Tools and Functionalities Applied in Interdisciplinary Rounding (Inpatient Nurse)

This help topic will only include information related to the tools and functionalities available within CST Cerner that can aid Interdisciplinary Rounding.

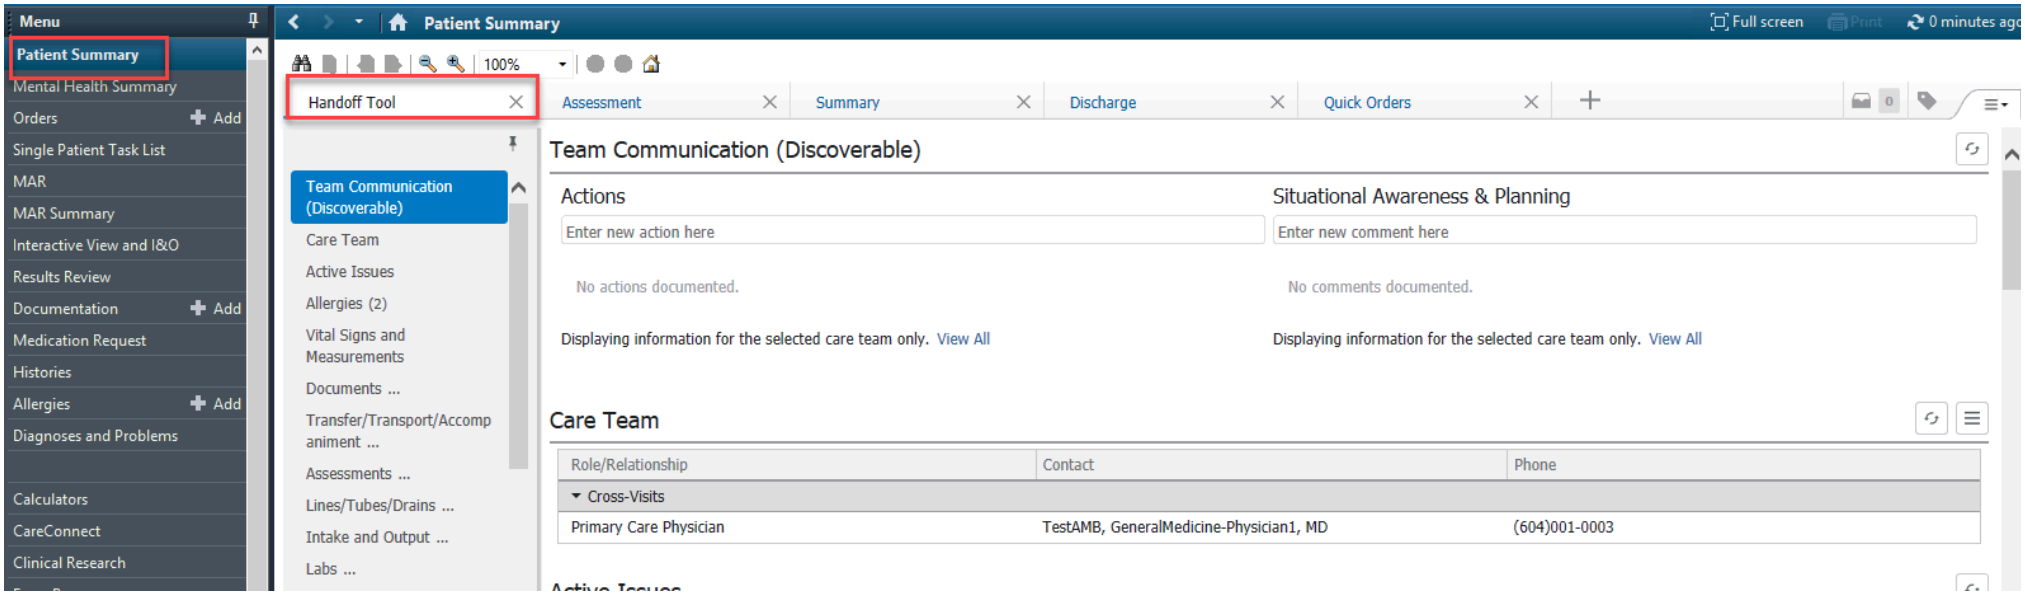
> **NOTE**: Multi-Disciplinary Rounding functionality in Clinical Leader Organizer (CLO) is another tool to be used during Interdisciplinary Rounding. For detailed information, please review the related help topic - Interdisciplinary Rounding in Clinical Leader Organizer (CLO).

The following topics will be covered:

Handoff Tool

Nurses will have access to the **Handoff Tool** page. The **Handoff Tool** pulls information from other areas of the chart into this page. Aside from using the **Handoff Tool** at shift change and handover, it is useful to use this page for rounding as it consists of an overview of patient information.

1. From the **Menu**, navigate to **Patient Summary** or the appropriate page for your care area. **Handoff Tool** will be accessed via a tab on that page.



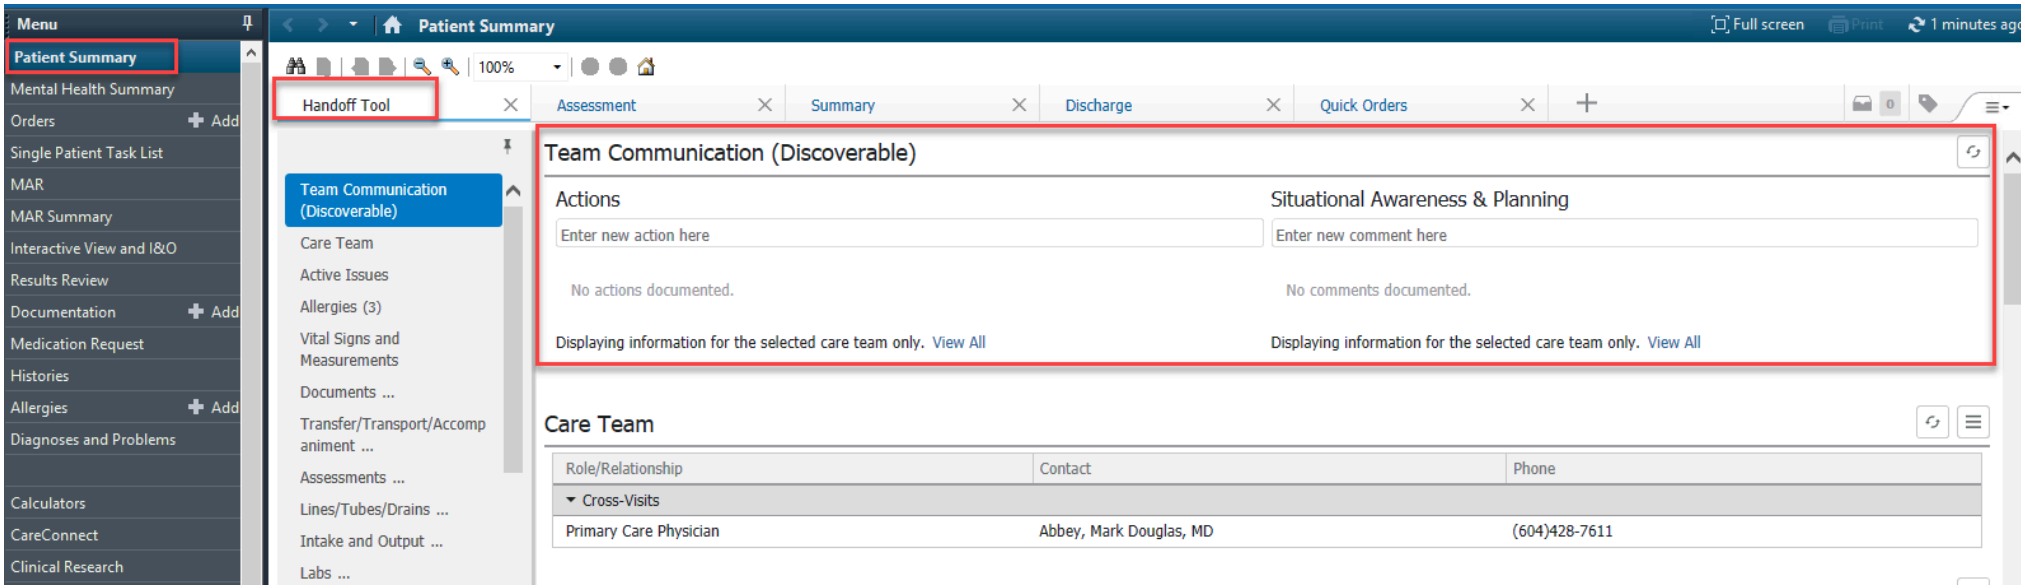
2. Scroll down the page to navigate to other components on this page, and to review patient information during rounding.

Use of the Team Communication (Discoverable)

Team Communication (Discoverable) is a tool for non-urgent communication within the interdisciplinary team. The tool is available to providers and many clinicians. For inpatient nurses, it is located on the **Handoff Tool** page.

