ED Provider Check In and Handover

Check In

You should **Check In** as an available Provider before you can access patient charts.

1. Click the **menu** icon ☰ in the upper right corner in the **ED LaunchPoint** screen.
2. Select **Check In**.

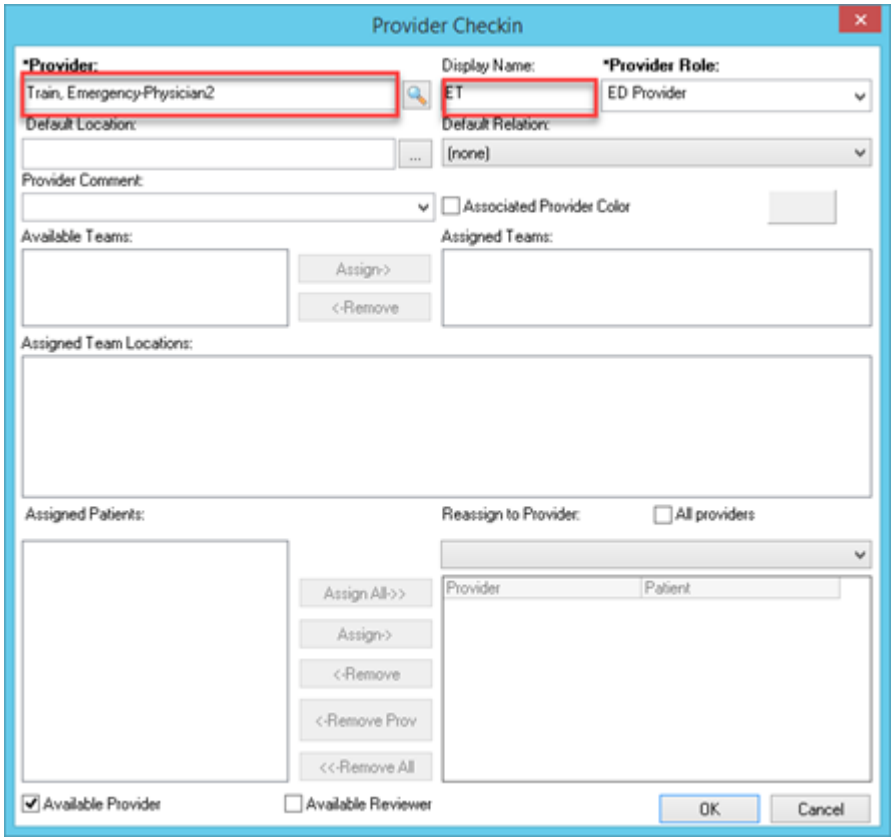
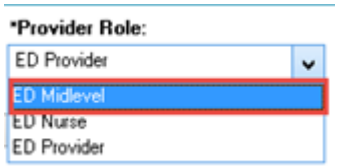
The **Provider Check In** window appears. The fields marked with an **asterisk*** and/or yellow highlighted fields are **mandatory** fields.

3. Confirm that your name, in the **Provider** field is correct. Enter your initials or other identifier in the **Display Name** field.

   The system will only display 3 characters, which can be viewed by the whole department.



4. Select the correct **Provider Role**.
   - ED Physician, ED Fellow and ED Nurse Practitioner – **ED Provider**

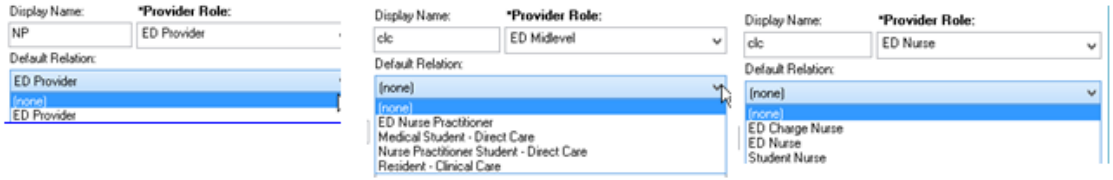


- Resident and Medical Student – **ED Midlevel**
- ED Charge Nurse, ED Nurse and Student Nurse – **ED Nurse**

5. Select **ED Provider** as the **Default Relation**.

NOTES:

- It is important that you identify your **Default Relation**, otherwise you will be asked to identify your relationship each time you open a new patient's chart.

