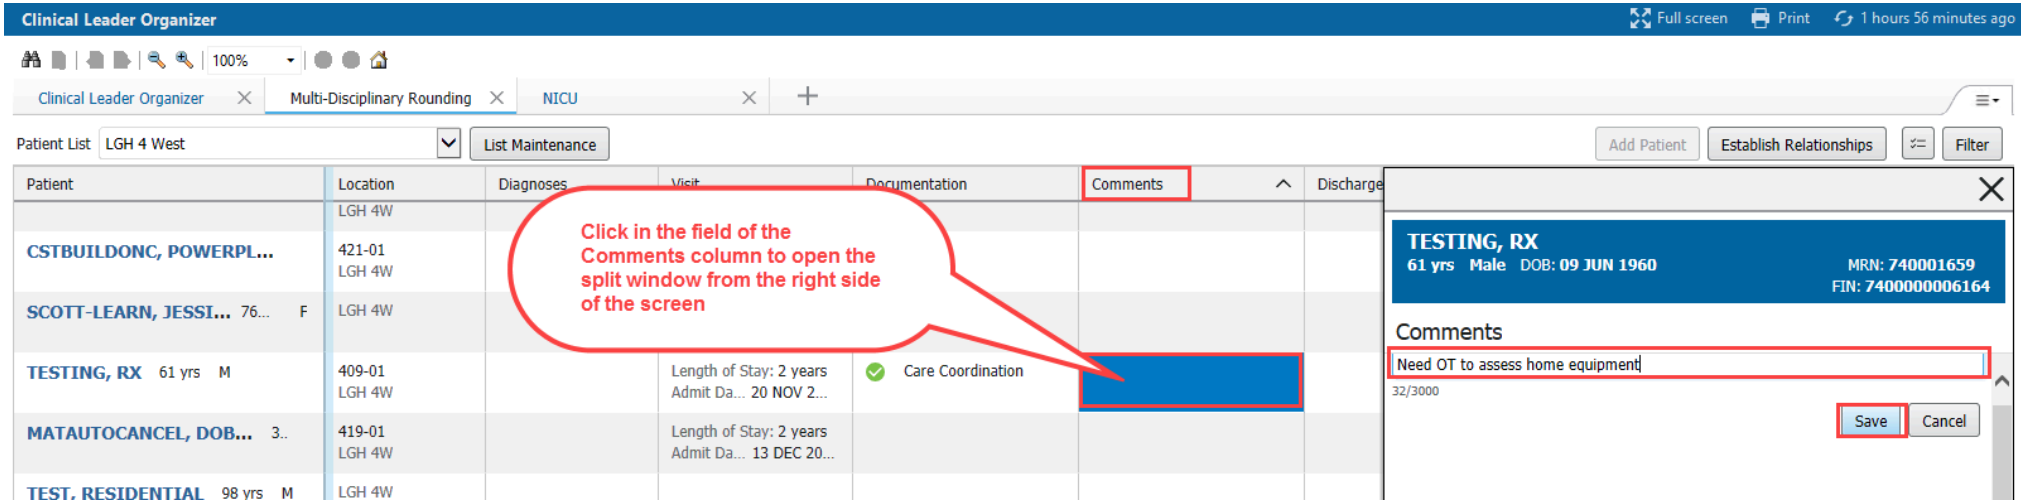


11. If you need to document on a new **Care Coordination** PowerForm, select **Care Coordination** from the **Create** drop-down.



The **Comments** column allows you to add a comment.

12. Select a patient and click in the field of the **Comments** column.
13. Type a comment related to patient care in the free text field and click **Save**.



14. Click the drop-down arrow to select **Edit** or **Delete** if you want to modify the existing comment or remove it from the **Comments** column.

NOTE: For further details about Multi-Disciplinary Rounding function, please refer to the help topic: Interdisciplinary Rounding in Clinical Leader Organizer (CLO).

Overview of the NICU Tab

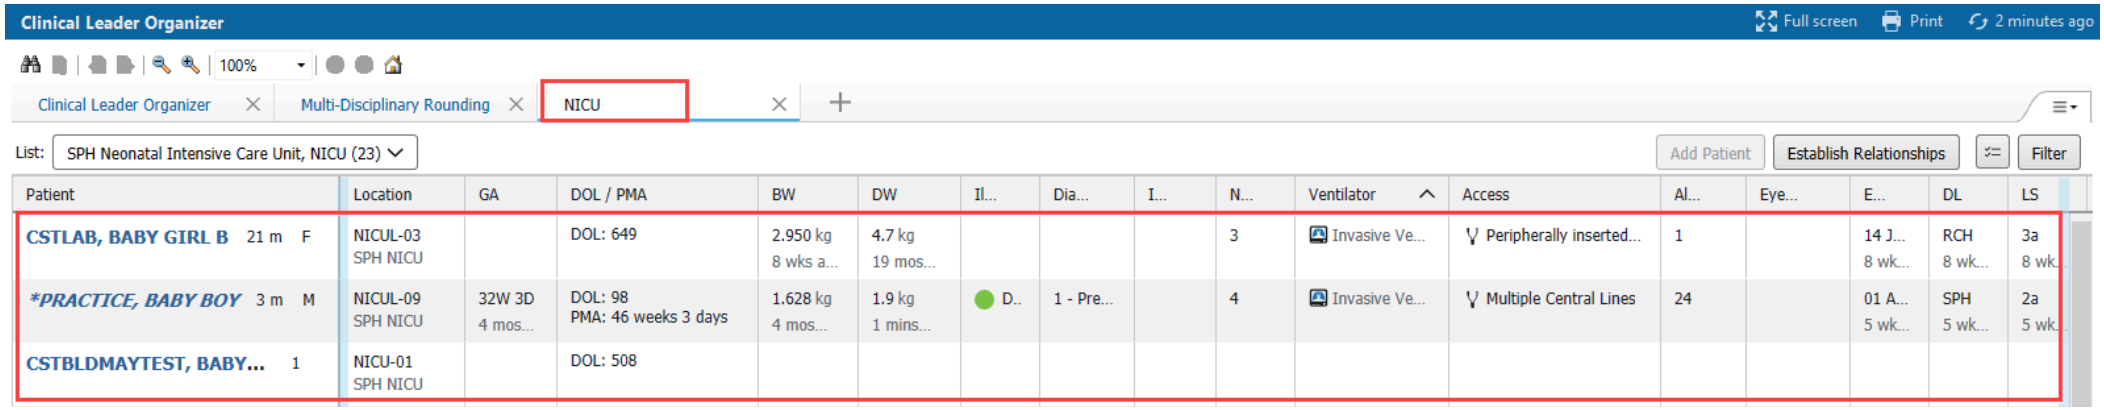
The **NICU** tab is able to populate a list of patients via a **Patient List** or a **Care Team** List

The **NICU** tab pulls in newborn specific information from various parts of the chart, including specific active orders, recent iView documentation, completed PowerForms, and the provider's I-PASS pane (a handoff tool for providers). The information that can be reviewed in the **NICU** tab includes:

- Patient's basic demographic information
- Gestational Age (GA) – from NICU Admission History PowerForm
- Birth Weight (BW) – from NICU Admission History PowerForm
- Illness Severity – pulled from I-PASS
- Patient's current location
- Days of Life (DOL) & Post Menstrual Age (PMA) – from Neonate Overview component
- Dosing Weight (DW) – from iView
- Diagnoses – from Active Issues componen

Click here to see this page in full context

- Isolation – active order(s)
- Ventilator – active orders (e.g. Invasive Ventilation, HFOV, HFJV, etc.)
- Allied Health – active allied health consult and following orders
- Estimated Date of Discharge (EDD) – pulled from Newborn Discharge Information, Discharge Planning Assessment, or Care Coordination PowerForm
- Level of Service (LS) – documented iView field, Neonatal Daily Classification
- TPN – pulled in active TPN and lipid emulsion orders
- Non-invasive ventilation – active orders (e.g. Oxygen Therapy, CPAP, NIPPV, etc.)
- Access – documented Central Line iView information
- Eye Exam - active order(s)
- Discharge Location (DL) – pulled from Newborn Discharge Information, Discharge Planning Assessment, or Care Coordination PowerForm
- Comments



1. Click the icon, the number, or the text in the field of the indicator column to review detailed information within the split window.