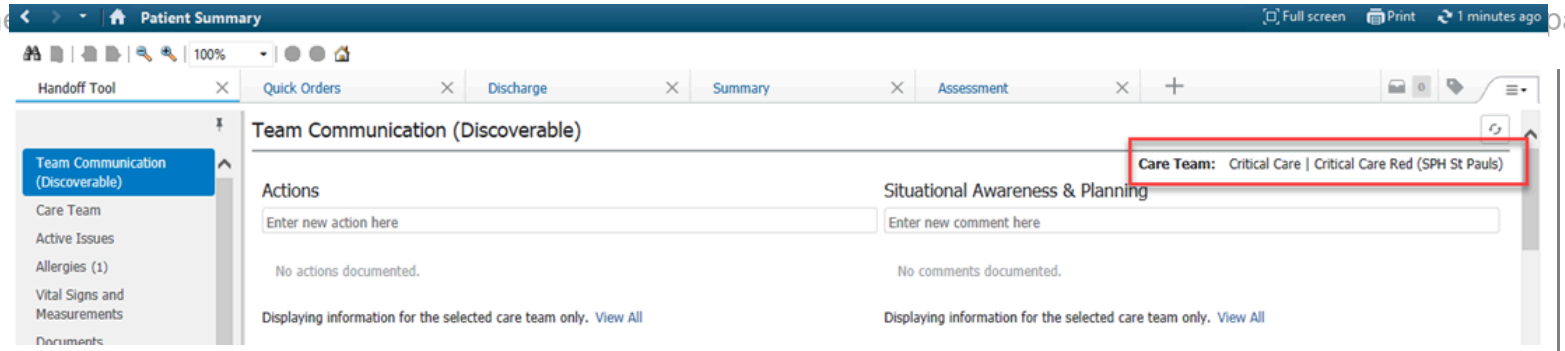
patient results or urgent need.

1. From the **Menu**, navigate to **Patient Summary**.
2. Click on the **Handoff Tool** tab and select **Team Communication (Discoverable)**.

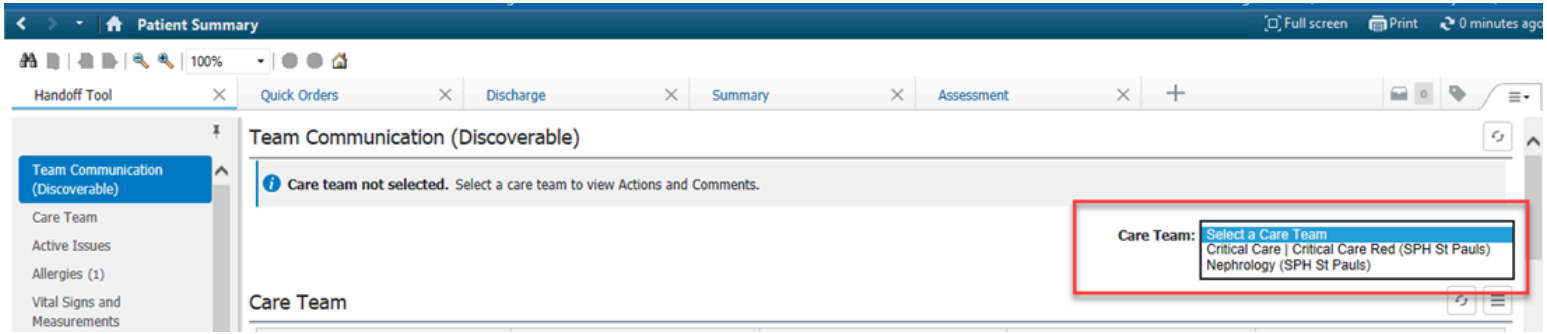


NOTES:

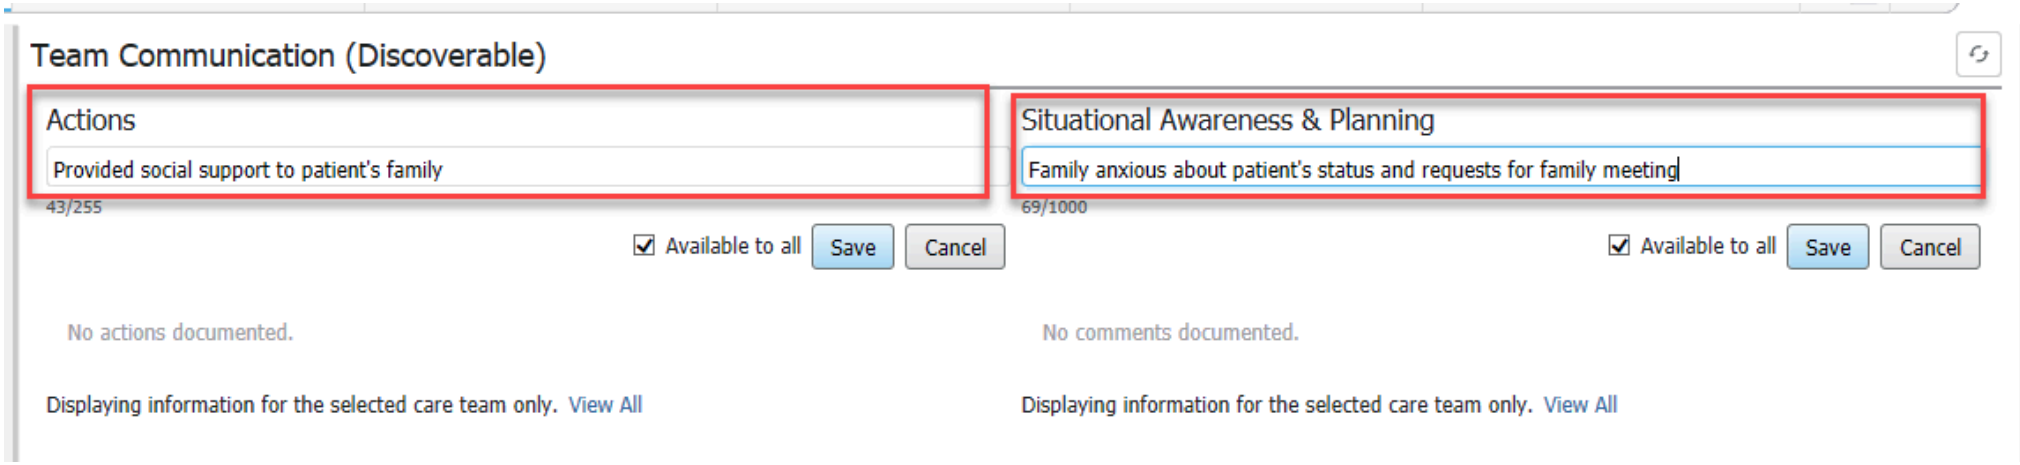
- The Care Team does not display in Team Communication (Discoverable) when the Care Team list is not available or when the patient is not assigned to a Care Team by the provider.
- If the patient is assigned to only one Care Team by the provider, the name of the Care Team will be populated at the right upper corner of Team Communication (Discoverable).



- Select an appropriate Care Team from the selection drop-down menu in Team Communication (Discoverable) if the patient is assigned to more than one Care Team by different providers.



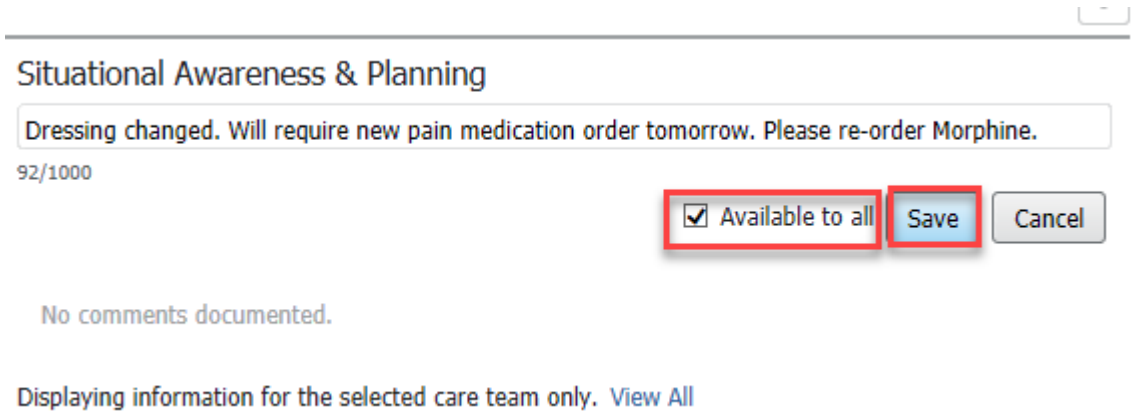
3. Use the **Actions** section to create a list of to-do action items.
4. Use the **Situational Awareness and Planning** section to leave a comment.



