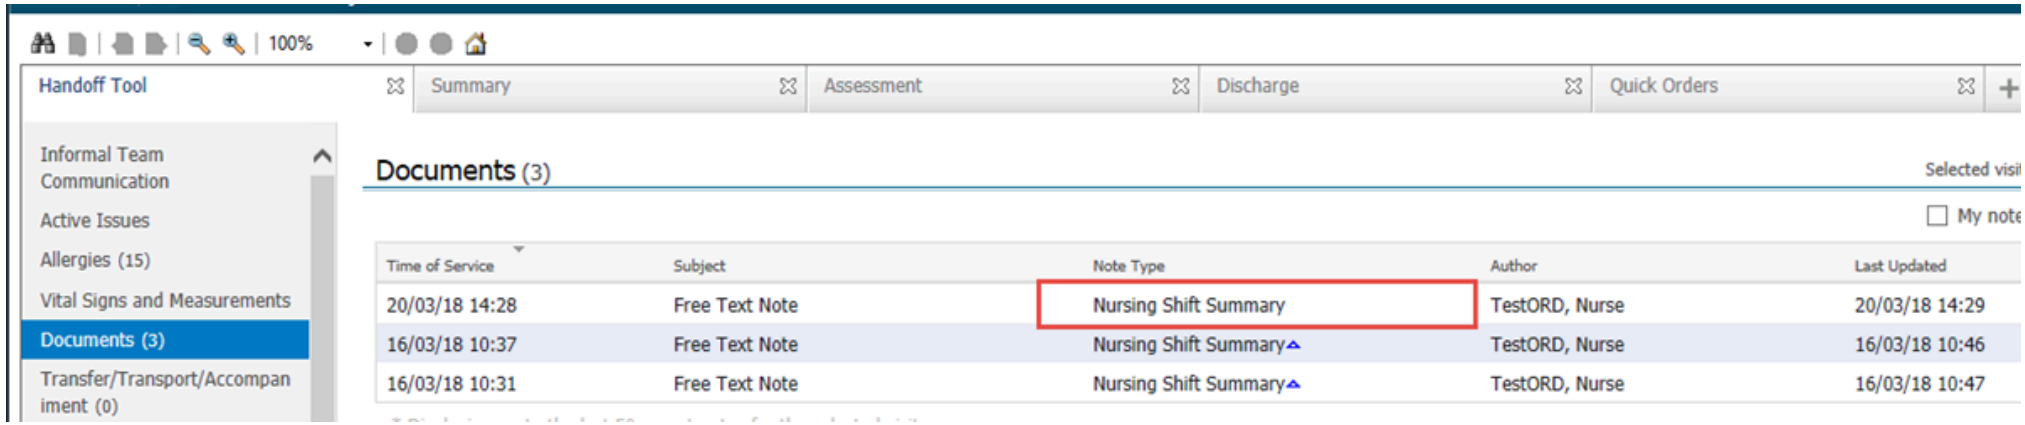
Tag Previous Documentation in a New Note

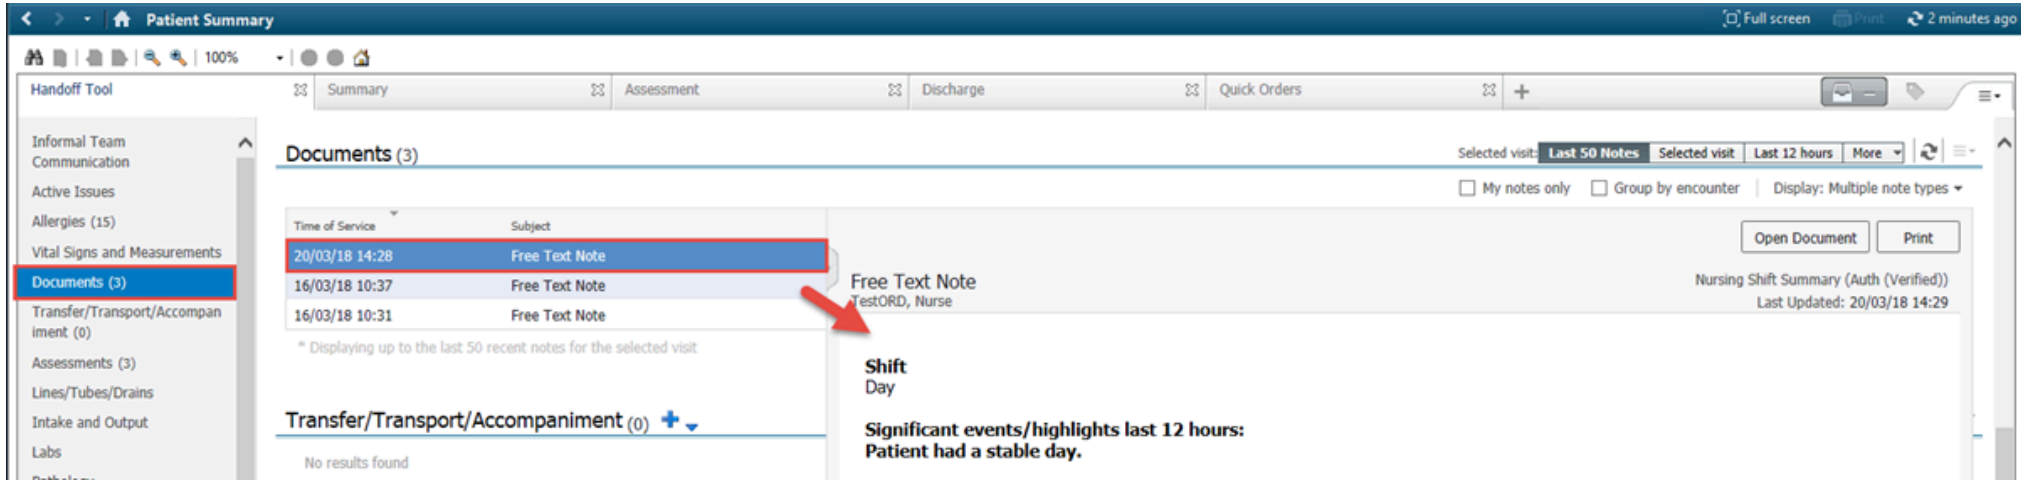
Tagging functionality enables the user to copy text from an existing note into a new one while retaining pertinent information such as whom, when and where the copy text was written.