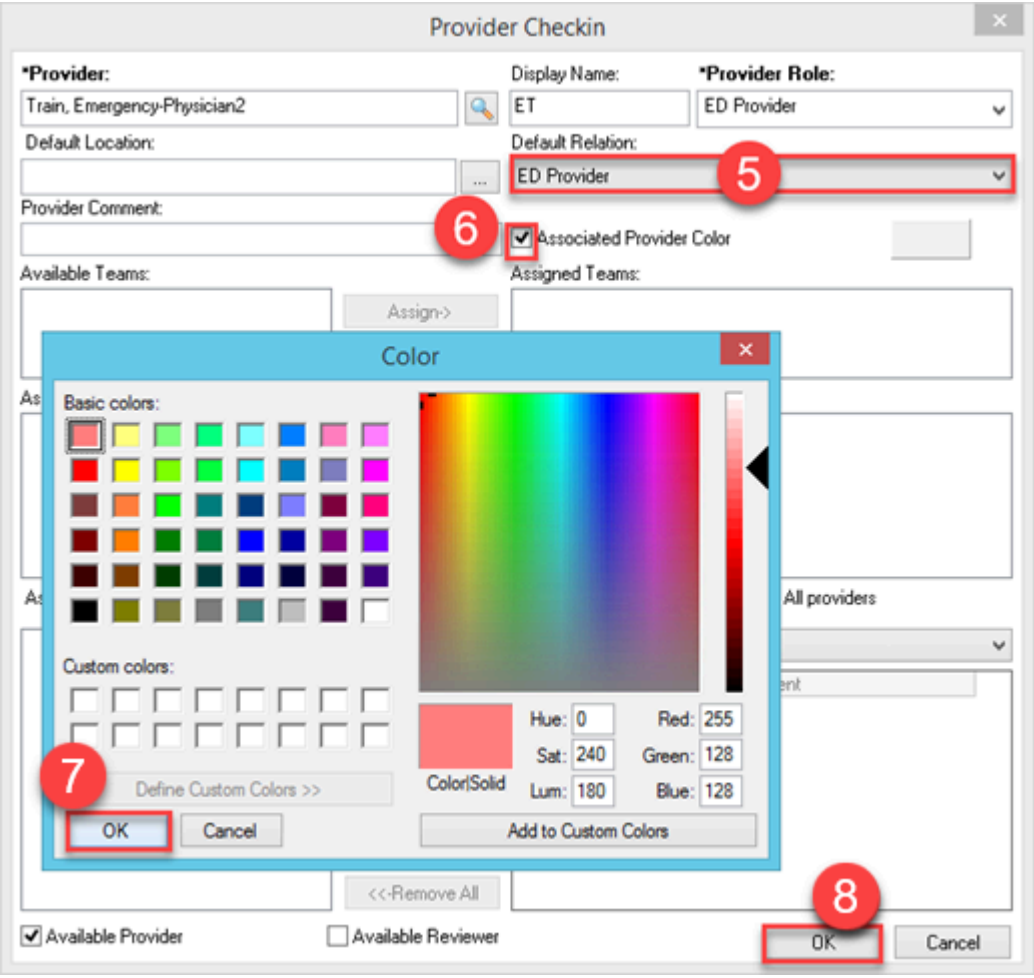


- If you do not check in and establish relationships with your patients, your billing/compensation report will not work!

6. Put a checkmark in the tick box beside **Associate Provider Colour**.

   A **Colour** window opens.

7. Click on the colour box to select a custom colour for the **Display Name** and click **OK**.
8. Once all the relevant fields are completed, click **OK**.



Click here to see this page in full context

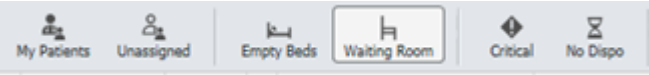
You have now **Checked In** as an available Provider.