IMPORTANT:

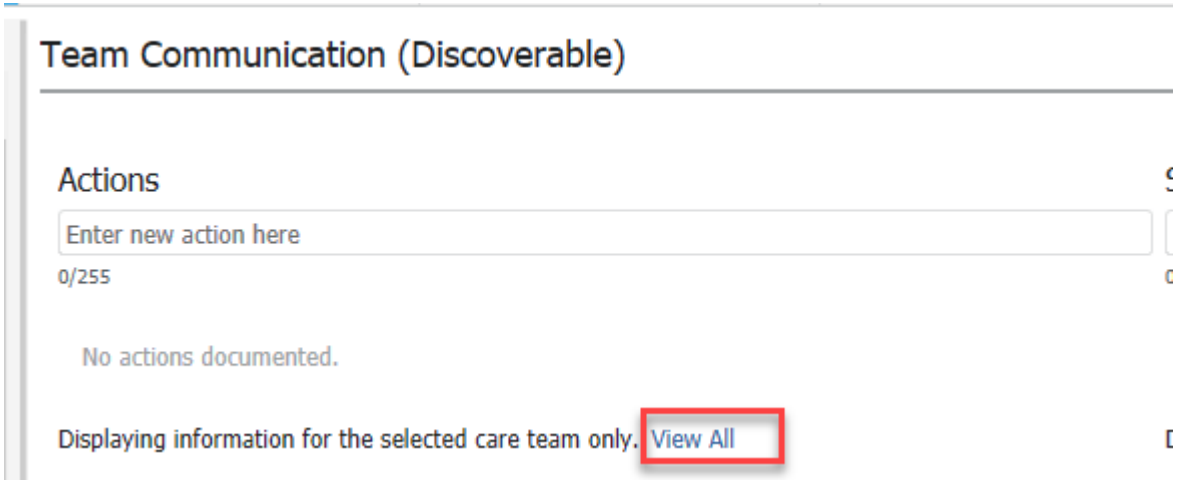
- Any charting in Team Communication (Discoverable) is now part of the legal chart.
- All information documented in Team Communication (Discoverable) is retained and discoverable by a formal request for release of information to Health Information Management (HIM).

5. Put a checkmark in the tick box next to **Available to all**.
6. Click **Save**.



the note (if necessary), delete actions and comments that are no longer applicable, and check off completed actions in Team Communication (Discoverable).

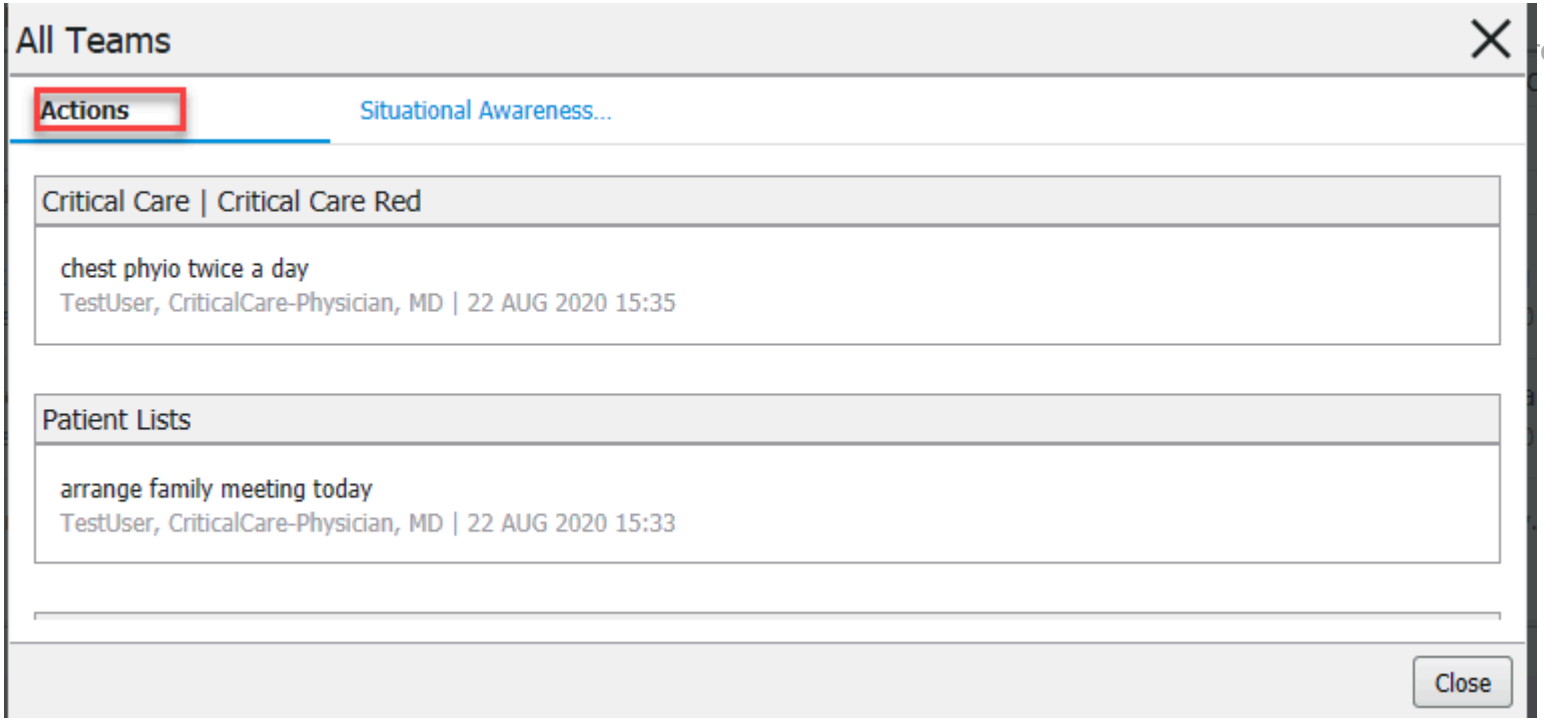
7. Click the **View All** hyperlink that is located below **Actions** section or **Situational Awareness & Planning** section.



The **All Teams** window opens.

8. Review the full list of both recently saved and historical actions and comments in **Actions** and **Situational Awareness & Planning** sections.

re to see this page in full context

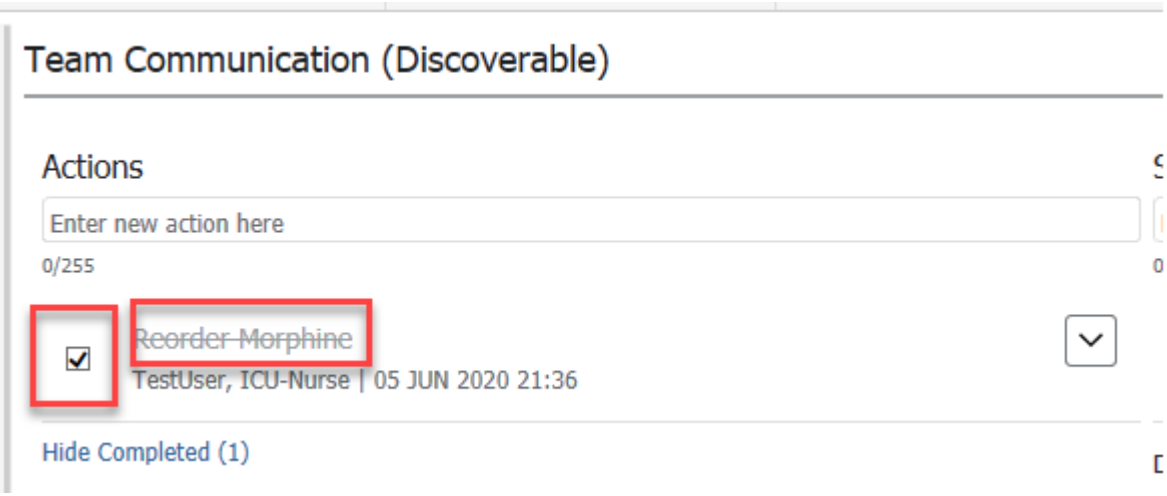


NOTES:

- The Patient Lists field of the All Teams window displays recently saved and historical actions/comments when the provider selects a patient from the Patient List type and documents actions/comments in I-PASS within Provider Overview.
- The Care Team field of the All Teams window displays recently saved and historical actions/comments when the provider selects a patient from the Care Team List and documents actions/comments in I-PASS within Provider Overview.

IMPORTANT: Editing actions/comment and checking off the completed actions cannot be done in the All Teams window. Before saving the actions/comments, **ALWAYS** select **Available to all** in Team Communication (Discoverable).

9. Put a checkmark in the tick box when an action has been completed. The completed action will be crossed off.



Click here to see this page in full context

10. To remove or modify an action or comment click on the **drop-down arrow** and select **Edit** or **Delete** as appropriate.

IMPORTANT: It is important to review and remove any action or comment when it no longer applies.

Document on the Interdisciplinary Rounding Summary

An Interdisciplinary Rounding Summary note can be used to document information that was discussed during rounding by the appropriate personnel.

1. Click on the **Interdisciplinary Rounding Summary** hyperlink within the **Create Note** section at the bottom of the **Handoff Tool** menu to open the note template.