Overview of the Critical Care Clinical Leader Organizer Tab

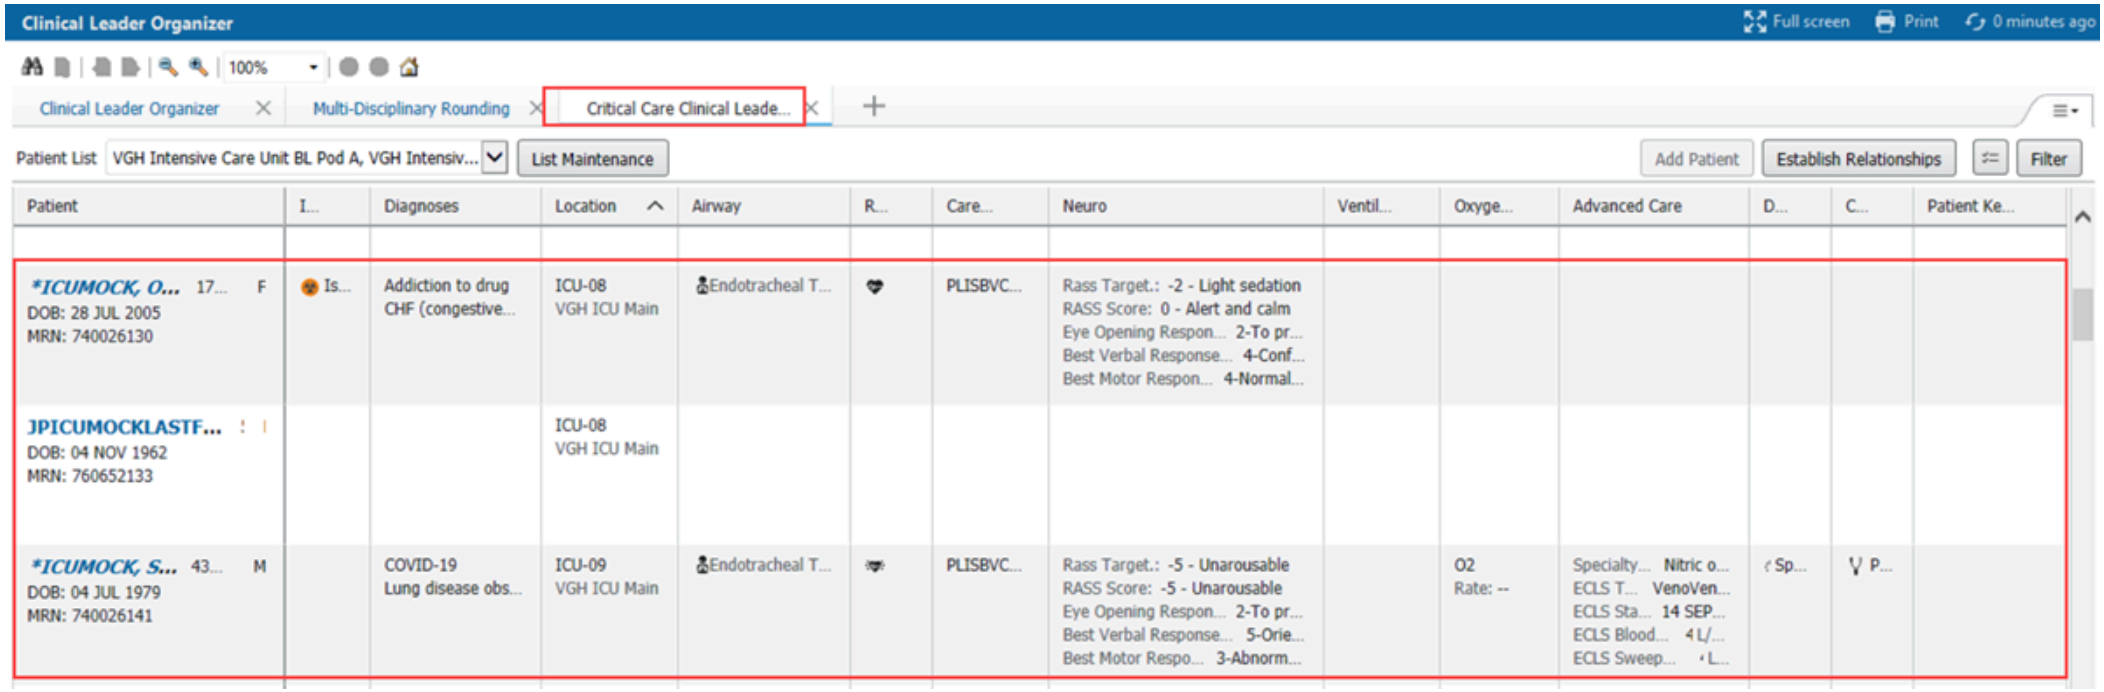
Select the **Critical Care Clinical Leader Organizer** tab to review a snapshot of patient status and key information that supports care planning. This information can be used in rounding and charge nurse handover in the Critical Care/High Acuity settings. The data that can be reviewed in the **Critical Care Clinical Leader Organizer** tab includes:

- Patient basic demographic infomation
- Patient's location
- Illness severity – pulled from I-PASS
- Diet – active order
- Visit information - length of stay and admit date information is pulled from registration whereas anticipated discharge date is pulled from Discharge Assessment and Care Coordination PowerForms
- Catheter – pulls in documented iView information on urinary catheter insertion date. Displayed information will be removed when the discontinuation of urinary catheter is documented.
- Consult Orders – active order
- Central Line – pulled from iView documentation regarding insertion date
- Advanced Care – pulled in iView documentation regarding invasive ventilator mode, set respiratory rate, set tidal volume, positive end expiratory pressure (PEEP), Pressure Support, Pressure Control, SpO2, End Tidal CO2, Set O2% (FiO2), specialty gas settings, ECLS (e.g. type, start date/time), and CRRT (e.g. treatment day number, treatment type and net fluid balance goal)
- Oxygen Therapy – active order and iView documentation on Oxygen Therapy activities
- Airway – pulled from iView documentation
- Ventilator – active orders for invasive ventilation