Filter ED LaunchPoint Screen

The view of **ED LaunchPoint** can be filtered multiple ways:

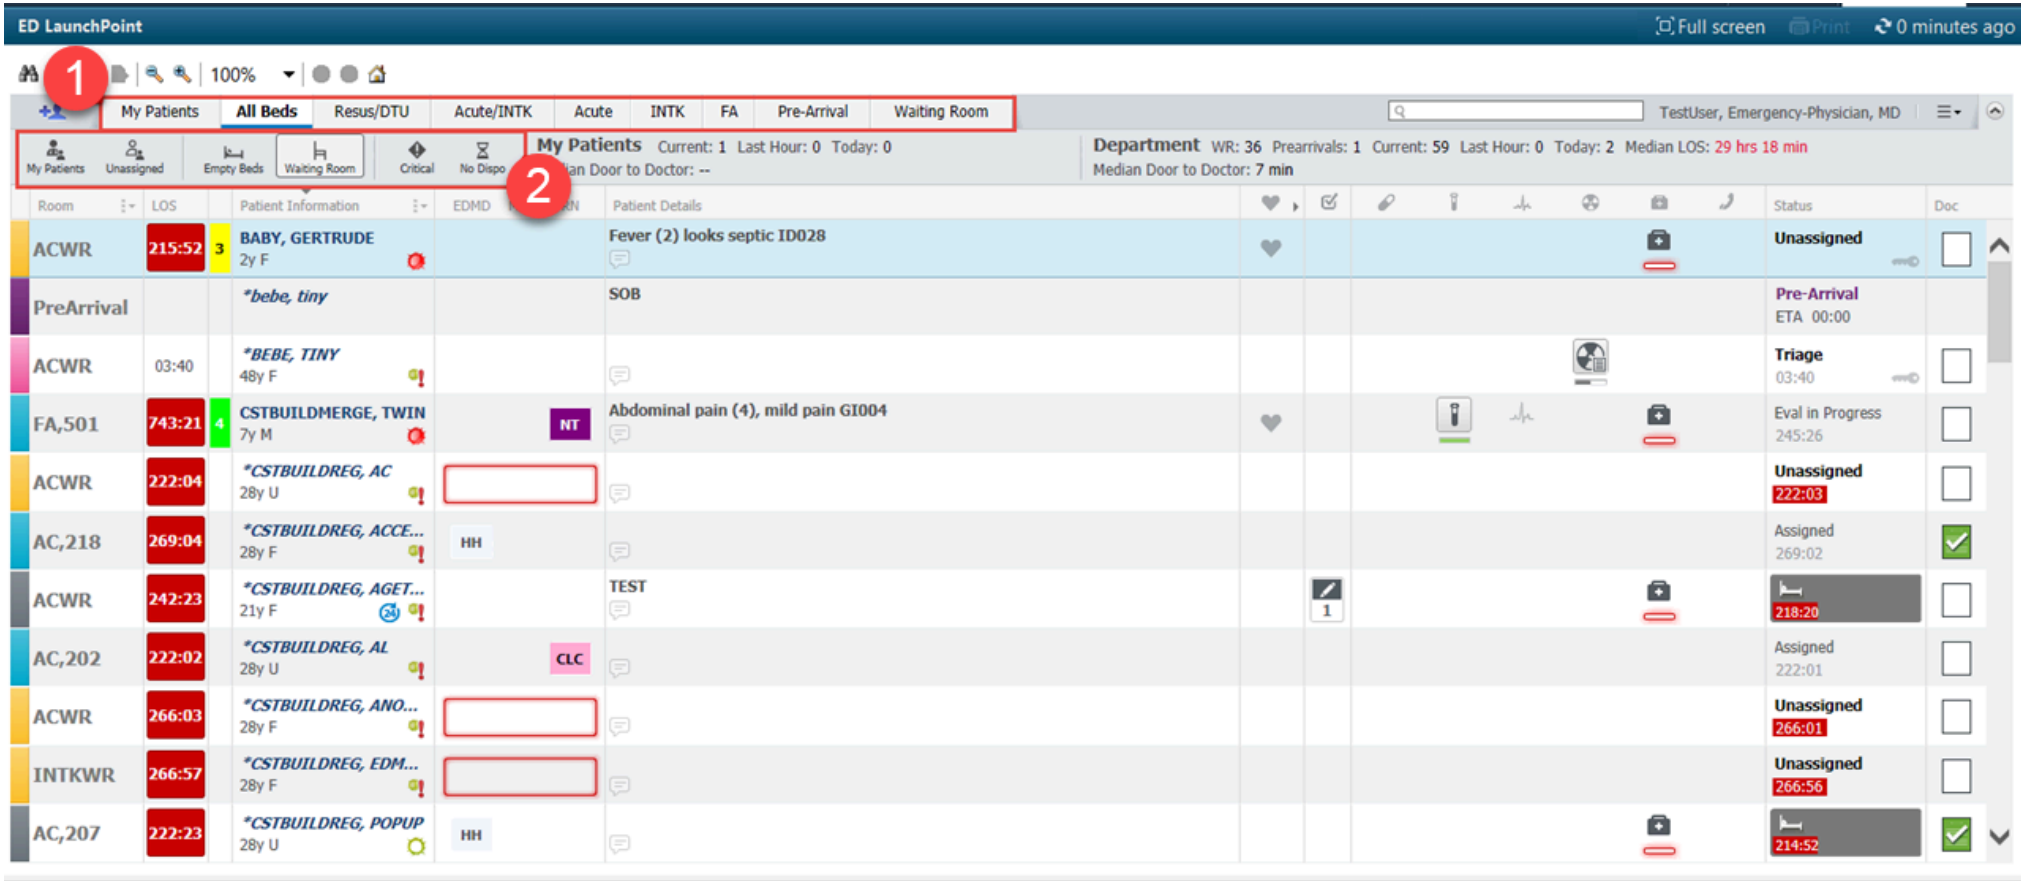
- The **Zone Tabs** across the top of the screen filter by assignment or location.