WARNING: Tagged lab results will only appear in the lab section, and tagged diagnostics will only appear in diagnostics section.

1. Locate the document from which the information has to be tagged.

   NOTE: This can be done directly from a **Documents** component on certain summary pages or from the **Documentation** tab on the **Menu**.





View from **Documentation** in the **Menu**

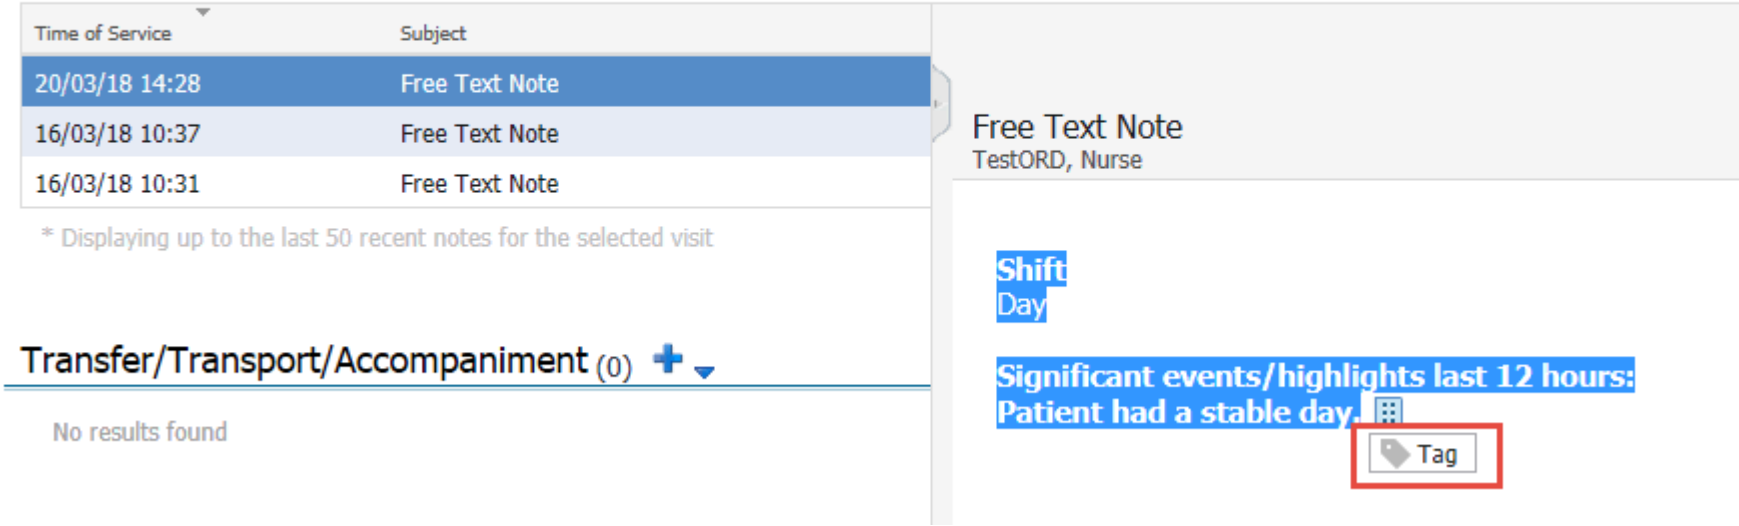
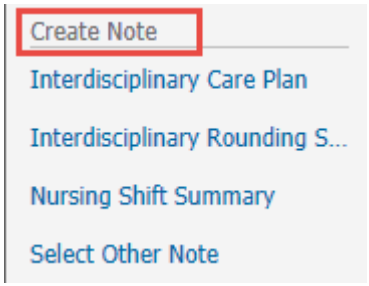
Result title:	Vital Signs and Measurements
Performed by:	TestPET, GeneralMedicine-Physician, MD on Monday, 19-March-2018 13:10 PDT
Verified by:	TestPET, GeneralMedicine-Physician, MD on Monday, 19-March-2018 13:10 PDT
Encounter info:	7400000000550, LGH Chemo, Pre-Outpatient