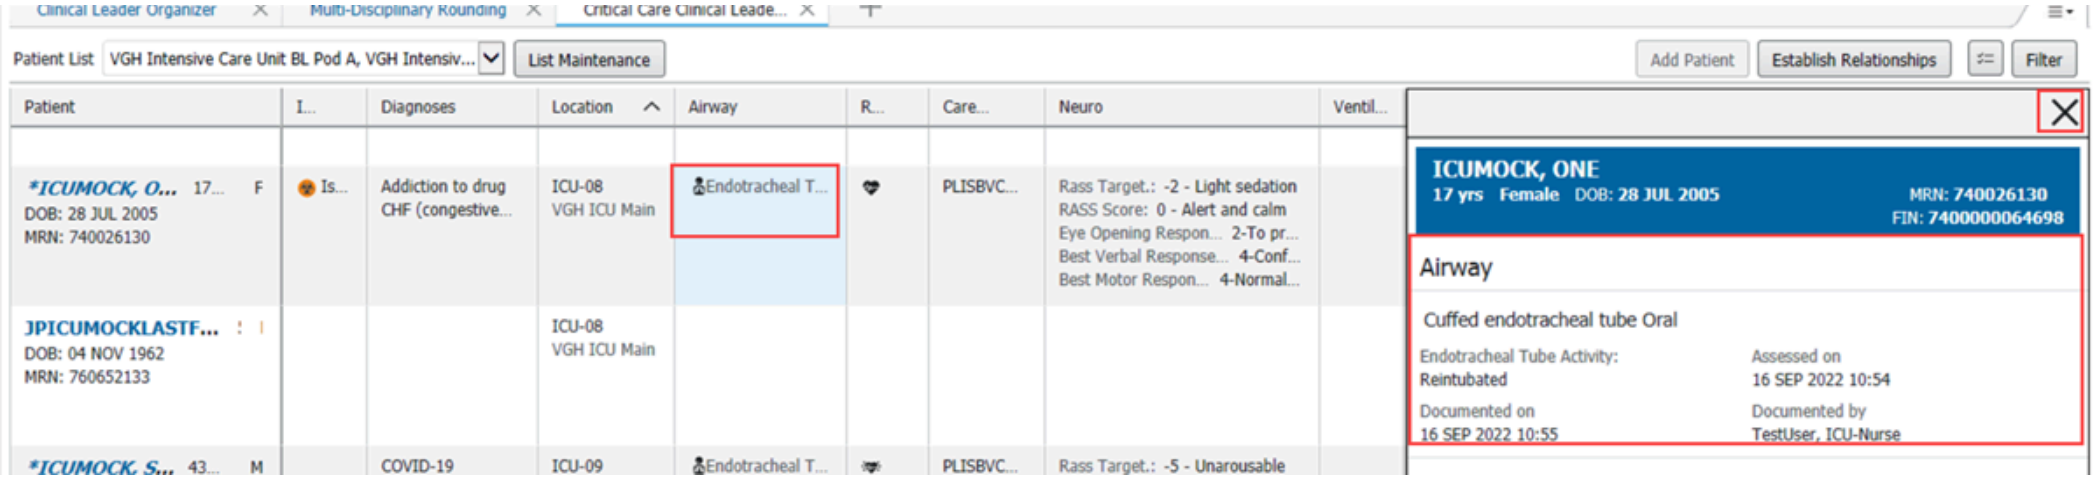
CST Cerner Help

Click here to see this page in full context

- Isolation – active order(s)
- Diagnosis – from Active Issues component
- Neuro – pulled from iView documentation regarding neurological assessment, sedation scales, pain assessment, neuro drain care, and EEG type.
- Care Team – pulled from Care Team component
- Resuscitation – active Code Status order
- Patient Key Activities – pulled from iView documentation in the Handoff/Shift Report section
- Chief Complaint – pulls in chief complaint information documented by the provider
- Microbiology – pulls in negative or positive microbiology result. To view Microbiology full detailed results, click on the **Open Microbiology Cultures** hyperlink to direct you to **Results Review**.
- Comments

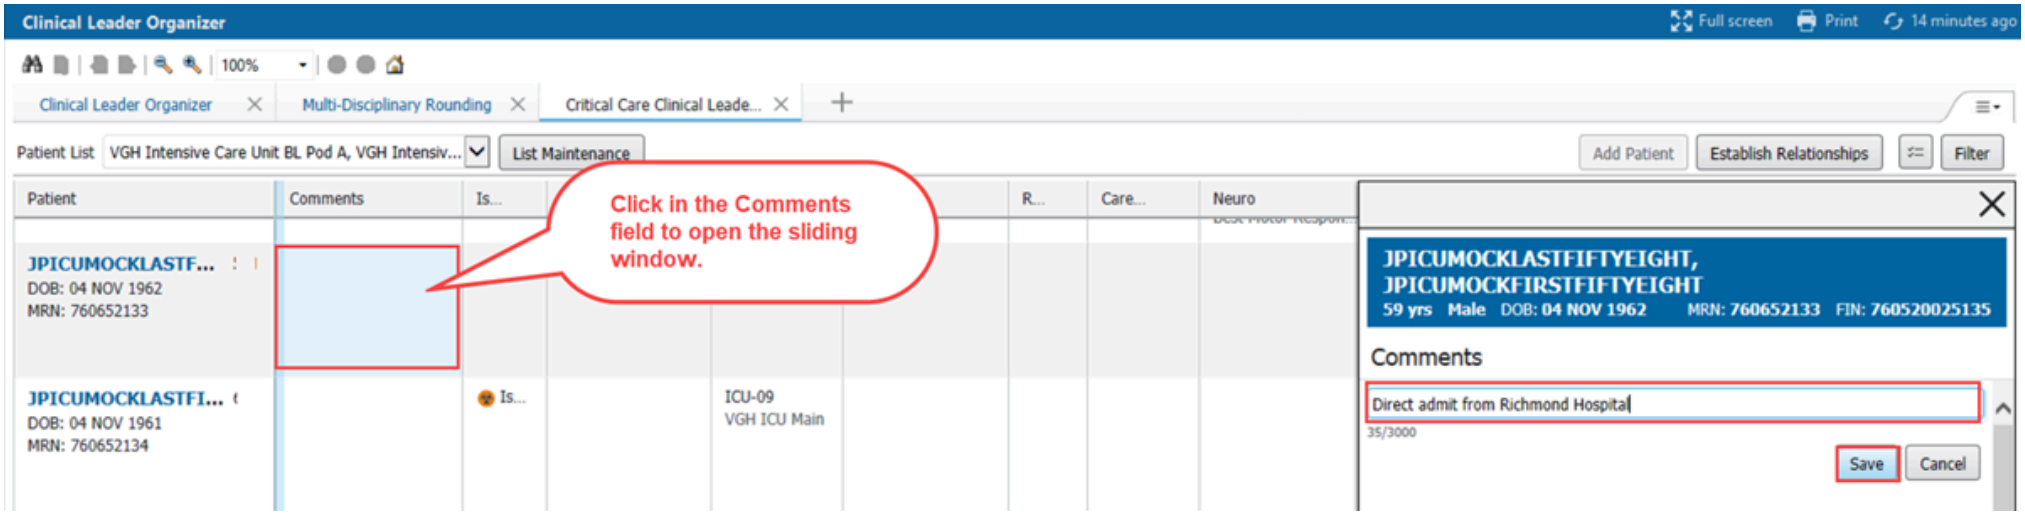


To review detailed information, click the icon, the number, or the text within the field of the indicator column. The detailed information displays in the split window that slides from the right side of the screen. Click **X** to close the split window after review.