- The **Filter Tabs** below offer additional options to modify the Patient List view.

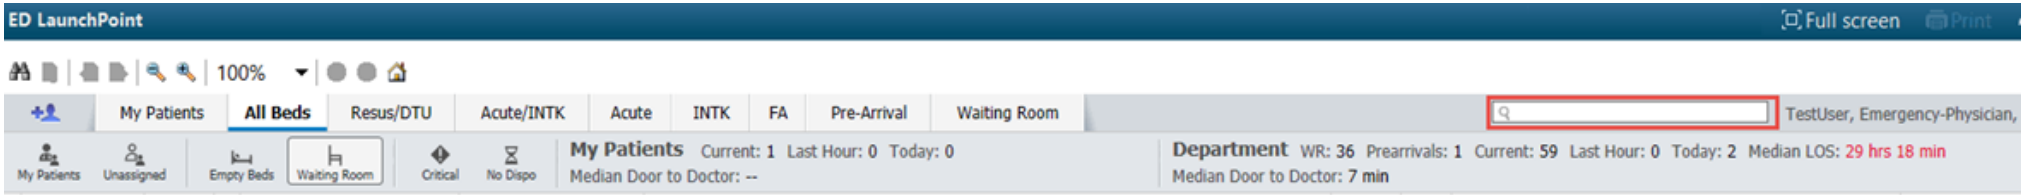


Using these features, filter your Multi-Patient List as follows:

1. From the **Tabs** available, select **All Beds**.
2. Ensure **Waiting Room** is selected.



3. If you cannot find a patient on **ED LaunchPoint**, ensure all filter settings are set to **All Beds** and make sure Waiting Room is selected.
4. If you still cannot find your patient, use the **ED LaunchPoint search** bar.