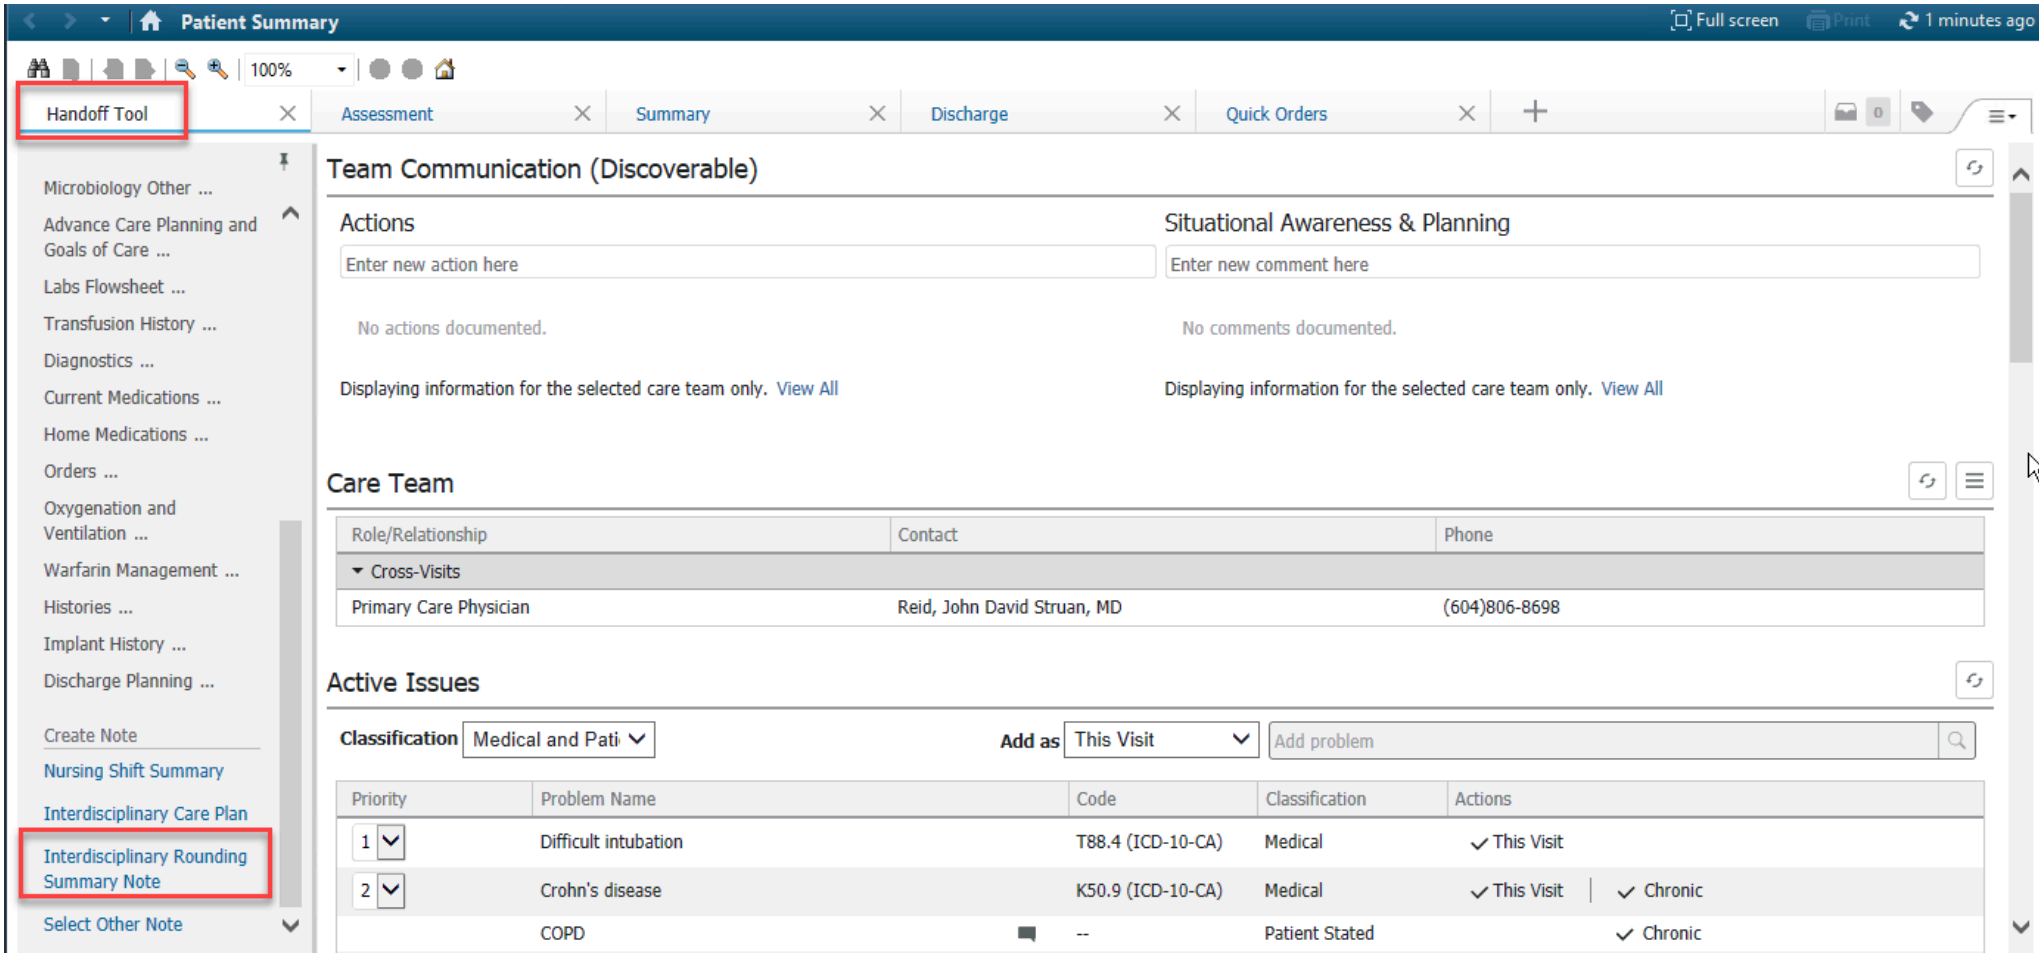
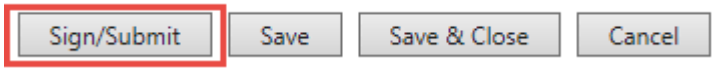
Click here to see this page in full context