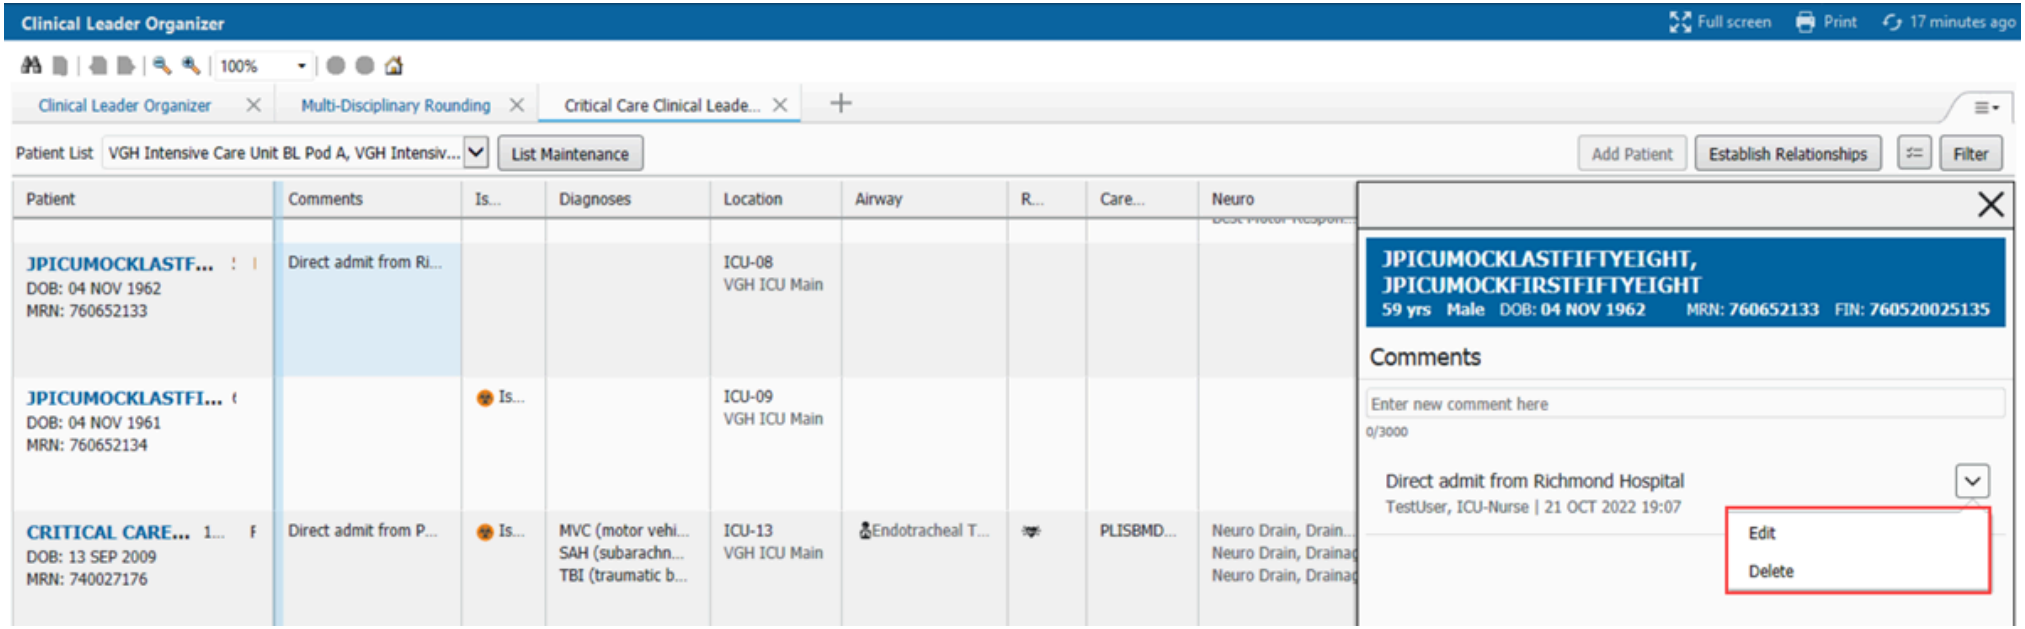


To add a comment in the **Critical Care Clinical Leader Organizer** tab:

1. Select a patient and click in the field of the **Comments** column.
2. Type a comment related to patient care in the free text field and click **Save**.



3. Click the drop-down arrow to select **Edit** or **Delete** if you want to modify the existing comment or remove it from the **Comments** column.



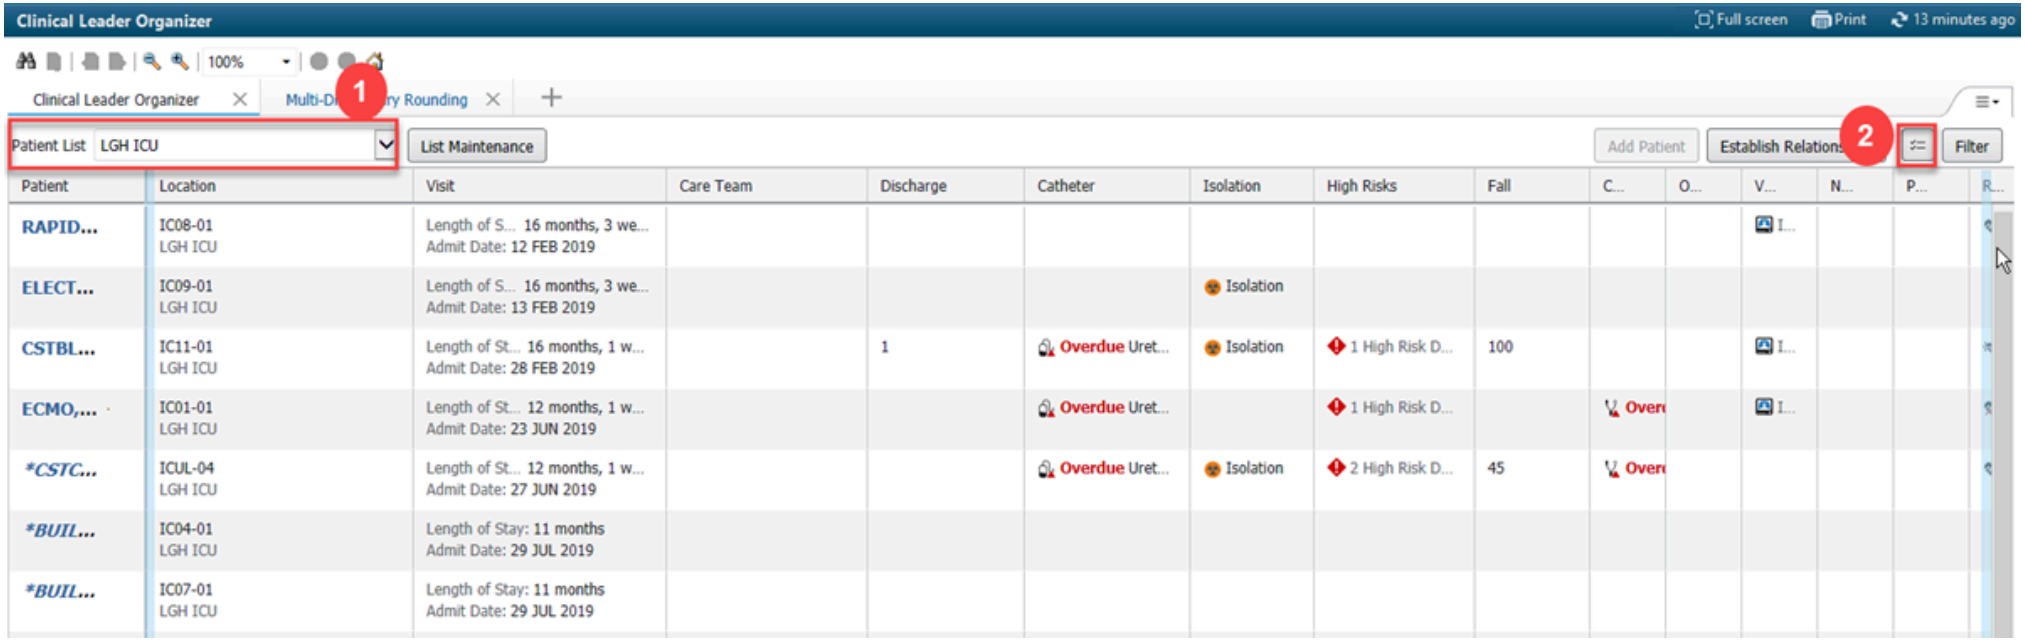
Add Patients to the Custom Patient List in Clinical Leader Organizer

You may manually add a patient from the selected **Location List** to your **Custom Patient List** in **Clinical Leader Organizer (CLO)**.

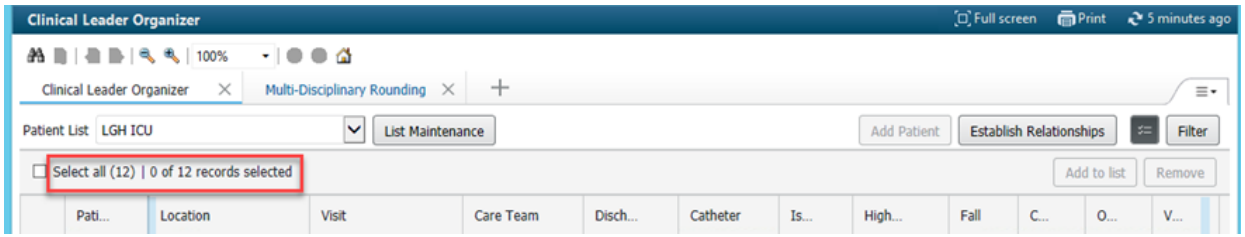
> **NOTE**: If no patient lists have been set up in CLO, click the **List Maintenance** button to create Location List and Custom Patient List

To add a patient from a **Location List** to your **Custom Patient List** in **CLO**:

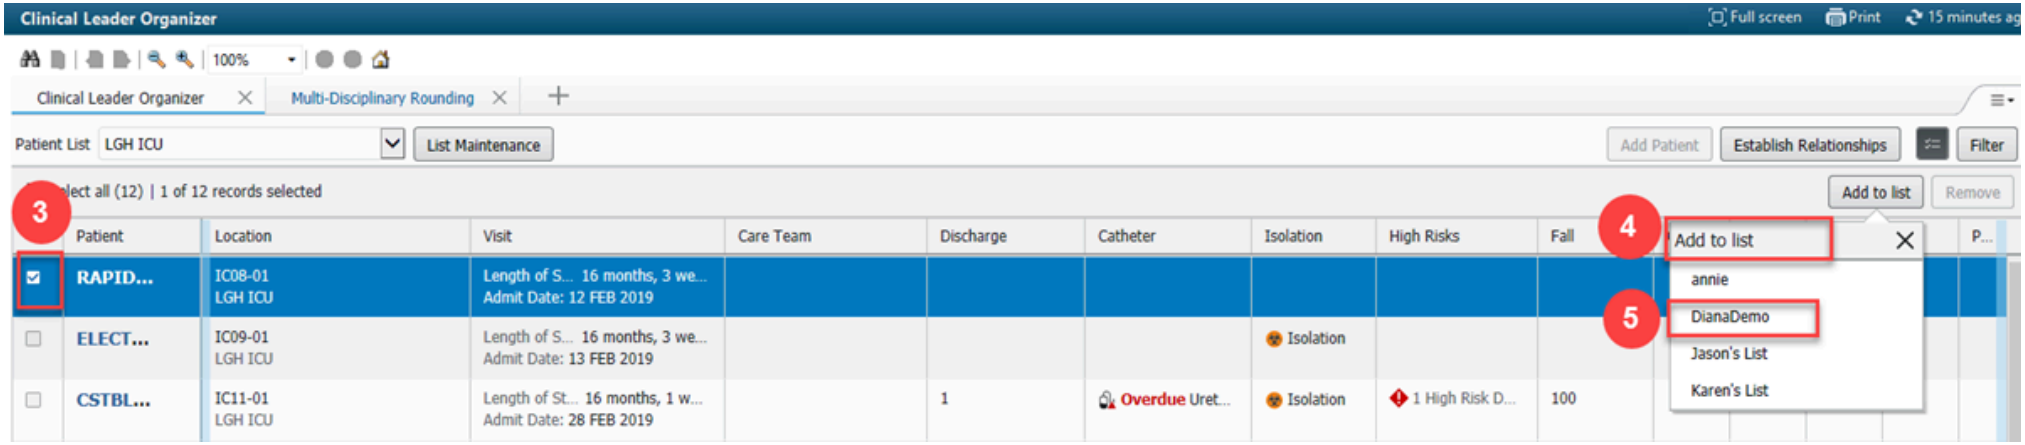
1. Select a **Location List** from the **Patient List** drop-down.
2. Click the **Select Rows** button.



NOTE: Clicking the **Select Rows** button also allows you to view the unit census.

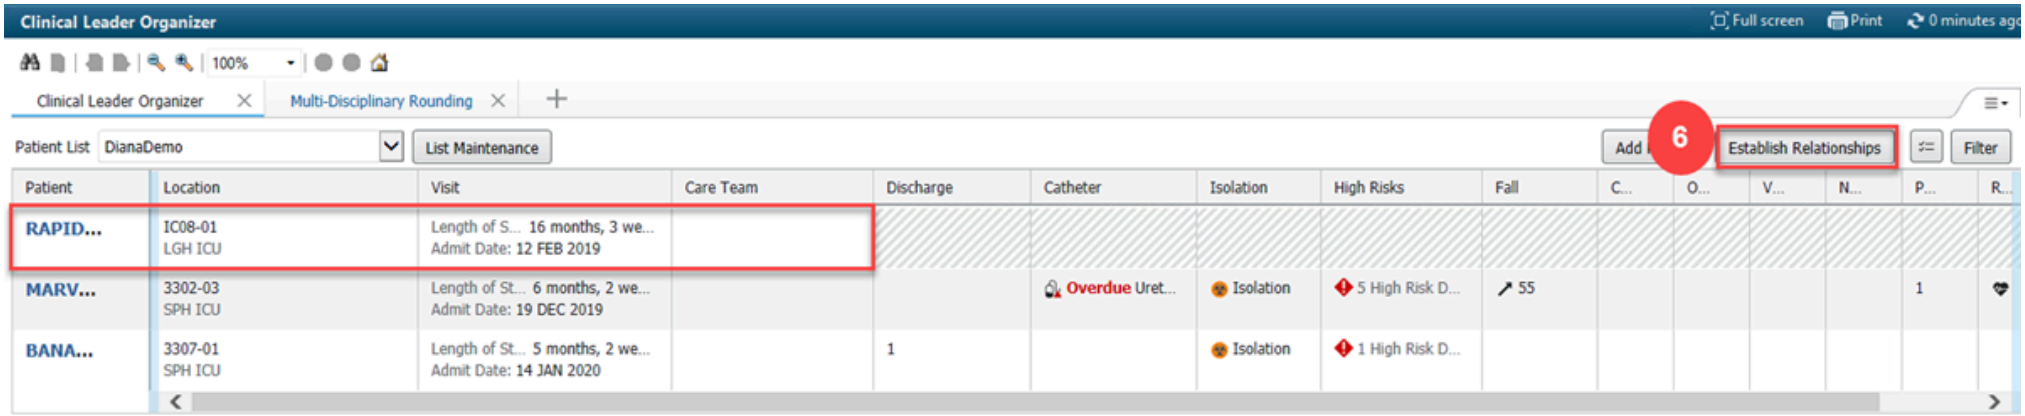


3. Put a checkmark in the tick box beside the selected patient that you want to add to your **Custom Patient List**.
4. Click **Add to list**.
5. Select your **Custom Patient List** from the drop-down.



The new patient is now added in your **Custom Patient List** within the **CLO**.

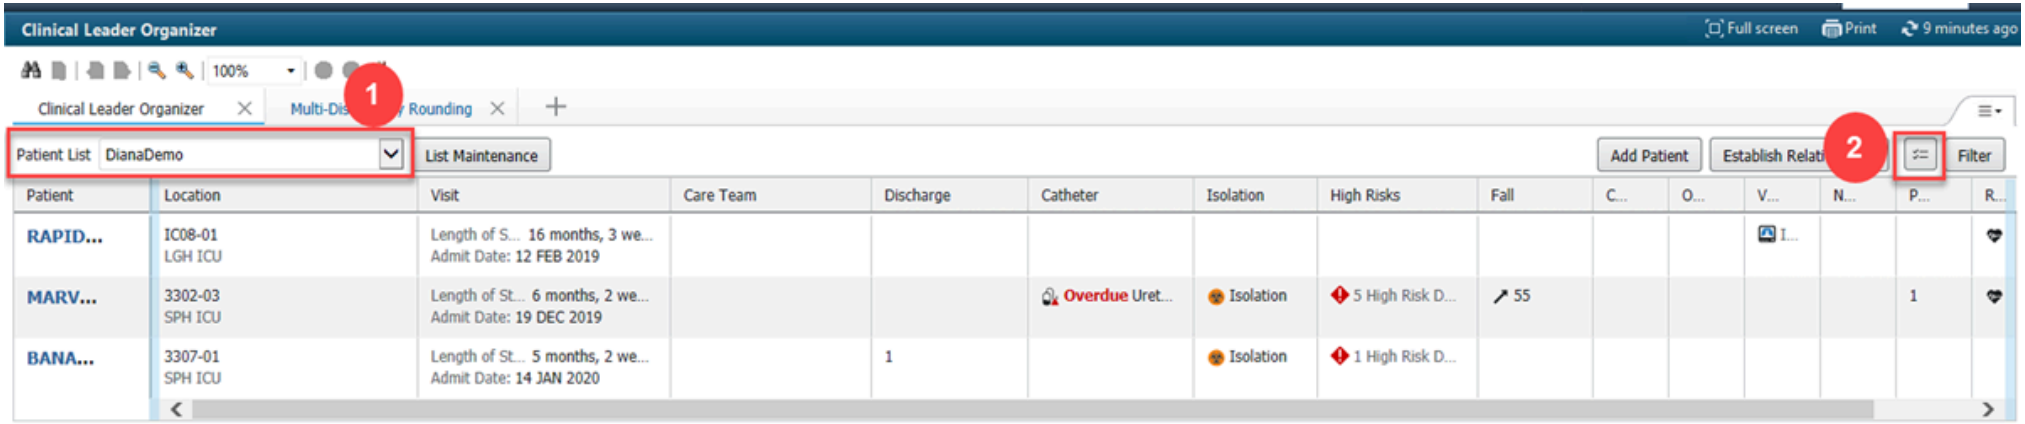
6. Click **Establish Relationships** to assign a relationship in order to review more information about the added patient in **CLO**.