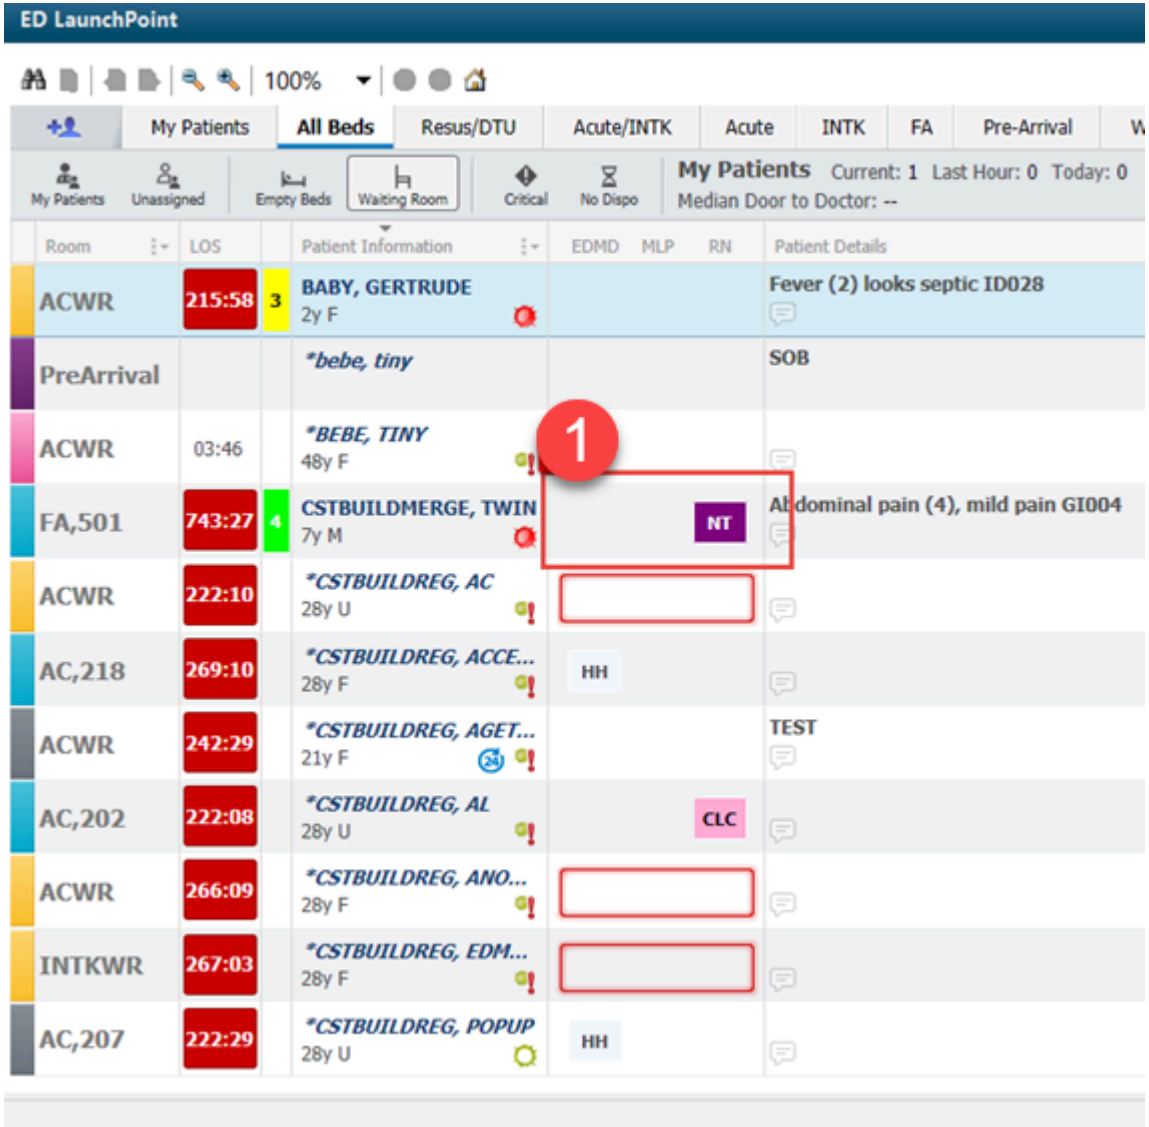


Handover

Next, you will need to **Assign** yourself to the patient.