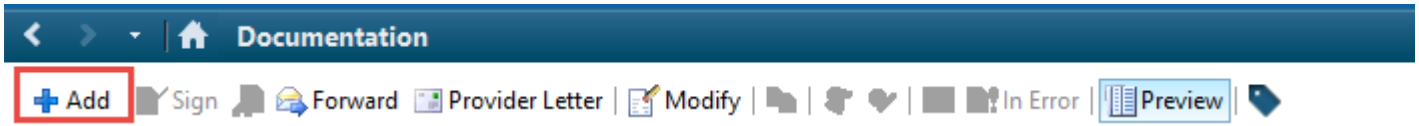
2. Highlight documentation to be copied.
3. Click the **Tag** button  when it appears.



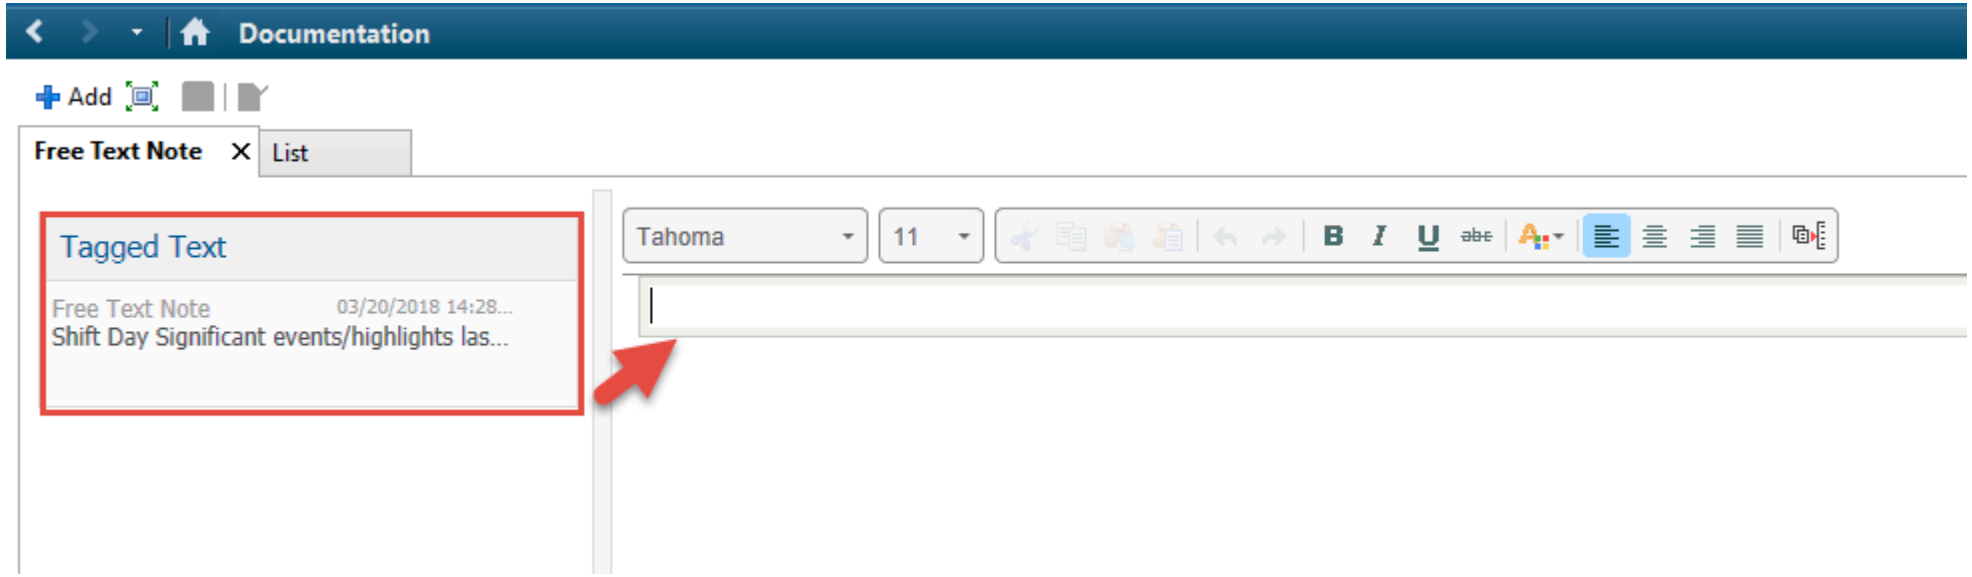
4. Click **Add** Add in **Documentation** and select appropriate note to be created.

> **NOTE**: This can be done through the **Create Note** section at the bottom of certain summary pages or from the **Documentation** tab on the **Menu**.





5. Drag-and-drop the **Tagged Text** into the text box on the right.



NOTE: The source of the tagged information displays in the note, including its original location, whom it was written by and when it was written.

6. Additional documentation can be added.