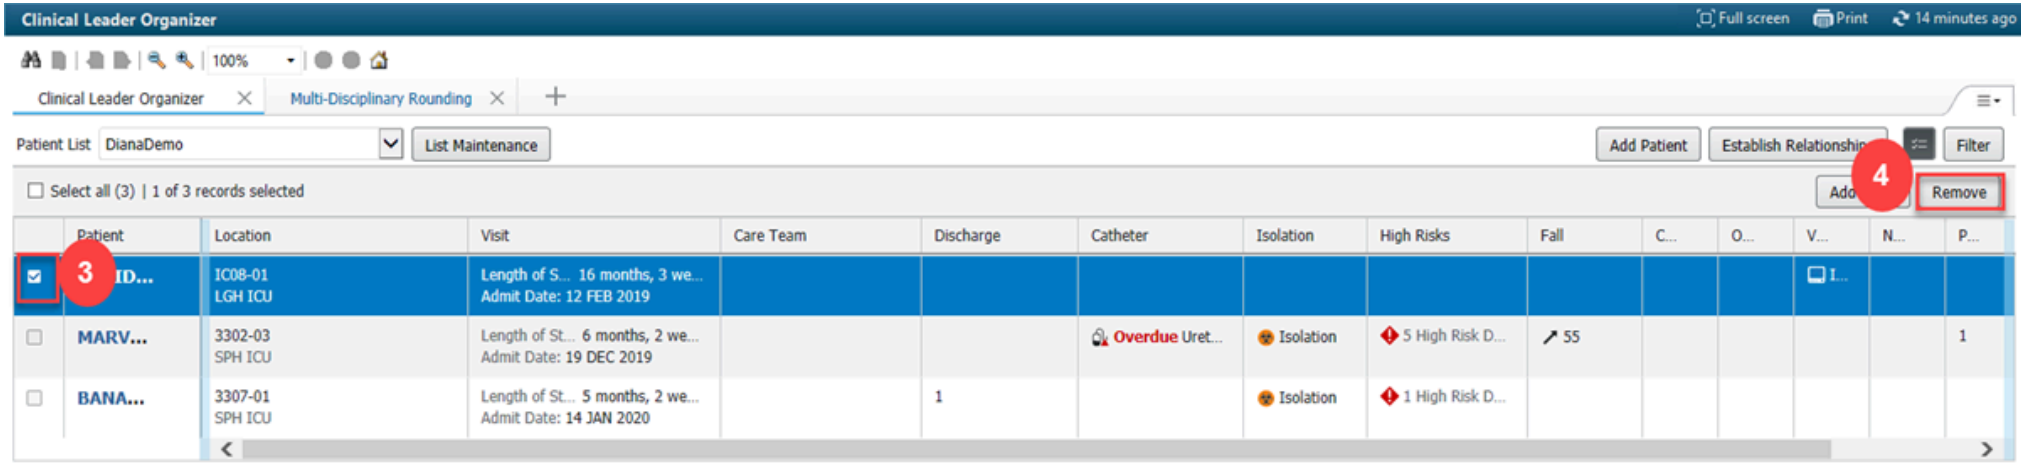
Remove Patient from the Custom Patient List in Clinical Leader Organizer

You may manually remove a patient from your **Custom Patient List** in **CLO**.

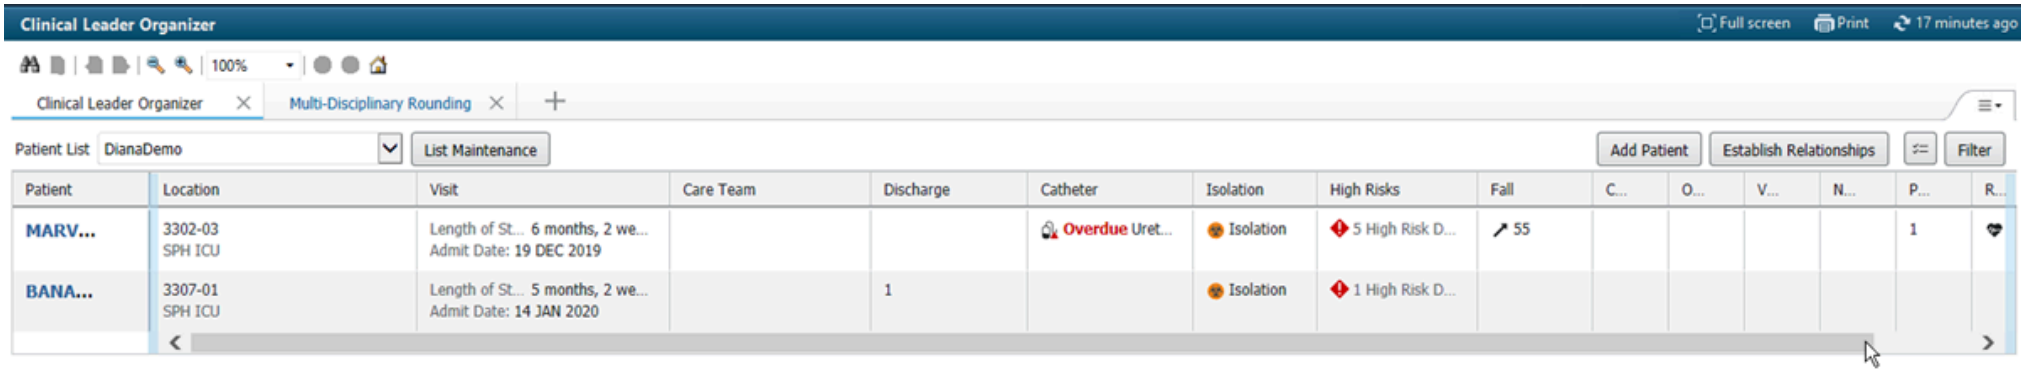
1. Select your **Custom Patient List** from the **Patient List** drop-down.
2. Click the **Select Rows** button.



3. Put a checkmark beside the tick box beside the selected patient that you want to remove.
4. Click **Remove**.



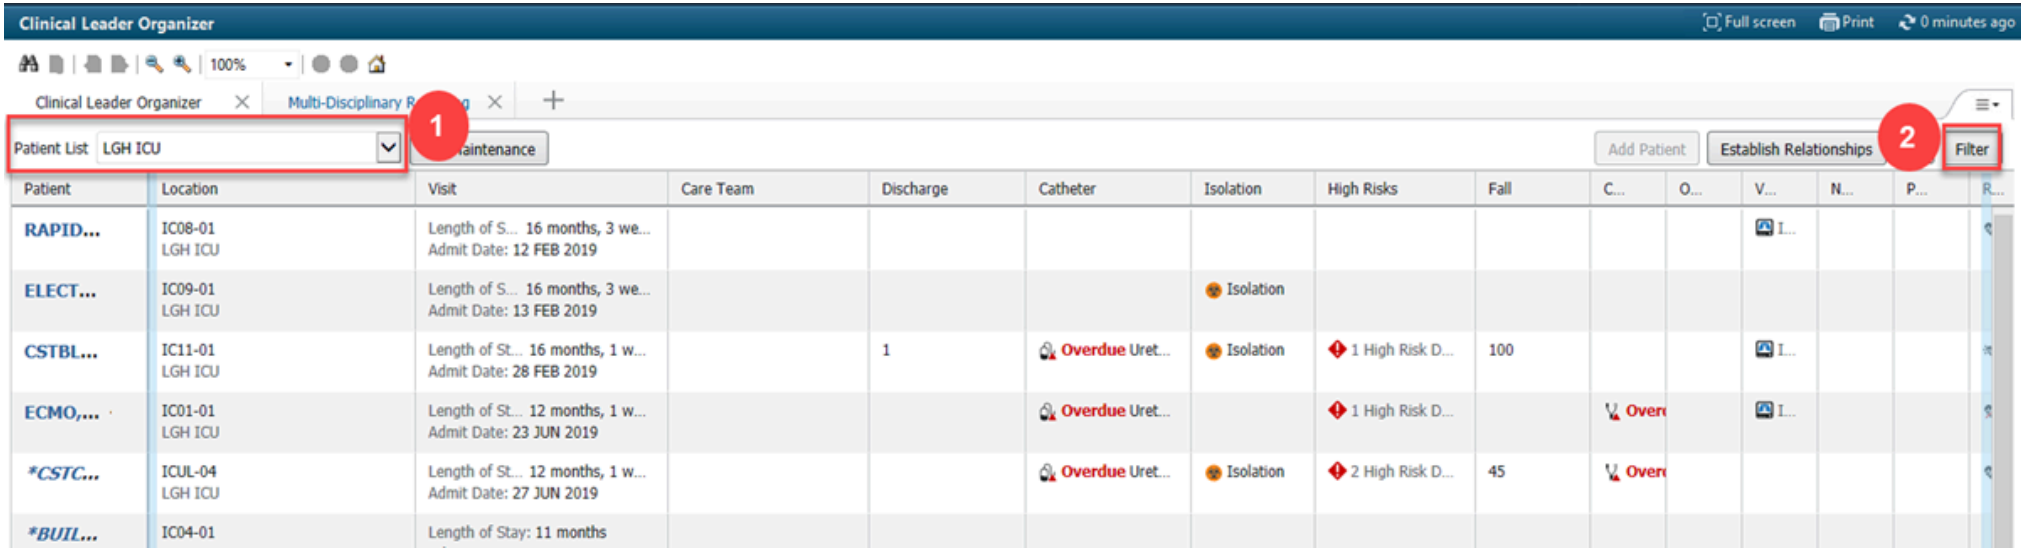
The selected patient is now removed from your **Custom Patient List** in **CLO**.