1. Navigate to the **Assignment Column** and click inside the **column**.

Click here to see this page in full context

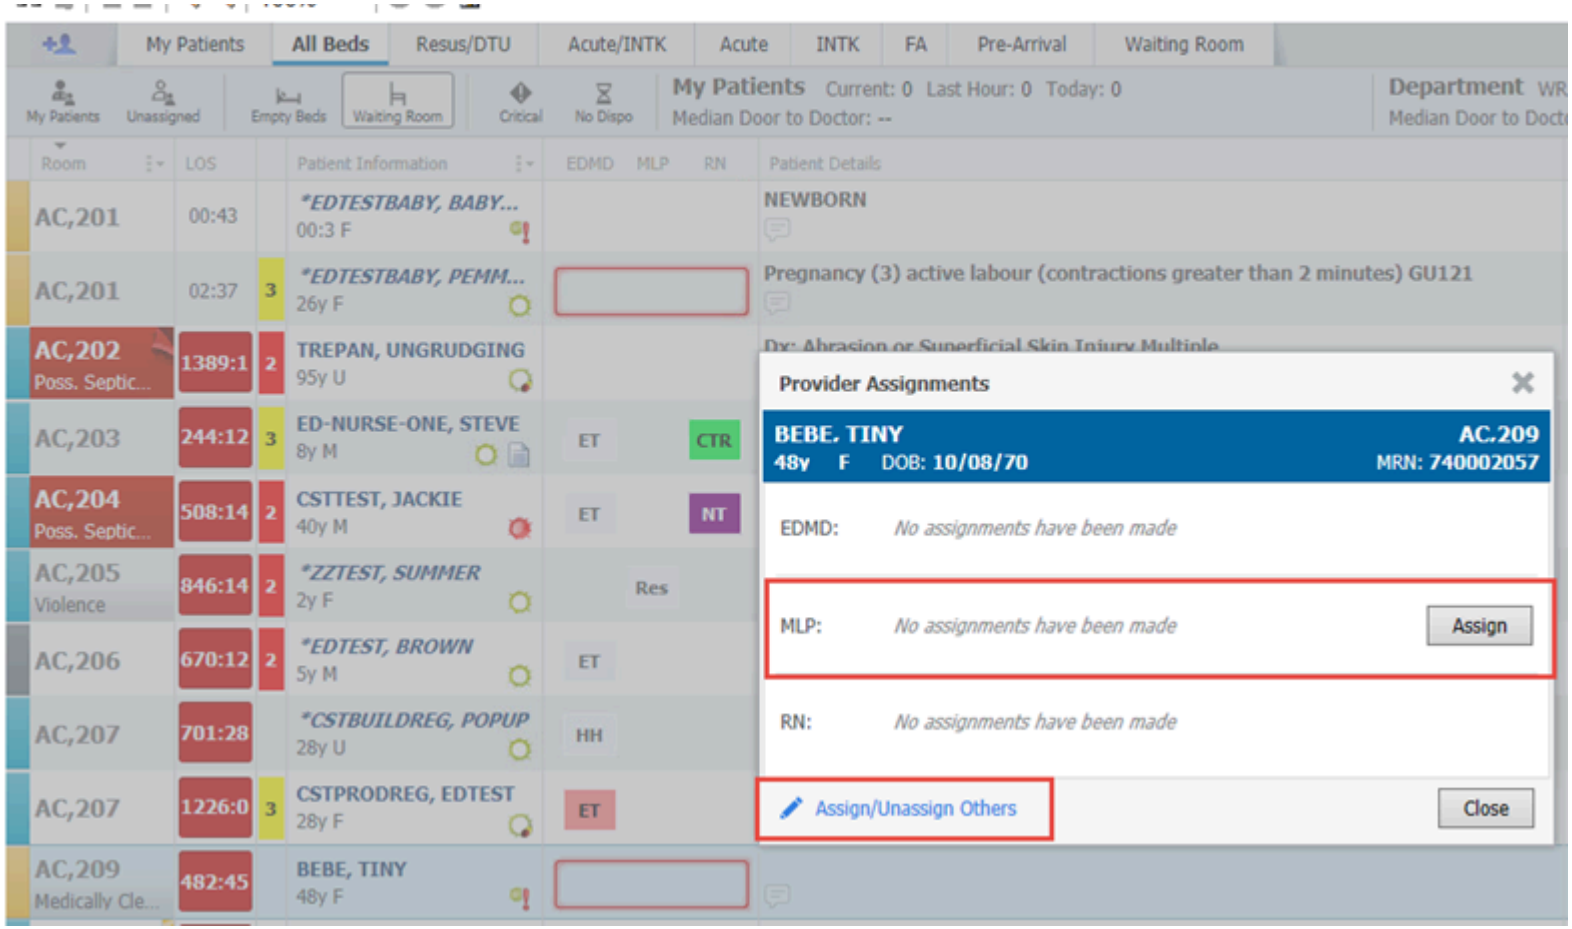


The **Provider Assignments** window appears.

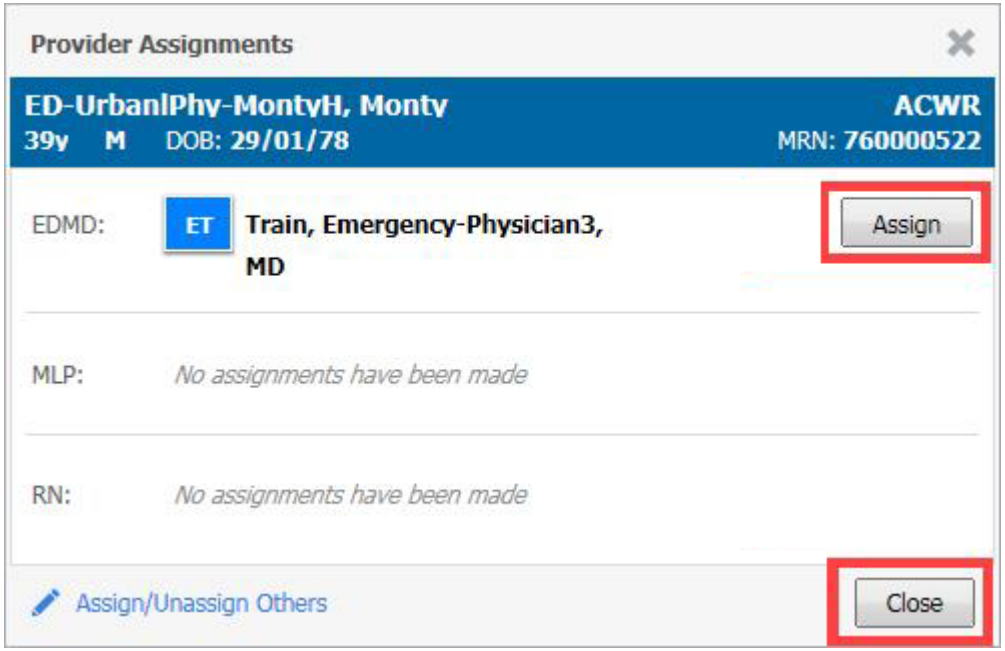
2. Click the **Assign** button.

The initials you entered during Check-In will appear in the **Assignment** column.

NOTE: If you are a Resident or Medical Student, be sure to **Assign** your supervising ED Provider to any patients in your care. In doing so, they will automatically receive orders or documentation requiring co-signature.



3. Click the **Close** button.



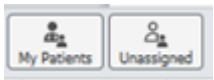
Click here to see this page in full context

You will notice that your initials are layered ER with the outgoing provider. This acts as a visual cue to others that handover is occurring on this patient.

NOTE: The **Assignment** column will only display 2 sets of initials for each discipline at one time. When a second oncoming Provider assigns themselves to a patient, their initials will be **layered** over the first Provider's initial. If an **additional** Provider assigns themselves, the **first** Provider will be "bumped".

If the first person wishes to keep their name assigned to the patient, the second clinician will need to be unassigned before the third is added Even if a physician is unassigned, there is always a record in **FirstNet** of which providers and nurses were looking after a patient.

4. After assigning yourself to your patients, change the View in the drop-down menu to **My Patients and Unassigned.**



This view organizes your Assigned patients to the top of the screen while still allowing you to visualize the rest of the department.