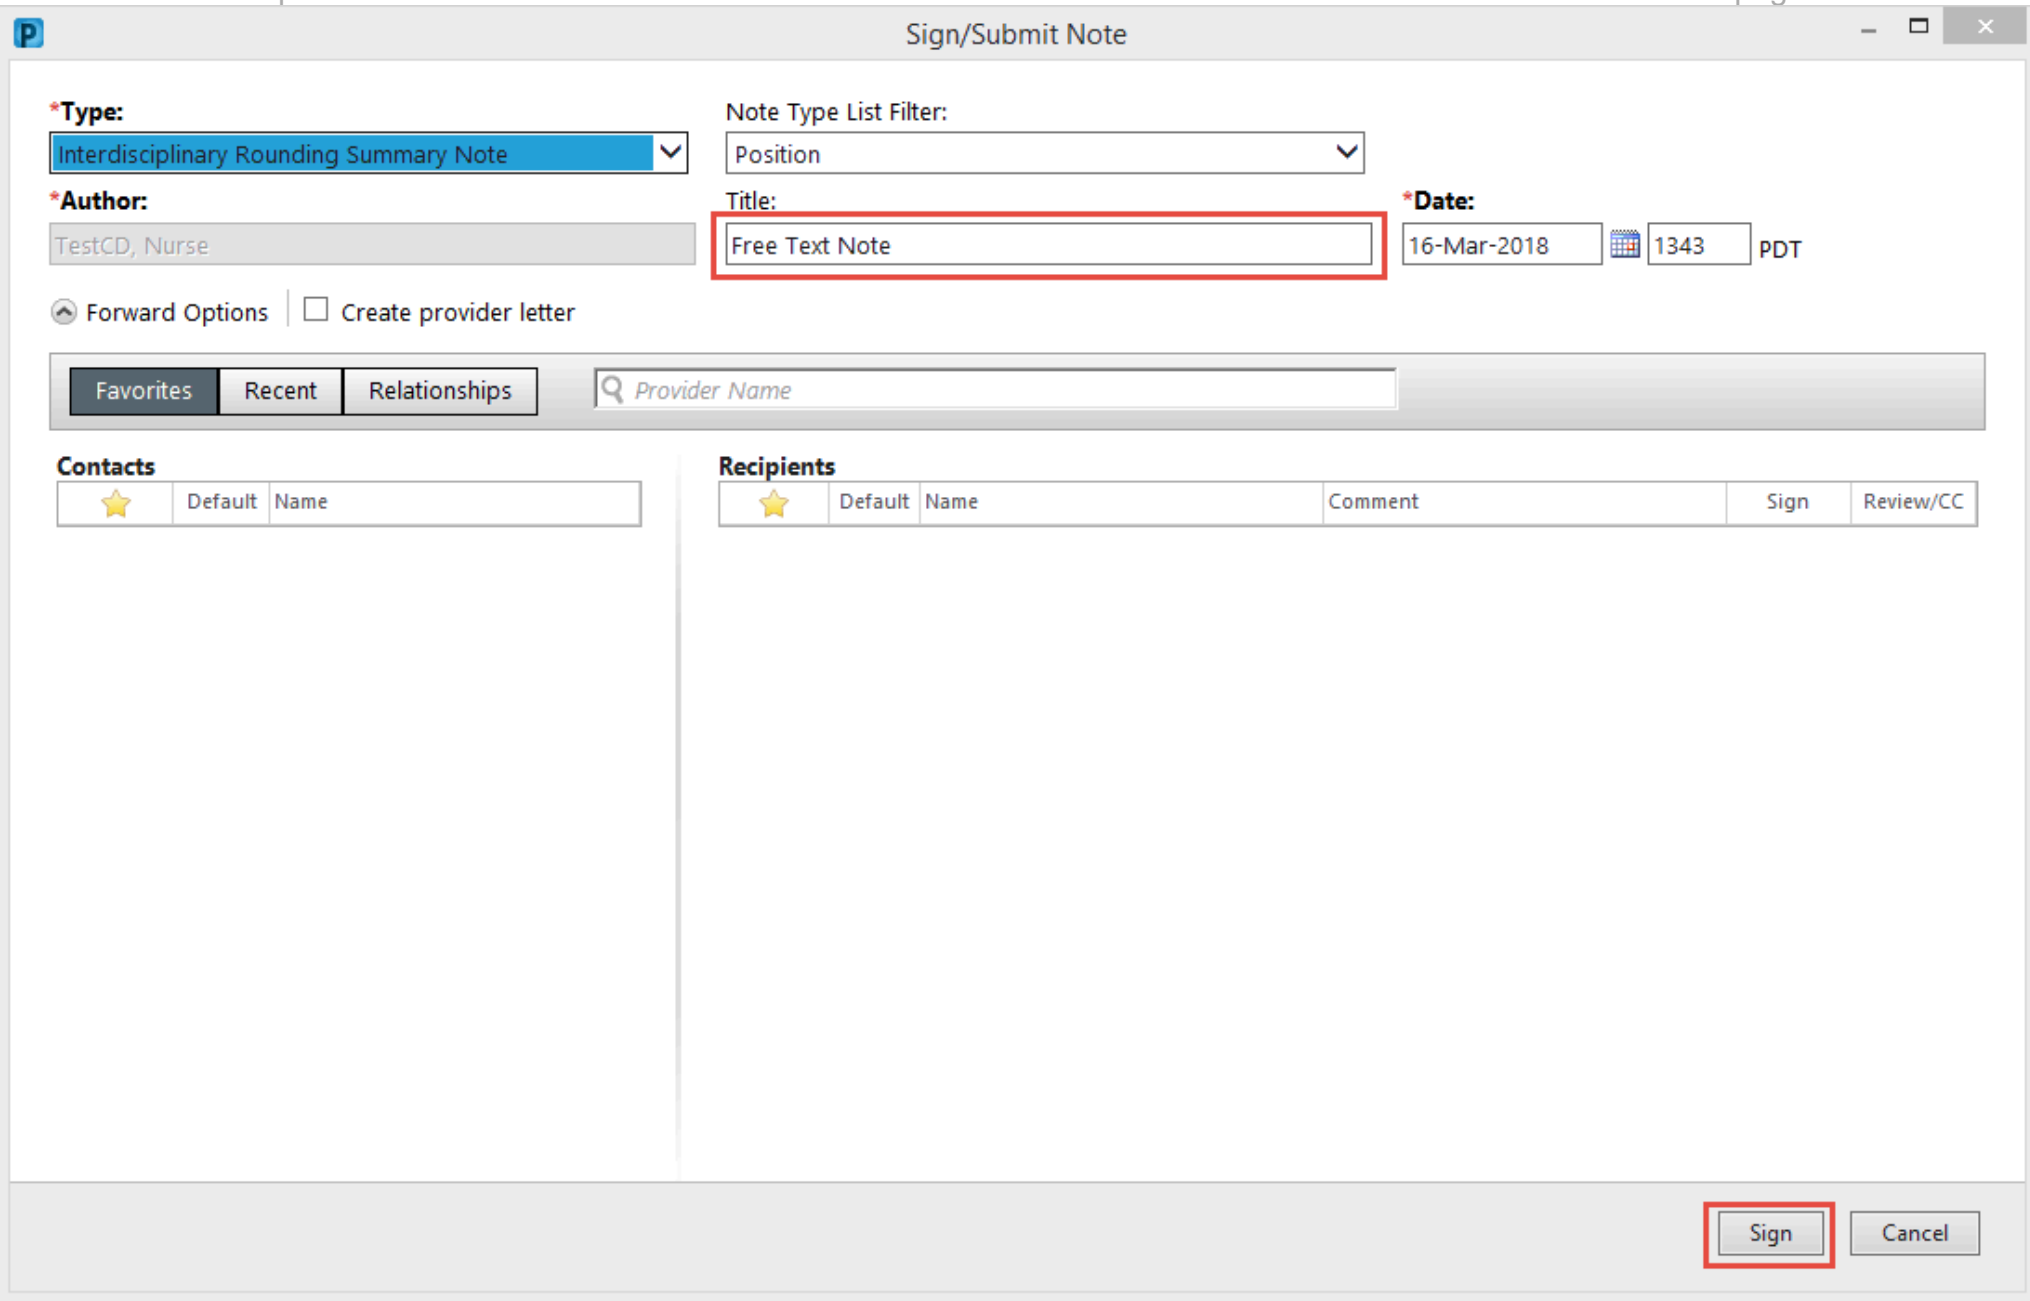
2. Complete documentation in note.