Filter Through Patients in Clinical Leader Organizer

You may quickly search a patient in a Location List or the Custom Patient List within **CLO** by using the Filter.

1. Select a patient list (e.g. Location List) from the **Patient List** drop-down.
2. Click **Filter.**

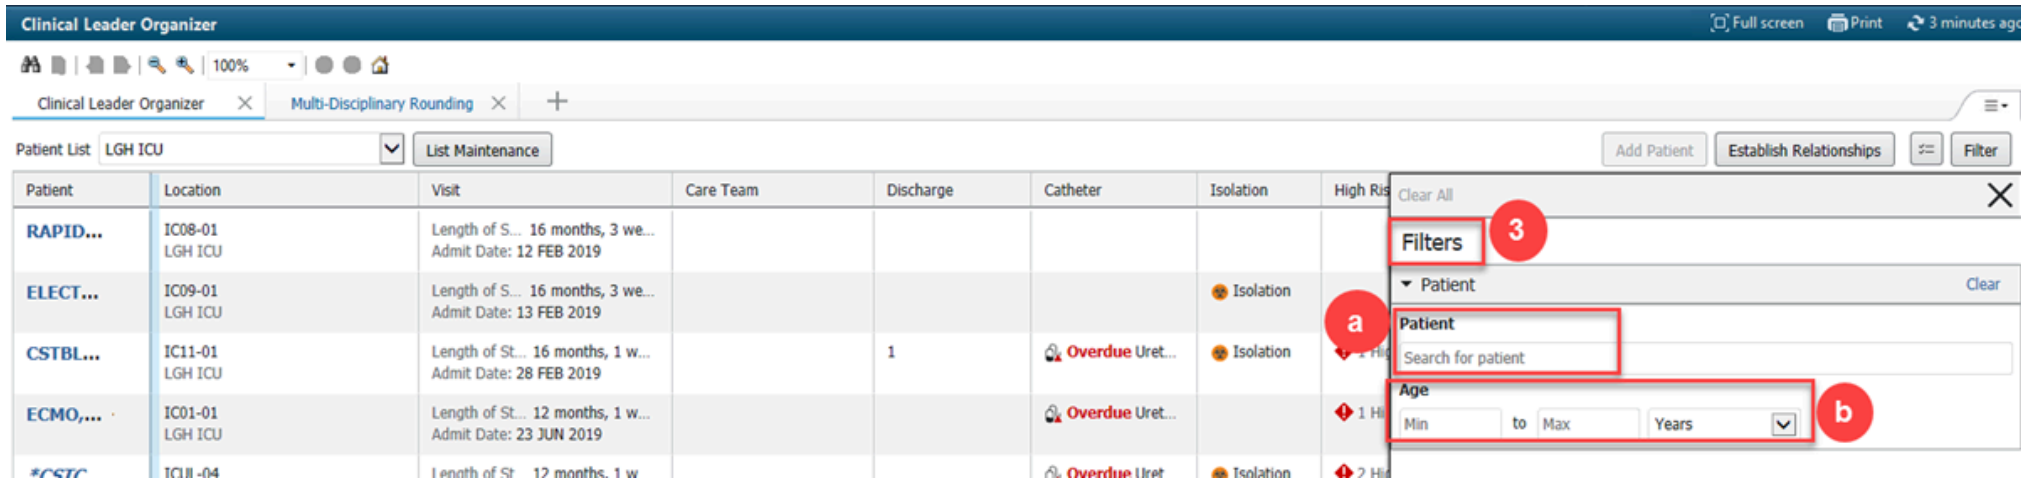


The **Filters** view pane opens from the right side of the **CLO**.

3. Search a patient by using one of the following options:

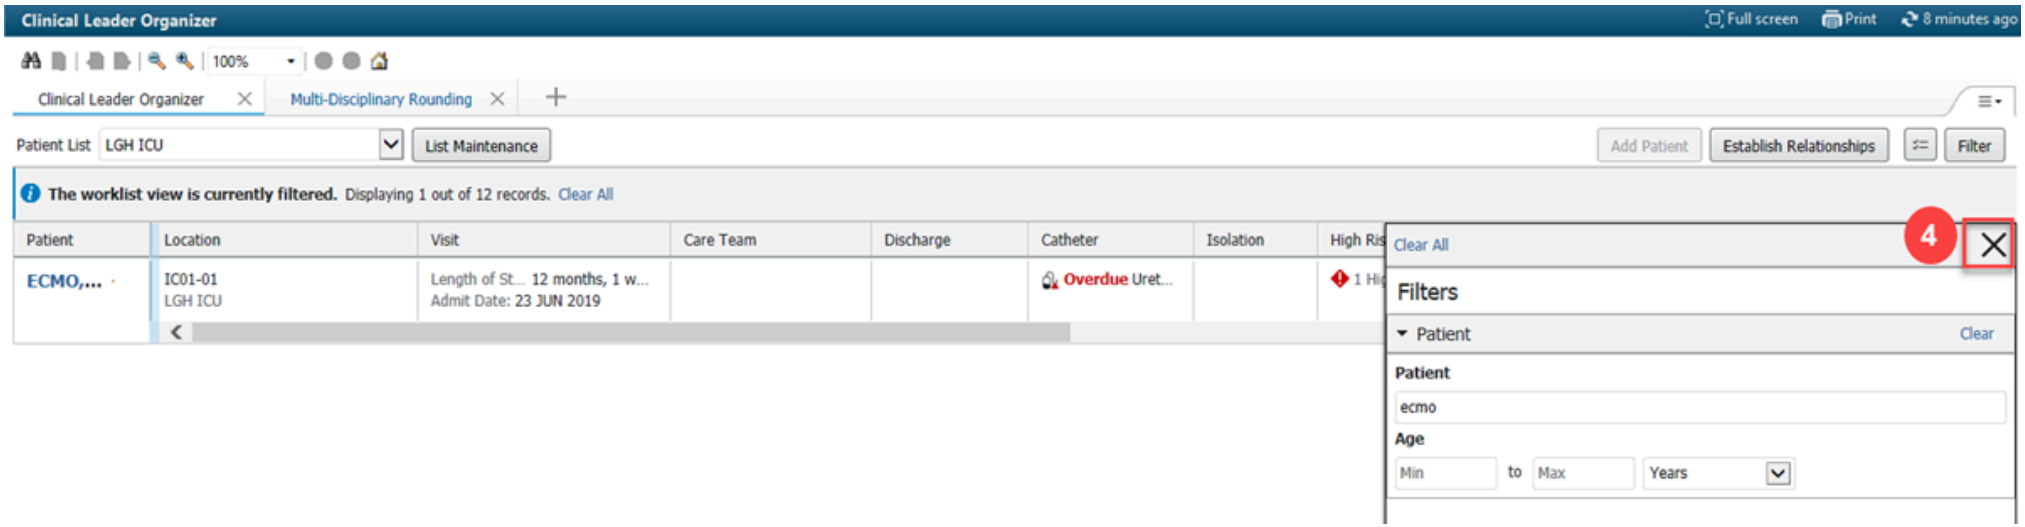
a. Type the key letters of the patient's last name or first name.

b. Enter the age range.