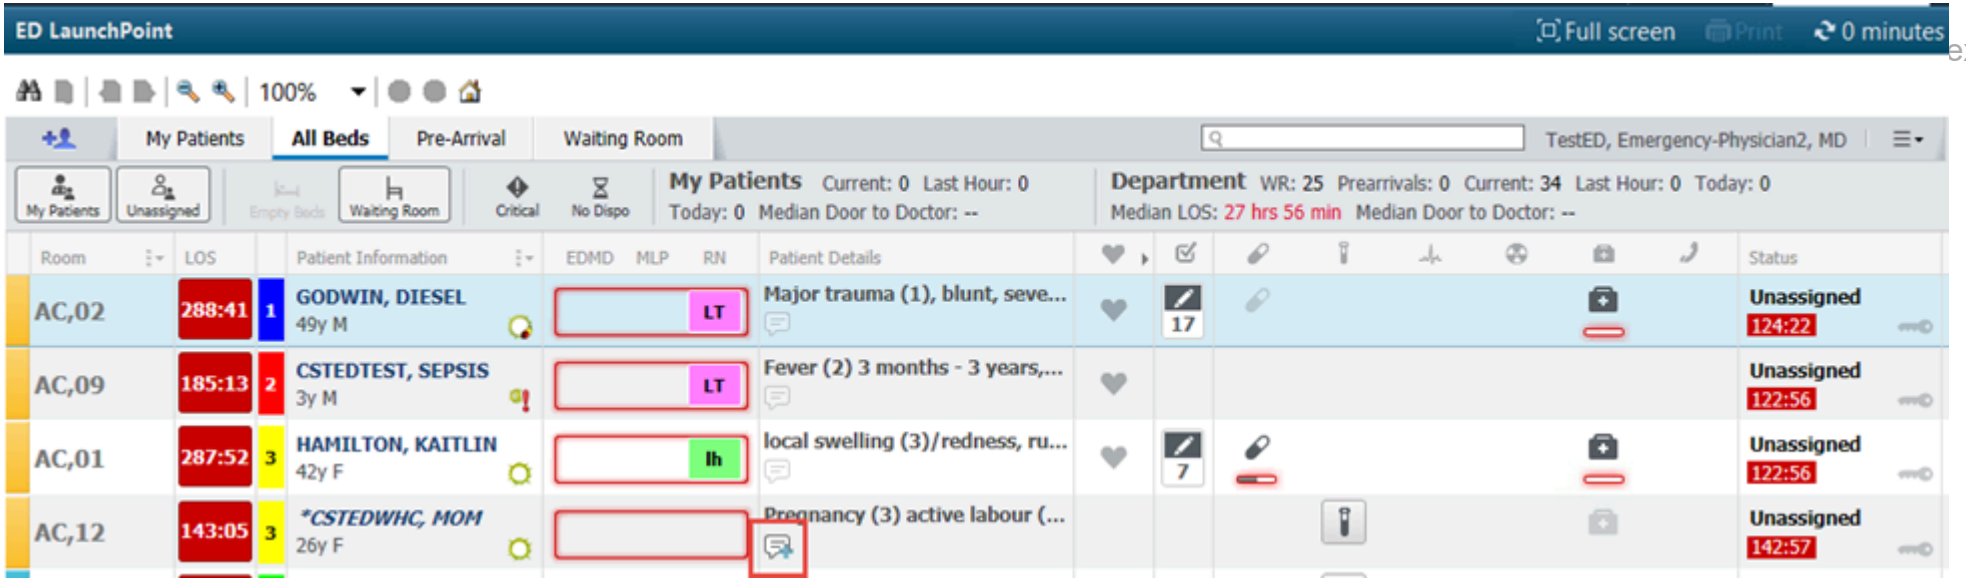
As you receive Handover, you may want to **Comment** next to a patient's name to remind you of important details later.

5. Click the **Comments** icon in your patient's row in your **ED LaunchPoint** screen.



The **Comments** box Comments appears.

> **NOTE**: **Provider Comments** can only be seen by Providers while **Staff Comments** can be seen by everyone in the department.

6. Click **Save**.