3. Click the **Sign/Submit** button.

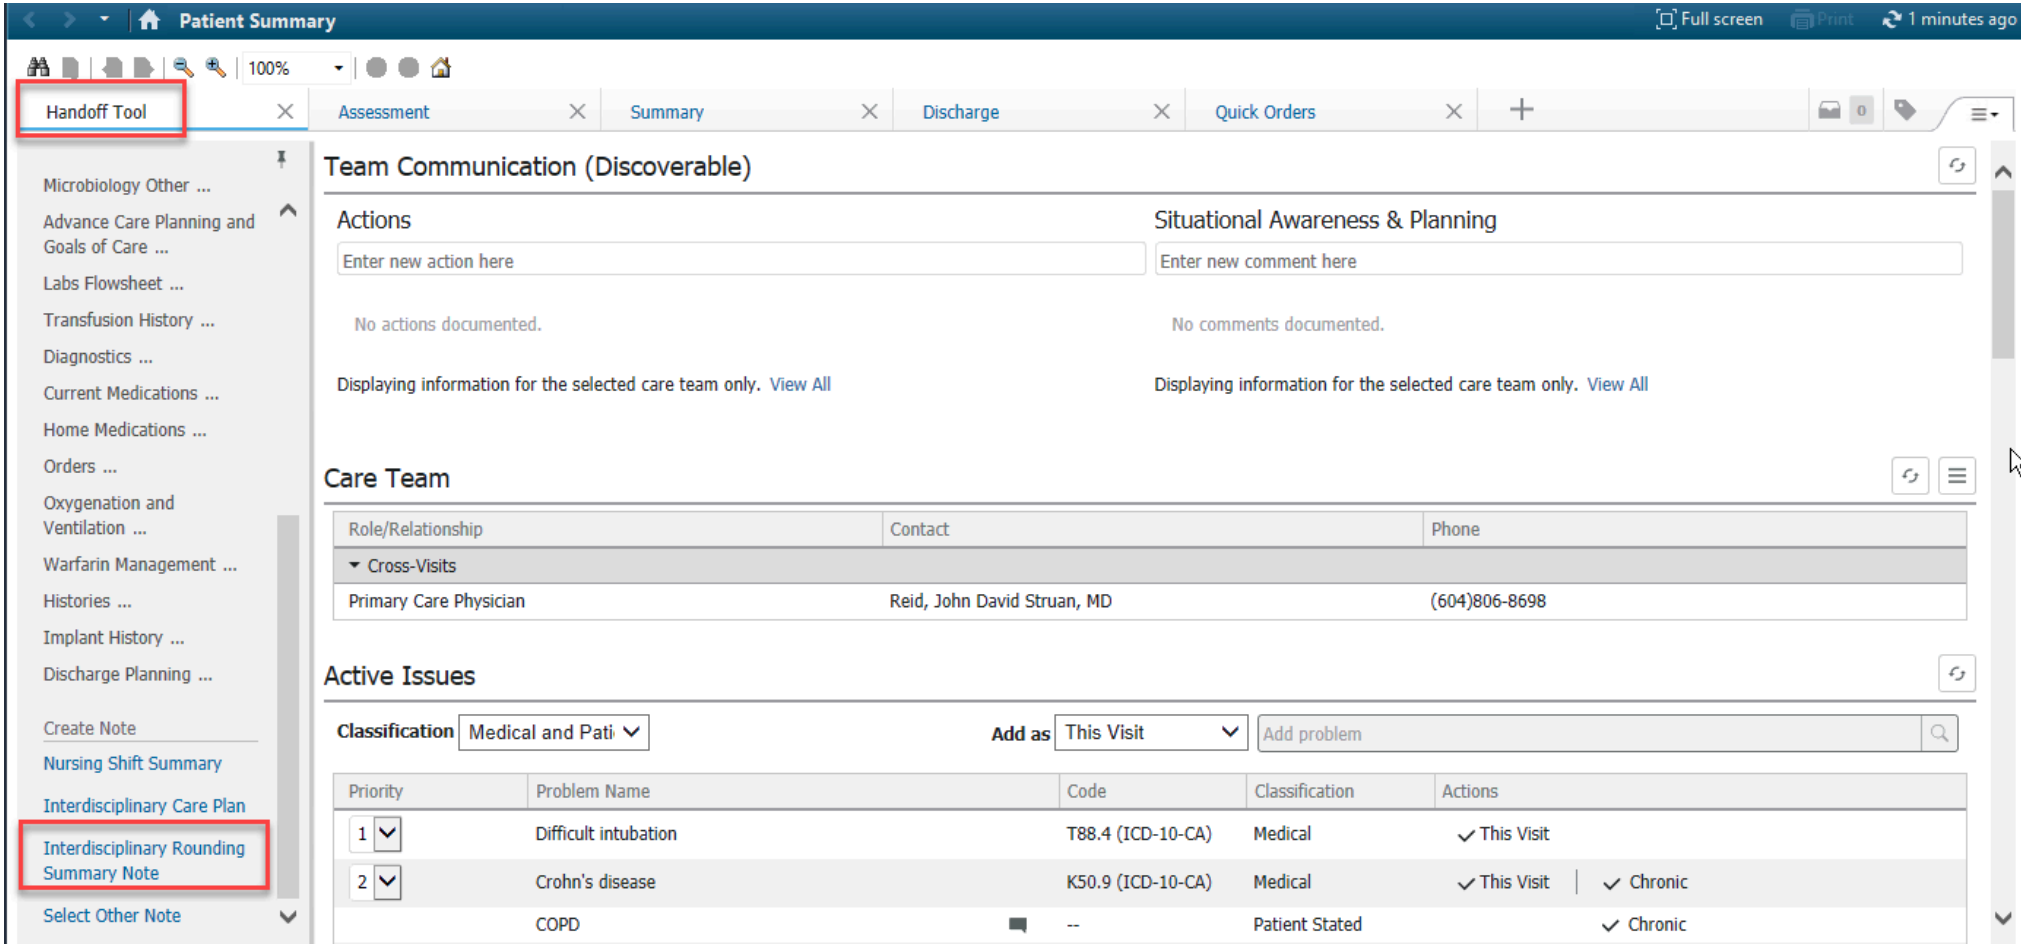


4. In the **Sign/Submit Note** window, modify the title of note to be more relevant (e.g. Interdisciplinary Rounding Month-Year).

5. Click the **Sign** button.



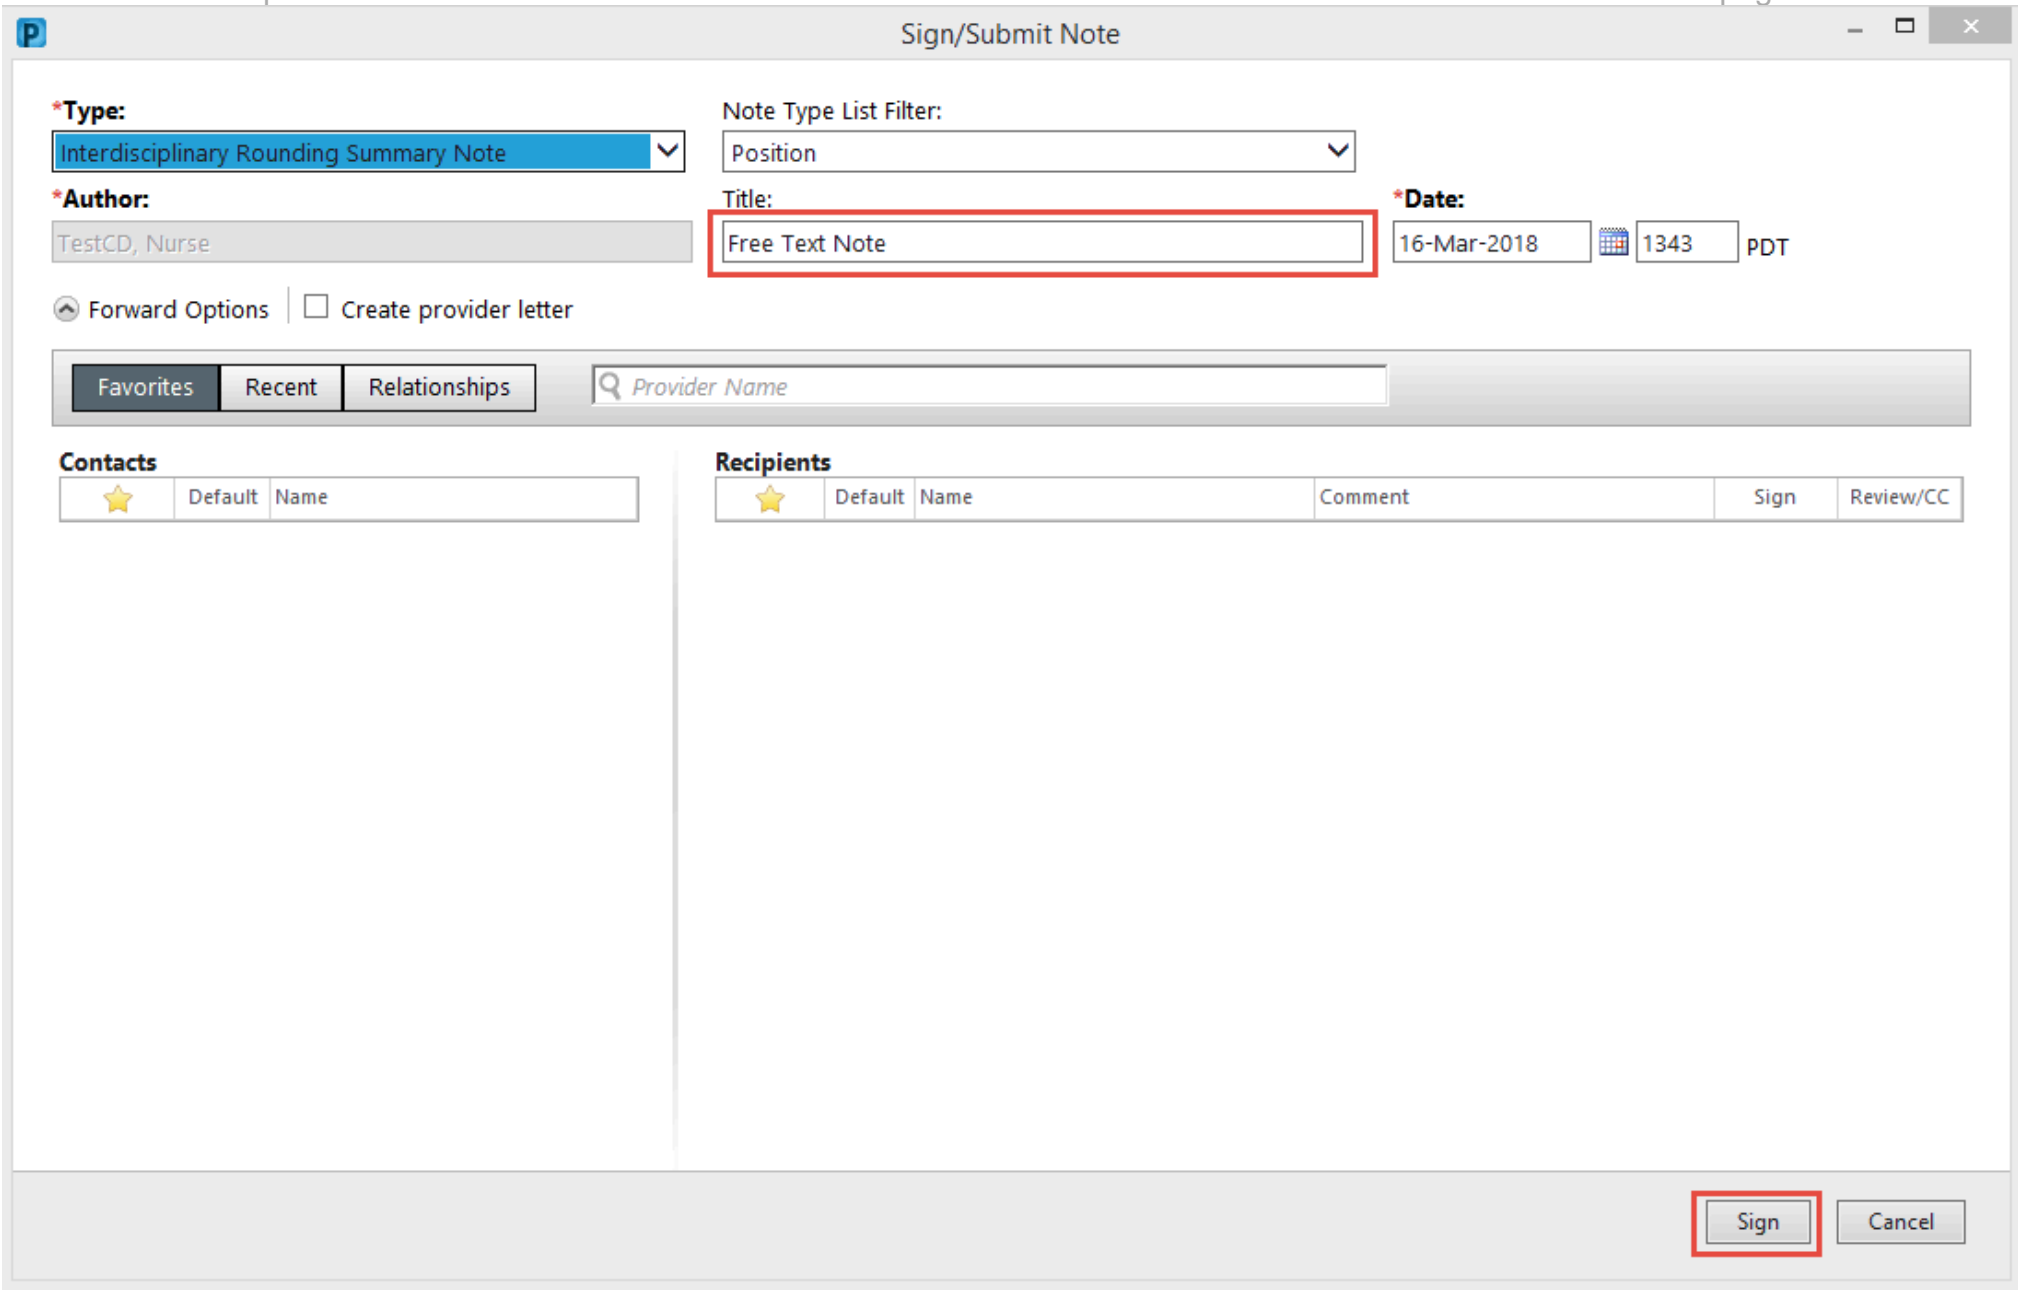
1. Click on the **Interdisciplinary Rounding Summary** hyperlink within the **Create Note** section at the bottom of the **Handoff Tool** menu to open the note template.