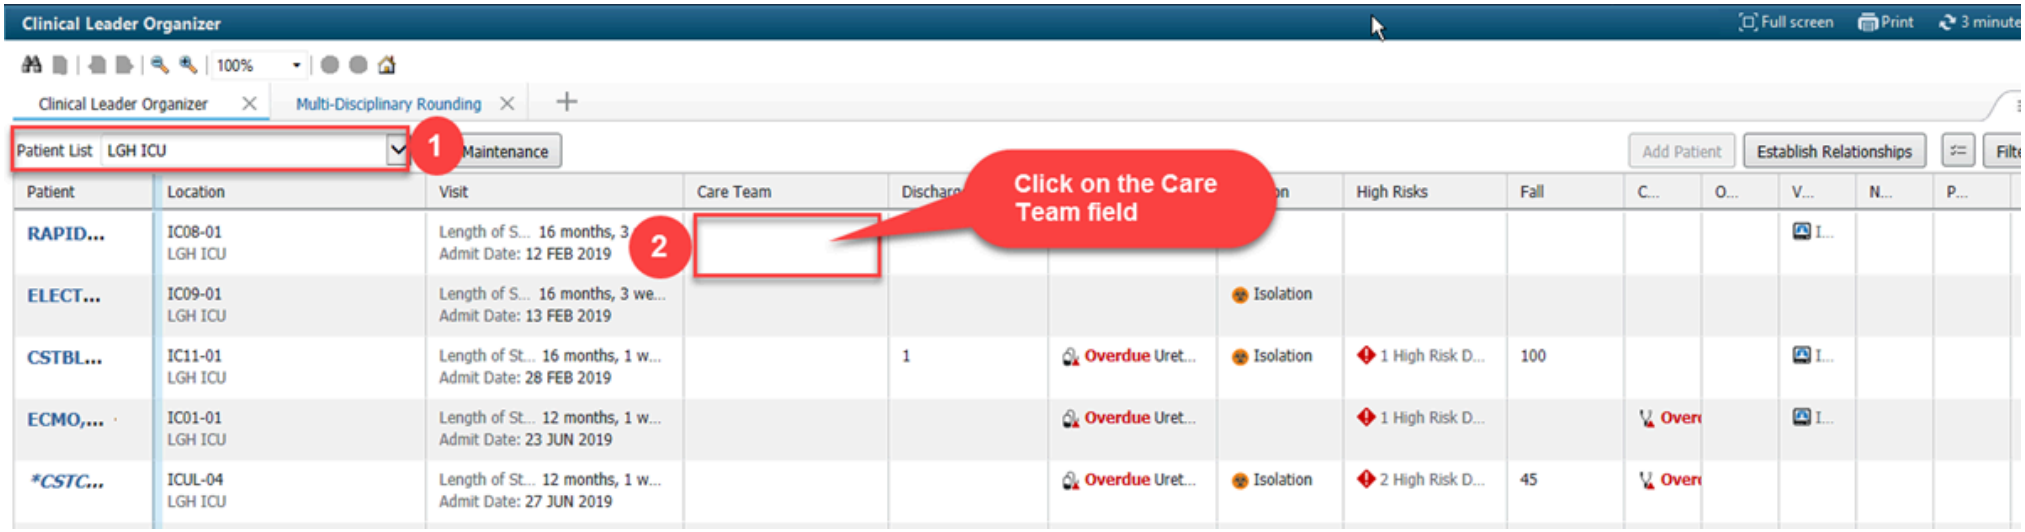
The patient(s) that you want to view displays in **CLO**.

4. Click **X** to close the **Filters** view pane.



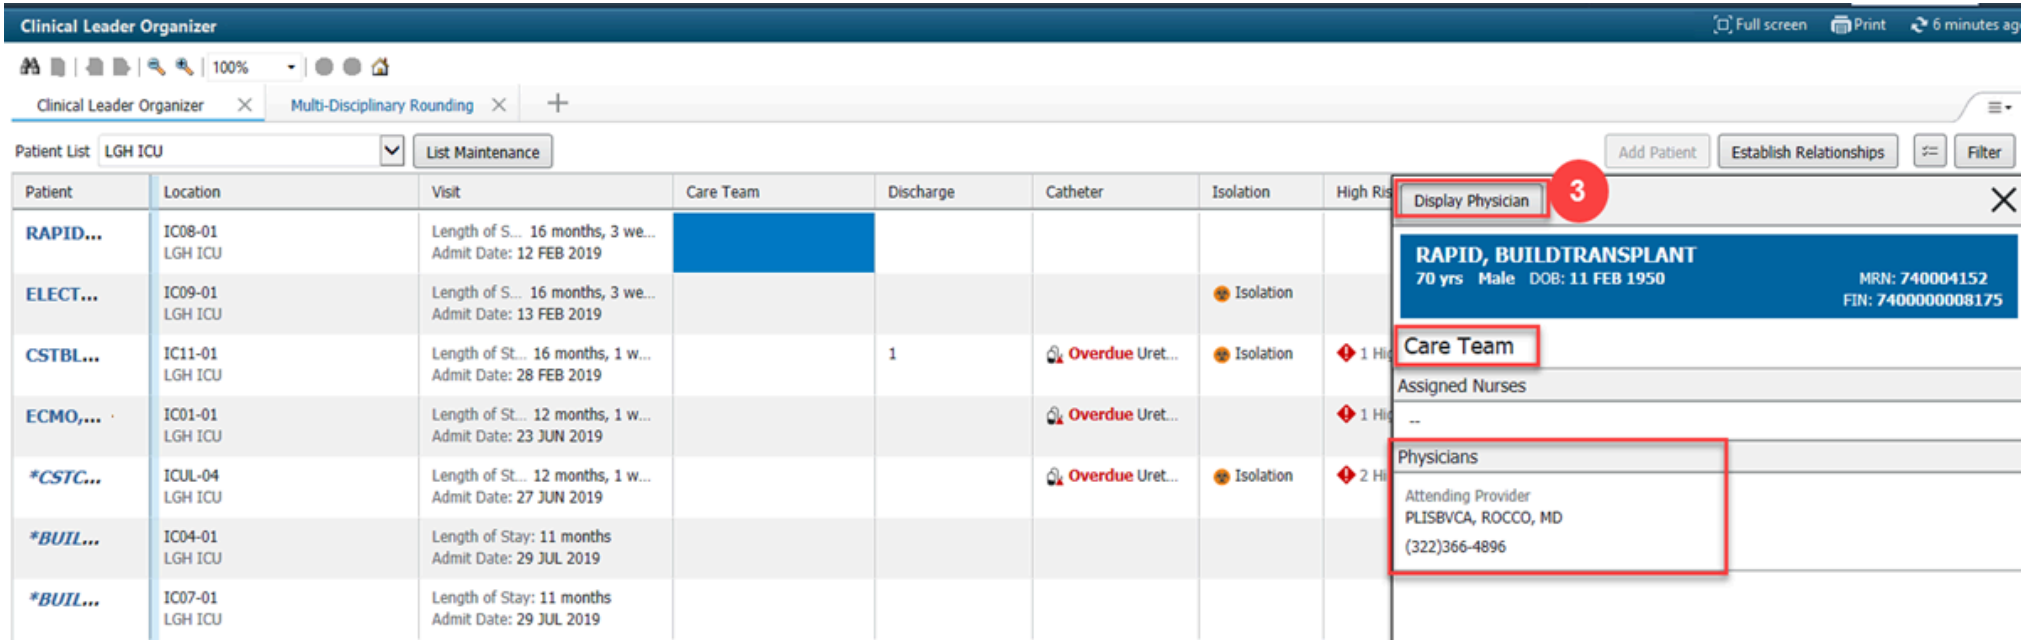
You may view Attending Providers' names and contact information in **CLO**.

1. Select a patient list (e.g. Location List) from the **Patient List** drop-down.
2. Click on the **Care Team** field.



The **Care Team** view pane opens from the right side of the **CLO**. The Attending Provider's name and contact information displays in this view pane.

3. Click **Display Physician**.



All the Attending Providers' names now populate within the **Care Team** column.

4. Click **X** to close the **Care Team** view pane.