2. Complete documentation in note.
3. Click the **Sign/Submit** button.

4. In the **Sign/Submit Note** window, modify the title of note to be more relevant (e.g. Interdisciplinary Rounding Month-Year).

5. Click the **Sign** button.

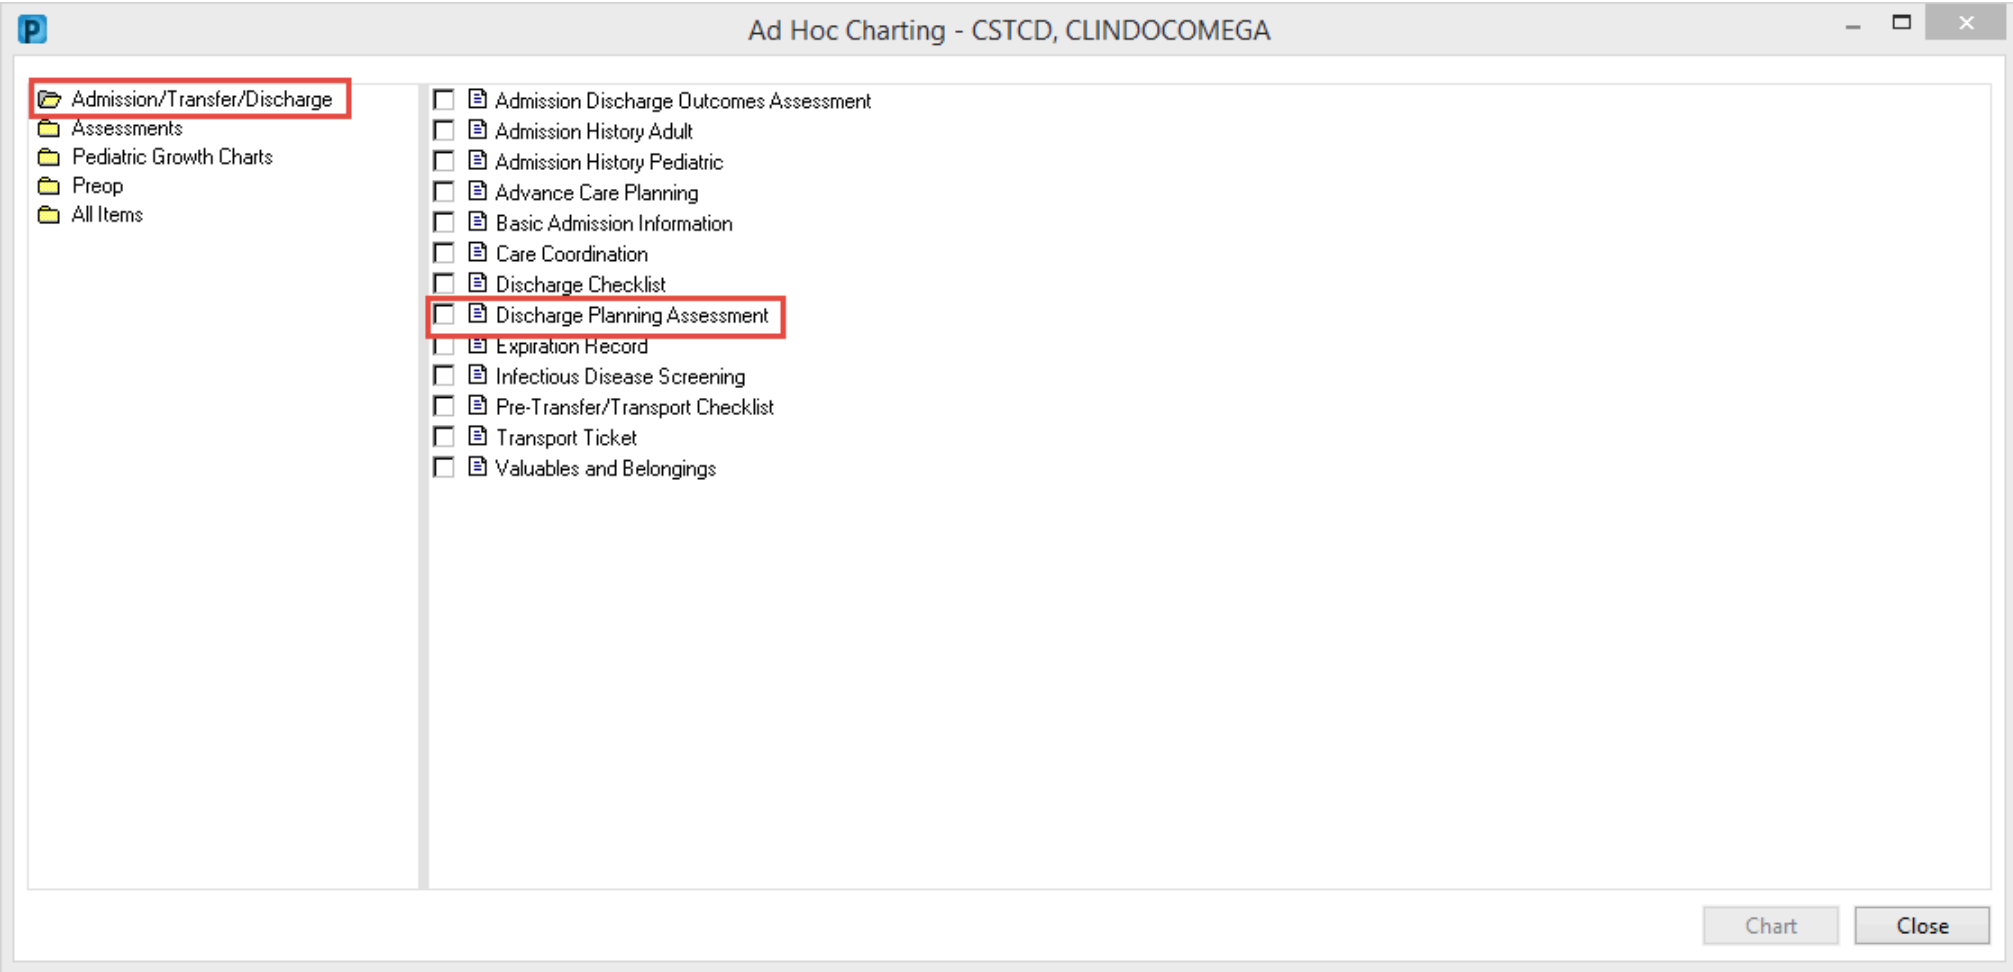


During rounding, the interdisciplinary care team may discuss and plan for patient discharge. This can be documented in the **Discharge Planning Assessment** PowerForm by the appropriate personnel. The PowerForm can be found via the **Ad Hoc** button on the Toolbar or through the **Discharge** tab in the **Patient Summary** page.

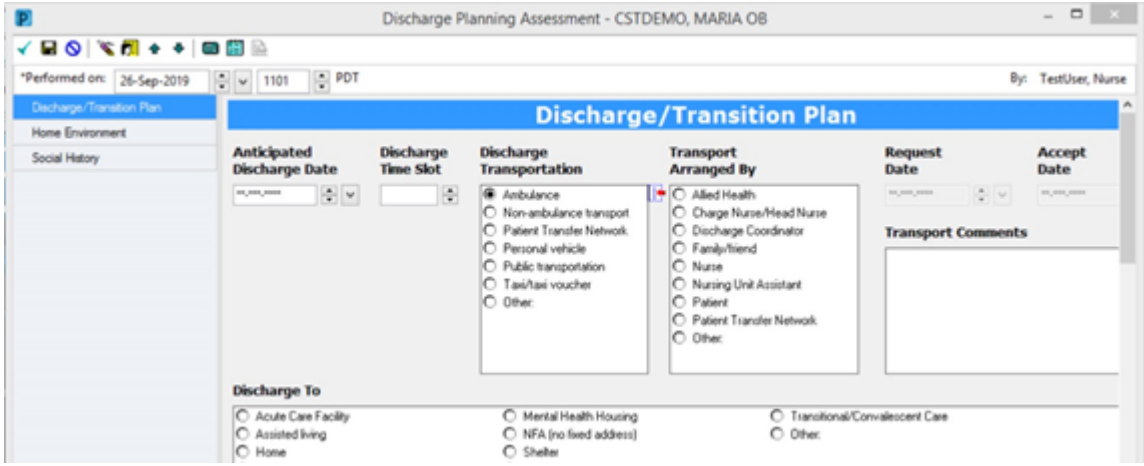
Access **Discharge Planning Assessment** PowerForm from AdHoc Button

1. Click on the **Ad Hoc** button on the toolbar.

2. Select the **Discharge Planning Assessment** PowerForm and click **Chart**.



3. Complete documentation within **Discharge Planning Assessment** PowerForm.



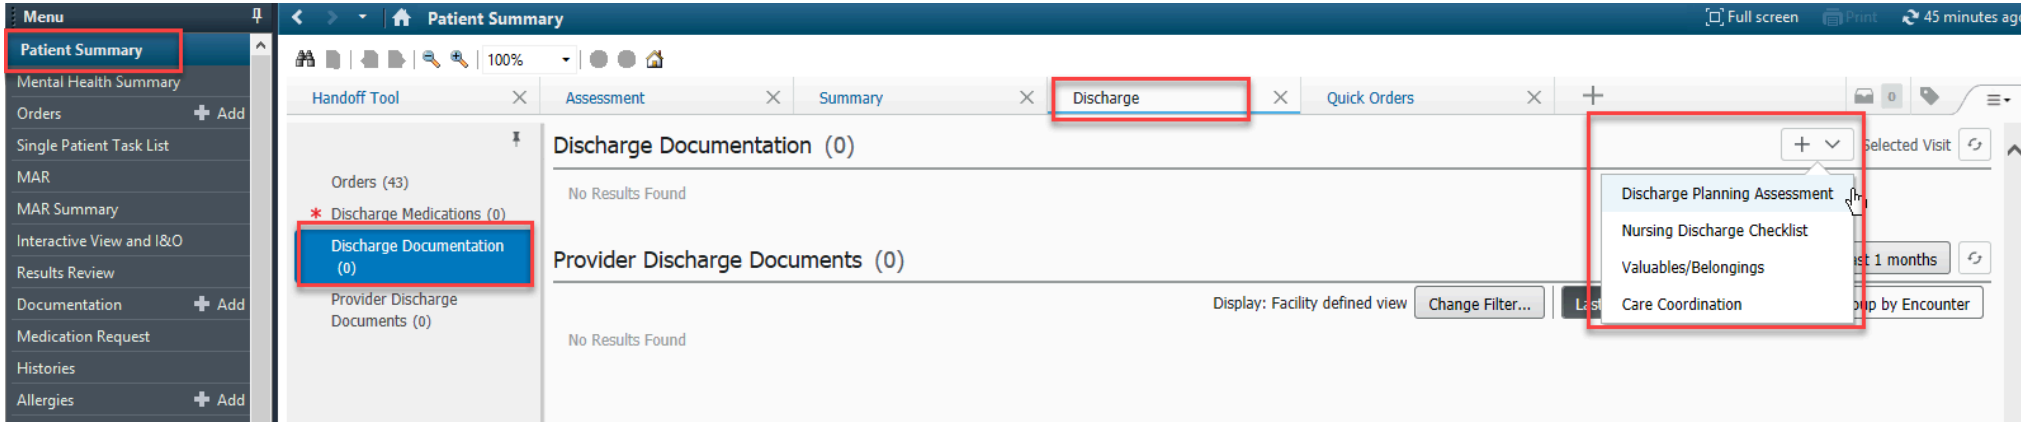
Click here to see this page in full context

4. Click the **green check mark** ✔ to sign documentation.

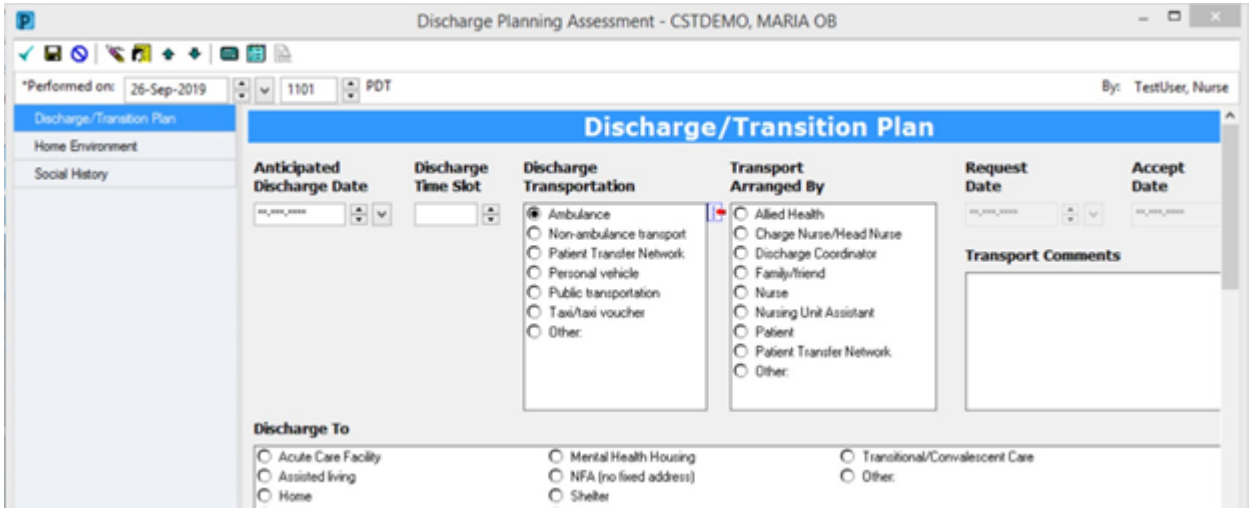
> **NOTE**: If discharge planning is reviewed during the next rounding and new information is entered, the previously documented data within the same encounter will carry forward to the **Discharge Planning Assessment** PowerForm.

Access Discharge Planning Assessment PowerForm from Discharge Tab in the Patient Summary Page

1. From the **Menu**, navigate to **Patient Summary** and select **Discharge** tab.
2. Scroll through the page to navigate to **Discharge Documentation** component.
3. Click on **blue drop-down arrow** to show list of PowerForms.
4. Select the **Discharge Planning Assessment** PowerForm.



5. Complete documentation within the **Discharge Planning Assessment** PowerForm.



6. Click the **green check mark** ✔ to sign documentation.

> **NOTE**: If discharge planning is reviewed during the next rounding and new information is entered, the previously documented data within the same encounter will carry forward to the **Discharge Planning Assessment** PowerForm.
